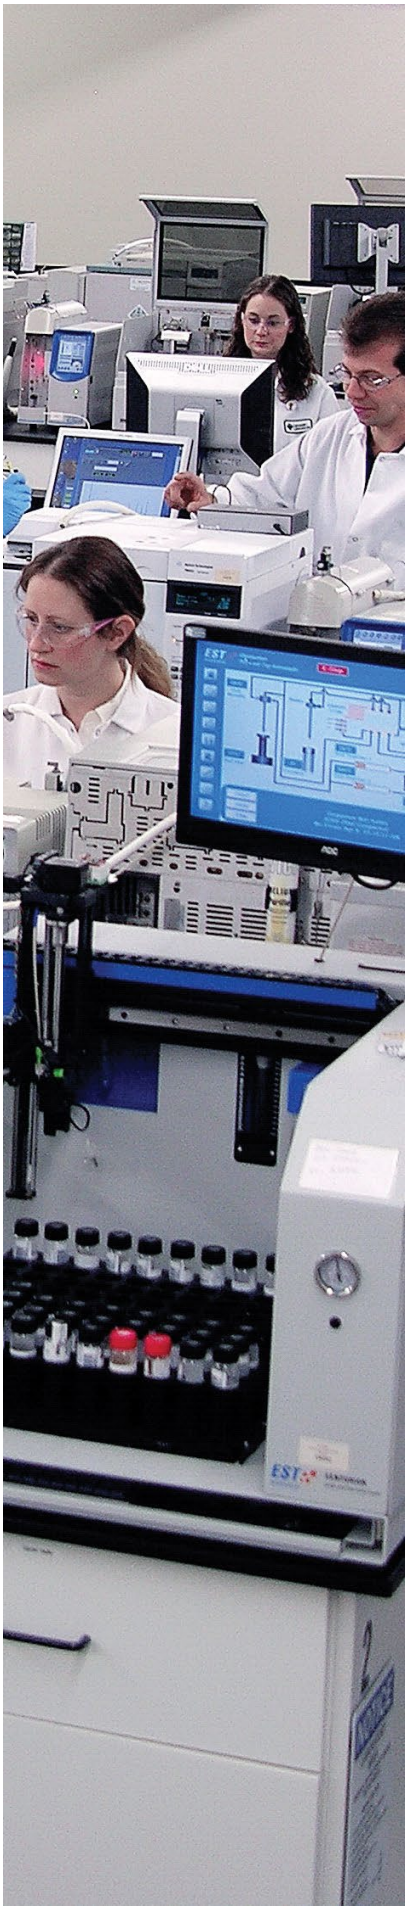
Group Directory 2024

eurofins



Eurofins:
Network of laboratories

Each laboratory offers analytical services and customer support, however, some services are centralised. Through excellent logistics and information technology, Eurofins can deliver a full range of expertise through any one of its laboratories.

In this directory, services listed are specific to the respective laboratories and are described as follows:

- *International Division/ International Business Line*
- *Country (by alphabetical order)*
- *Laboratory - Marketing name*
- *Laboratory description/ Services/ Analysis/ Offers*
- *Full contact information:*
- *Legal name of the laboratory*
  - *Full address and phone number(s)*
  - *Email(s)*
  - *Website*

FOOD & FEED TESTING

Eurofins is the world leading food and feed testing laboratory group, deploying a comprehensive range of state-of-the-art analytical techniques in order to support its clients' increasingly stringent quality and safety standards.

The Group has built up a global network of food testing laboratories and Competence Centres that perform more than 100 million assays per year to establish the safety, composition, authenticity, origin, traceability and purity of food.

Eurofins thus offers the broadest portfolio of any food testing lab and makes this unique offer available globally from any of our laboratories using optimised processes, logistics and IT.

AUSTRALIA

Eurofins Food Testing Australia

Eurofins Food Testing Australia is an ISO 17025 accredited network of laboratories with laboratory locations in Melbourne, Perth, Brisbane and Sydney.

Our team of scientists provides one of the most comprehensive testing suites in analytical chemistry, microbiology and molecular biology to cater for general food, dairy, meat, beverage and feed testing requirements, leveraging on the best analytical methods available worldwide.

Services:

• Chemistry
• Microbiology

Accreditations:

• NATA ISO17025:2017

AUSTRIA

Eurofins Lebensmittelanalytik Österreich

Eurofins Lebensmittelanalytik Österreich was founded in 2006 as a subsidiary of Eurofins Scientific and Österreichisches Forschungsinstitut (ofi) with a rich history in serving the food processing and retail industry.

