

ECOTOXICOLOGY SERVICES

STRONGER TOGETHER

Welcome to Eurofins Agroscience Services

We are a leading provider of product development consultancy and technical support to the crop protection industry. Our technical activities involve conducting field and laboratory studies to determine the safety and efficacy of new agrochemicals and crop varieties. With over 25 years of experience, Eurofins Agroscience Services offers outstanding technical knowledge and project management skills. By acquiring a carefully selected range of CRO's, we have created a unique portfolio of expertise that provides analytical, regulatory and field support to plant breeders, agrochemical, biopesticide, biocide and fine chemical manufacturers.

"We are experts in managing laboratory and field studies to generate ecotoxicological data to confirm the impact of agrochemicals, chemicals, biocides and medicinal products on non-target species"

Ecotoxicology Services

Claiming over twenty years of ecotoxicology experience and working in full compliance with GLP, Eurofins Agroscience Services has organised and managed numerous multi-site and multinational studies.

Eurofins Agroscience Services evaluates the environmental safety of plant protection products, chemicals, biocides, pharmaceutical and veterinary products on behalf of companies seeking registration.

This includes investigating the selectivity of products against a range of pests and their usual enemies in the laboratory and the field.

Expertise

As an international Group, we are proud to be able to claim some of the industry's most reputable names in ecotoxicology.

We provide competent, flexible and experienced services worldwide with all ecotoxicological studies performed in compliance with international guidelines, including EPA, OECD, EPPO, OPPTTS, SETAC, IOBC and JMAFF.

Our Promise

As a global service provider, Eurofins Agroscience Services can promise unparalleled expertise in ecotoxicology.

Our commitment to excellence in ecotoxicology is underlined by:

- Experienced and dedicated professionals with specific areas of expertise
- Project Management from the industry's most respected individuals
- Commitment to Growth and a vision of expansion for the future

Portfolio Of Capabilities

The following service guide details some of our primary activities but is not exhaustive.

- Aquatotoxicology including analytics
- Microbiological testing
- Standard tier testing with NTA and soil organisms
- Aged residue and semi-field
- Honey bee lab, tunnel and field
- Bumble bee lab and greenhouse
- Predatory mite field studies
- Residues in food sources, bee products, earthworms and on terrestrial arthropods
- Non target plants, greenhouse and higher Tier
- Large scale NTA studies
- Monitoring
- Earthworm field studies
- Litterbag studies
- Micro-arthropod field studies

Eurofins Scientific Group

Eurofins Scientific is a life sciences company that serves a wide range of industries including the pharmaceutical, agricultural, food and environmental sectors.

Today the Eurofins Group is a leading provider of analytical services with:

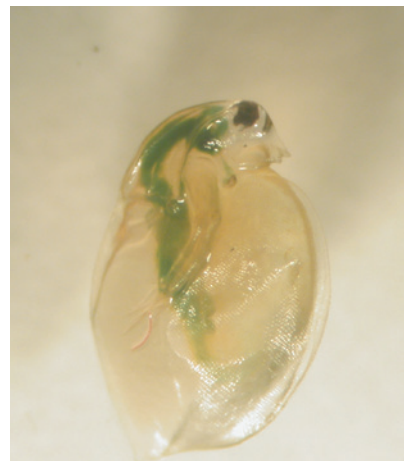

- An international network of 150 laboratories across 30 countries in Europe, the USA, Asia and South America
- About 9,500 staff
- A portfolio of over 40,000 reliable analytical methods
- More than 80 million assays per year to establish the safety, composition, authenticity, origin, traceability, identity and purity of biological substances.
