3 Account Options

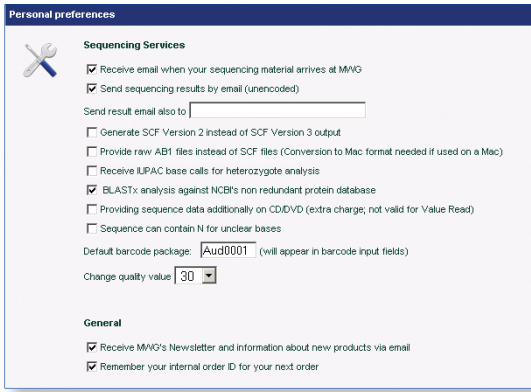

My Account

- General Settings
- Change Addresses
- Personal Preferences
- Group Administration

See 4

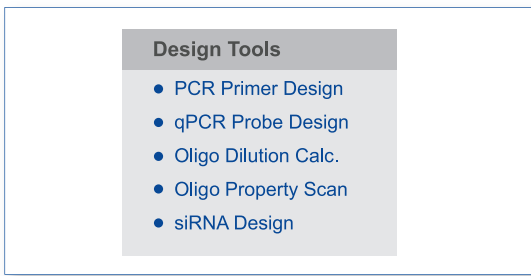

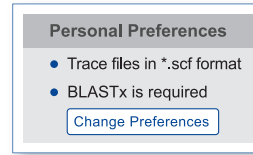

The Group Administration allows you to share oligo order information, sequencing results and stored sequencing primers with other researchers.

4 Personal Preferences

Select your **Personal Preferences** for sequencing orders or general settings offered by Eurofins MWG Operon.

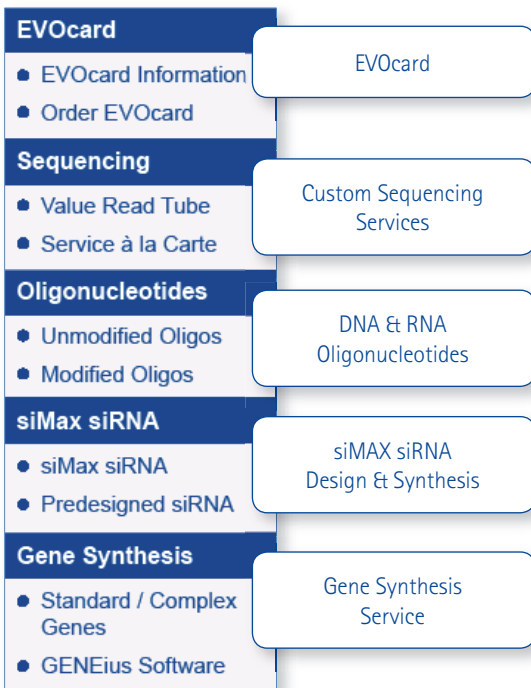

A part of your selected preferences are also displayed in your sequencing order templates.

5 Design Tools

Within your account you will find special **Design Tools** which help you to define optimal primers for your PCR, qPCR, siRNA or sequencing applications.

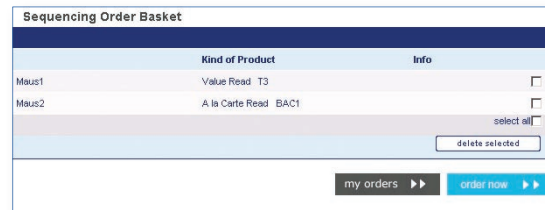

With MWG's Oligo Property Scan (MOPS) you can check all relevant physical parameters of your oligo.

6 Place Your Order

Choose your product.

Find all your selected products in your order basket and press "order now".

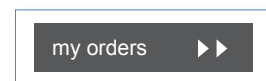

Choose your preferred payment method and confirm your order in the order summary.

7 Tracking and Download Function

Find your order history and your sequencing results via the "my orders" button.

Within your order history you can track the order process status, your available sequencing labels and the UPS delivery state of your oligo orders. You can download your order confirmation as well as your sequencing results.