Eurofins Lebensmittelanalytik Österreich is one of the leading laboratories in the field of food law and labelling within the CEE Region.

The site in Wiener Neudorf carries out a broad range of sensory, chemical, microbiological and pesticide residue analyses and consultancy on foods, packaging, and cosmetics, with a special focus on the area of retailing. These services are complemented by countrywide sampling, sample logistics and special projects.

Services:

• Chemical analyses (fat, protein, dry matter etc.)
• Chromatographic analyses (pesticides in fresh fruit and vegetables, preservatives in food, antibiotic residues)
• Microbiology (cultural methods, PCR)
• Sensory analyses
• Food Law: §73 LMSVG experts with competence in food law, labelling and food supplements
• International marketability and translation for over 45 countries

• Inspection/Hygiene: 3rd party audits, hygiene checks, expert sampling, HACCP consulting

Accreditations:

• ÖVE/ÖNORM EN ISO/IEC 17025:2018
• ÖVE/ÖNORM EN ISO/IEC 17020:2012

Eurofins ALAC Food Testing

ALAC has been established in South region of Brazil for more than 20 years. As part of Eurofins group since 2012, ALAC Food Testing provides a full scope of macro and micronutrients in food and feed, microbiology, microscopy, beverage quality control and molecular biology testing for different industry sectors from farm to fork. In addition, ALAC is a local provider of one-stop-shop services provided by Eurofins at the global level.

Services:

• Microbiology testing
• Metals and minerals testing
• Microscopy (filth and particulate matter) testing
• Allergens testing
• Nutritional testing services in several matrixes
• Beverage testing for quality control

Accreditations:

• CGCRE – ABNT NBR ISO/IEC 17025:2017
• REBLAS (member of Brazilian Network of Laboratories from Ministry of Health)
• MAPA (member of Brazilian Network of Laboratories from Ministry of Agriculture)

CROATIA

Eurofins Croatiakontrola Zagreb

Eurofins Croatiakontrola Ltd. Is an inspection company which combines laboratory testing services and inspection of goods.

We have profiled ourselves as the strongest laboratory in Croatia in the field of pesticide residue analysis and analysis of contaminants in food and feed.

Services:
Our services in general food, feed analyses and consultancy contain:

Microbiology - Testing for the complete range of microorganisms relevant to the food industry:
• Pathogenic organisms (e.g., Salmonella spp, Listeria monocytogenes, Staph. Aureus, E. Coli, Campylobacter spp, Vibrio spp)
• Spoilage organisms (e.g., Yeast and Mould, Bacillus spp, Clostridium spp, Pseudomonas spp)
• Technologically relevant microorganisms (e.g. Lactobacilli)
• Microscopic analysis
• Hygienic checks

Chemical analysis of food and feed - testing for complete range of analysis according with the requirements of the regulations and laws:
• Nutritional testing of food
• Sensory analysis of food and food contact materials with a wide scope of different methods; highly experienced and trained experts
• Feed analysis (quality parameters)
• Vegetables
• Fruits
• Meat and meat products
• Oil seeds; oils and fats of vegetable and animal origin, including the analysis of all relevant fat attending compounds and profiles; ageing, oxidisation;
• Olive oil
• Dried fruits
• Nuts
• Convenience products
• Cereals
• Coffee
• Sweets
• Novel food, food supplements and health food

Common use objects, Food contact material, Cosmetics - Testing for range of analysis according with the requirements of the regulations and laws; Making of EU Cosmetic Product Information File; Stability tests, Challenge testing, etc.

Agricultural soil and fertilizer analysis, agricultural advice - Testing for complete range of analysis according with the requirements of the regulations and laws:
• Soil quality analysis
• Fertilizer quality analysis

Environmental analysis services: - Performing sampling, chemical and microbiological analyses of various matrices. We provided services to government, science and private sector:
• Analysis of drinking water, mineral water, groundwater, surface water, wastewater for organic and inorganic contaminants, heavy metals, flame retardants, ecotoxicology testing
• Analysis of waste, soil, sludge, sediment, digestate and compost
• Analysis and classification of solid recovered fuels (SRF)

Consultancy
• Consultancy in respect of quality control systems/ HACCP/ hygienic checks
• Specialist in the field of food law, labelling

The laboratory is able to analyse all kinds of food with the following microbiology and chemical methods:
• Classic cultural methods
• PCR
• Petrifilm
• Inhibitory substance
• Classical methods
• Instrumental methods (liquid and gas chromatography, MS/MS, spectrophotometry, atomic absorption spectroscopy), etc. (ISO, AOAC, EuSalts, inhouse methods).

Accreditations:
Eurofins Croatiakontrola Ltd. is accredited according HRN EN ISO/IEC 17025:2007 and according GMP+B10 Laboratory Testing Scheme. Laboratory is designed for a high sample performance with short analytical times due to advanced equipment and a "lean management" methodology.

Membership:
• GAFTA Approved Analysts
• FOSFA Approved Analysts

Eurofins Croatiakontrola Rijeka

Eurofins Croatiakontrola. Ltd. is inspection company engaged in inspection of quality and

quantity of goods, specialized in inspection of agricultural and food products, in particular grains, oilseeds and feedstuffs. We provide an independent and expert testing and analysis of goods in ports, warehouses, vessels, containers, trucks/wagons.

Services:

• Supervision of loading/discharging
• Sampling
• Quality inspection and conditions of goods – oil, moisture, TW, Foreign matters, broken kernels, damaged kernels, gluten, protein, falling number, W and P/L, quick test of Toxins, quick test on GMO CP 4, poisonous seeds etc.
• Infestation inspection
• Cleanliness inspection
• Damaged survey and expert evaluation of the damages
• Sealing of vessel holds/containers
• Inspection on Slaughtering line – includes procedure of classification and labelling of beef, sheep and pig halves
• Consulting services – label check and translations, interpretation of the regulations

Accreditations:

• HRN EN ISO 9001
• HRN EN ISO/ICO 17020 – inspection body
• GAFTA Superintendent and Surveyor Member
• FOSFA Superintendent and Surveyor Member

CZECH REPUBLIC

Eurofins CZ

The Eurofins ISO 17025 accredited laboratories in Prague provide a wide range of microbiological and chemical analyses. Services and consultancy are available through offices in Prague and Brno, the logistics network for sampling and sample collection covers the whole Czech Republic.

Services:

• Chemical and nutritional testing of products for the industry and the retail sector
• Determination of additives, preserving agents, etc.
• Authenticity testing based on markers analysis (meat content, fruit and vegetables content)
• Cultivation and PCR microbiology analyses
• Inspections, audits, marketability certificates and label consulting

Accreditations:
Eurofins CZ is accredited according to ČSN EN ISO 17025 by CIA (Czech accreditation body)

DENMARK

Eurofins Steins Laboratorium

Eurofins Steins performs sampling, laboratory analyses and consultancy services focusing on the food, feed, agro, and dairy industries. Our laboratory in Vejen services a broad range of companies, authorities and organisations.

Services:
Food and feed testing, more specifically consists of testing contents and contamination – vitamins, amino acids, mycotoxins, pesticides, heavy metals, medicine residues, pathogenic micro-organisms, etc.

European Vitamin Competence Centre, BSE-testing and consultancy on hygiene - i.e. HACCP.

Accreditations:
The laboratories are accredited according to the ISO 17025 standard. The laboratories are appointed as national reference laboratories within specific areas.

Eurofins GenoSkan A/S

GenoSkan A/S uses a variety of advanced biotechnologies for genotyping and sequencing.

The Infinium HD assay technology from Illumina is a flexible platform which makes it possible to genotype a large amount of SNP markers for one individual at a time.

With this technology it is possible to use both customized SNP assays and to design own SNP assays. GenoSkan A/S offers customized SNP-assays for most species (human, cattle, pig, sheep, dog etc.)

Services:
Genomics in animals/veterinary testing

FINLAND

Eurofins Scientific Finland Oy

The Helsinki laboratory unit offers everything for self-monitoring related pathogen, food poisoning and hygiene indicator microbes determinations and the chemical composition of food and nutritional content analyses as well as the water analyses.

Services:
- microbes

- chemical composition

- nutritional values

- allergens

- pesticides

- shelf life studies

- packaging labels

- sensory evaluations

- surface hygiene

Accreditations:
Accreditations:

- ISO 17025

Eurofins Scientific Finland, Raisio Laboratory Site

The Raisio laboratory unit is focused on food and feed testing, including microbiological and chemical laboratory testing and sensory analysis. Our specific competence area is fat related analyses. Additionally, the complete biopharmaceutical and food testing service offering of the Eurofins Scientific Group is available to our clients via the Raisio site.

Services:

• General food chemistry, fat analyses (including special analyses like sterol/stanol ester analyses, trans fatty acids, etc.)
• Microbiological analyses

Accreditations:

• ISO 17025
• Approval by Finnish Food Safety Authority (EVIRA)

FRANCE

Eurofins Analytics France

Services:

• Chemical and nutritional testing of food products for industry and the retail sector
• Determination of additives, preserving agents, colourings etc.
• Determination of mycotoxins, melamine, acrylamide and PAH (Polycyclic Aromatic Hydrocarbons)
• Determination of pesticides
• Authenticity competence centre:

- Isotopic analyses by SNIF-NMR® and IRMS – powerful tools in the detection of adulteration of fruit juices, alcoholic beverages, vinegar, honey, flavours, and natural products (e.g. bioethanol); also enables geographical origin control in plant and animal ingredients.

- A complete offer for quality and authenticity control of fruit juices and fruit products

- NMR profiling allowing targeted and non-targeted

monitoring of large numbers of samples for validation of the composition and detection of atypical components (Honey, Spices, Coffee, Oils&Fats, Juices, Wines…)

- Flavour profiles, chiral analysis and flavor compounds determination by GC-MS (fruit products, essential oils, plant extracts)

Accreditations:
The laboratory is accredited by COFRAC, the French accreditation body, in accordance with ISO 17025(2017), under the reference 1-0287 (accreditation scope available on www.cofrac.fr)

The laboratory has been issued the GMP+B11 Registered Laboratory Certificate by the Dutch certification body Schutter Certification B.V.

Eurofins Biologie Moléculaire France

Services:

• GMO testing from seeds to finished products across the food and agricultural chain (farm to fork concept) using the most innovative and proprietary technology including real-time PCR detection, identification and quantification of a complete range of genetically modified plants such as maize, canola, soybean and vegetables. A combination of optimised protocols, state-of-the-art technology and a highly skilled team enable rapid processing times tailored to the customers' requirements.
• Genetic fingerprinting for tracing of beef supplies (Eurofins TAG™)
• Species identification by DNA chip: determination of the presence of 21 meat species in one single analysis
• Allergen detection: Eurofins offers a comprehensive testing scheme covering all allergens listed on the "EU – Allergen Hit list". Eurofins can offer both ELISA and PCR technology and advises customers which method is most appropriate for their products and production line Training and consulting concerning allergen analyses and risk management (Recognition by VITAL®)
• Seed purity testing and quality control • SSR / SNP development and routine analyses
• Marker Assisted Selection (MAS / MAB)
• Divergence studies (genetic resources management, varietal identification, EDV - Essentially Derived Varieties)
• Contract research (marker conversion, development of specific tests, project management)

Accreditations:
The laboratory is accredited by COFRAC, the French accreditation body, in accordance with ISO 17025, under the reference 1-6730 (accreditation scope available on www.cofrac.fr).

Eurofins Laboratoire de Pathologie Végétale

Eurofins Laboratoire de Pathologie Végétale specializes in plant pathology, pest detection on plants and territory monitoring. In that context, thousands of analyses are performed each year to comply with national surveillance programs of major plant quarantine diseases.

Services:
The laboratory offers diagnosis services, as well as expertise in the following fields:
• Nematology
• Mycology
• Bacteriology
• Virology

Using conventional methods of isolation and identification to advanced immunoenzymatic and molecular biology techniques, the laboratory can provide a wide range of services aimed at seed and agrochemical firms as well as co-operatives and food manufacturing companies.

Accreditations:
The laboratory is accredited by COFRAC, the French accreditation organization, in accordance with ISO 17025, under the reference 1-5364 (accreditation scope available on www.cofrac.fr).

Eurofins Laboratoires de Microbiologie Ouest

Eurofins Laboratoires de Microbiologie Ouest is the biggest of the French Eurofins laboratories for microbiological testing, analysing several hundred thousand samples each year and conducting method development and R&D projects in the field of microbiological testing.

Services:
Microbiological analyses of all types of food products are performed for clients in the food industry, retailers and caterers.

A wide range of methods are employed, including rapid methods with very short turn-around-times using immunoenzymatic techniques, molecular biology methods (PCR), especially for pathogenic bacteria e.g. Salmonella.

Application of new technology for germ identification by Matrix-Assisted Laser Desorption/Ionisation with Time-Of-Flight mass spectrometry (MALDI-TOF), with a very short Turn Around Time.

The laboratory has a nationwide network of technicians conducting sampling at production sites and delivering samples directly to the laboratory in less than 24 hours.

Accreditations:
The laboratory is accredited by COFRAC, the French accreditation organisation, in accordance with ISO 17025 under the reference 1-1830 (accreditation scope available on www.cofrac.fr)

Eurofins Laboratoire Coeur de France

Eurofins Laboratoire Coeur de France is a private - public structure, the result of the takeover of IPL activities by Eurofins in 2011. It analyses several hundred thousand samples each year.

Services:

• Animal health testing: microbiology, PCR for BSE and animal blood testing
• Environmental water testing
• Food safety using microbiology testing and PCR virus detection

Accreditations:

The laboratory is accredited by COFRAC, the French accreditation organisation, in accordance with ISO 17025, under the reference 1-2452 (accreditation scope available on www.cofrac.fr)

Eurofins Hygiène Alimentaire

Eurofins Hygiène Alimentaire is dedicated to providing food safety support to our customers in retail, catering and warehousing.

A nationwide network of technicians conducts sampling at production sites, delivering samples directly to the laboratory in less than 24 hours.

Eurofins Hygiène Alimentaire also operates a large food safety consultancy department. About 250 auditors and sample takers perform audits at production sites, restaurants and retail outlets, checking compliance with current legislation in the field of food safety. They provide advice in implementing improvement plans and ensure that HACCP instructions are strictly implemented on site.

This unit also conducts training sessions on hygiene and food safety for operators and professional managers in retail and catering.

Accreditations:
All sampling operations are done under full ISO 17025 accreditation delivered by the French accreditation body COFRAC. Impartial inspections are guaranteed by an ISO 17020 accreditation (accreditation reference 3-0826, scope available on www.cofrac.fr).

GERMANY

Eurofins GeneScan

Eurofins GeneScan looks back at over 25 years of history in the field of bio-molecular methods.

Eurofins GeneScan is recognised worldwide for its expertise and leading performance in the field of biomolecular testing for Genetically Modified Organisms (GMOs) and animal species identification in food, feed and agricultural raw materials.

The company offers the broadest portfolio of GMO testing services, testing kits and GMO related consulting worldwide. Eurofins GeneScan has a global presence with its network of partners in the USA, Brazil and China as well as with further partner laboratories in

Australia and South Africa. Therefore, Eurofins GeneScan is able to cover the whole agricultural value chain and to offer its high quality portfolio wherever it is most efficient for clients.

Services:

• GMO Testing Eurofins GeneScan is the Competence Centre for GMO analyses within the Eurofins Group. GMO testing services cover the qualitative screening, the qualitative identification, and the quantification of all relevant GM events. Specific analytical strategies are developed according to the individual needs of clients.
• Species Identification Eurofins GeneScan offers identification of plant and animal species and special customer requirements (e.g. testing for Halal compliance) are included in the scope of these services.
• Residual DNA Testing Residual DNA testing services are offered for the food, feed and pharma industries.
• Kits and Products Eurofins GeneScan test kits (PCR and ELISA) are the result of extensive experience in its own testing laboratories.
• Method Development Contract projects for the development of analytical methods and custom-designed testing – also under GxP requirements – e.g.: method development in the context of EU regulatory approval of GMOs, molecular pathogen detection or residual DNA analysis.

Accreditations:

• ISO17025 certification
• ISO 9001 accreditation
• Approval for GLP/GMP compliant analysis
• QS-Approval

The high standards of the testing methods and test kits are readily confirmed internally and externally via participation in national and international ring trials and proficiency tests (e.g. USDA-GIPSA, JRC etc.).

Additionally, Eurofins GeneScan is audited regularly by major clients - many of them worldwide leaders in their markets. Last but not least, Eurofins GeneScan has been and continues to be an active member of several worldwide regulatory and standardisation committees.

Eurofins BioTesting Services Nord

In autumn of 2013 Eurofins BioTesting Services Nord started to operate in Hamburg. The specialisation of the laboratory lies in microbiological analyses of food and feed, raw materials, final products, ingredients, food contact materials (FCS), packaging materials as well as commodities.

Services:
Testing for the complete range of microorganisms relevant to the food industry:
• Pathogenic organisms (e.g., Salmonella spp, Listeria spp, Staph. Aureus, Campylobacter spp, Vibrio spp)
• Spoilage organisms (e.g., Yeast and Mould, Bacillus spp, Clostridium spp, Pseudomonas

spp)
• Technologically relevant microorganisms (e.g., Lactobacilli)
• Microscopic analysis
• Hygienic checks

The laboratory is able to analyse all kinds of food with the following methods:
• Classic cultural methods (ISO, §64 LFGB, ICUMSA)
• PCR
• Petrifilm
• Inhibitory substance
• Strain identification

Accreditations:
Eurofins BioTesting Service Nord is accredited according to DIN EN ISO/EC 17025 and is designed for a high sample performance with short analytical times due to advanced equipment and a "lean management" methodology.

Eurofins Analytik

Eurofins Analytik carries out chemical, sensory and molecular biological analyses and provides consultancy and certification on foodstuffs.

Being the competence centre for allergen, irradiation and sensory testing, Eurofins Analytik assists producers and retailers in questions regarding foodstuffs and pet food.

Services:
Our services in general food analyses and consultancy contain
• Olive oil analysis
• Consultancy for marketability and storage durability
• Testing and consultancy in respect of quality control systems/ HACCP/ plant inspections / hygienic checks, audits according to ISO 22000
• Specialist in the field of food law, labelling; Eurofins Analytik has a network for international labelling checks covering most EU countries, USA, Canada, China etc.
• Nutritional testing
• Molecular biology testing (determination of animal species and allergens)
• Irradiation testing (analysis for the application of ionising radiation on food and biopharmaceutical products); all 5 EU-methods are offered
• Sensory analysis of food and food contact materials with a wide scope of different methods; highly experienced and trained experts, including panels for various matrices as well as product-specific seminars

Specialist analyses and consultancy for following industry sectors:
• Oil seeds; oils and fats of vegetable and animal origin, including the analysis of all relevant fat attending compounds and profiles; determination of adulteration, ageing, oxidisation;
• Olive oil
• Dried fruits
• Nuts
• Convenience products
• Cereals
• Coffee
• Sweets
• Retail
• Novel food, food supplements and health food
• Pet food

Eurofins Analytik also provides assistance to companies in the food business with respect to selecting and coordinating analyses for their special needs. This includes designing sampling and inspection plans as well as setting up testing schemes as a basis for the issue of a quality seal. In addition, Eurofins Analytik offers coordinated offers for sampling (also in the country of origin e.g. Turkey) and advice on individual products in the context of quality management.

Eurofins Analytik serves importers with rapid analyses of parameters needed for trade and import. The laboratory also has appointed and sworn chemists at its disposal to issue Free Sales and Health Certificates.

Eurofins Analytik is located in close proximity to major import-terminals in Northern Germany.

Accreditations:
Eurofins Analytik is accredited according to DIN EN ISO/IEC 17025:2018 and engages authorised experts for double and cross checks according to § 43 LFGB (German Food and Feed Code).

Eurofins Dr. Specht Express

Eurofins Dr. Specht Express analyses pesticides in fruits, vegetables, cereals, fruit juices / concentrates, fresh leaves and flowers.

Services:
Multi method screenings: PSP8A, PSP8B, PSP8C, PSP8F, PSP8G und PSP8K

Single methods: Ethephon, QAC'S, Perchlorate, Chlorate, Fosetyl, Phosphorous acid, Chlormequat, Mepiquat

Accreditations:

• DIN EN ISO/EC 17025.

Eurofins WEJ Contaminants

With more than 200 employees, Eurofins WEJ Contaminants is the Competence Centre of the Eurofins Group for the analysis of organic and inorganic contaminants, mycotoxins & plant toxins and veterinary drug residues in food and feed.

Eurofins WEJ Contaminants is a well-equipped and highly automated laboratory using state-of-the-art techniques. It is a member of many national and international associations and working groups such as DIN, § 64 Working Groups, CEN, AOAC Working Groups and participates in different national and international EU projects (AveQ, Biofocos, Biocop, MoniQA, European certification campaigns, Mycotoxin Awareness Network, KOMBISPEC)

Services:
Eurofins WEJ Contaminants hosts the following units:

1) Mycotoxin & Plant Toxins Competence Centre:

Analysis of all regulated mycotoxins and as well as a broad spectrum of further relevant mycotoxins and plant toxins such as Alternaria toxins, ergot alkaloids, citrinin, moniliformin, sterigmatocystin, enniatins, beauvericin, pyrrolizidine alkaloids, tropane alkaloids and quinolizidine alkaloids.

2) Veterinary Drug Residues Competence Centre:

Analysis of more than 250 different veterinary drugs, such as nitrofurans, CAP, macrolides, lactames, sulfonamides, tetracyclines, quinolones, coccidiostats, benzimidazoles, nitroimidazoles, phenylbutazone, fipronil, hormones and tranquilizers.

3) Organic Contaminants Competence Centre:

Portfolio of more than 100 different parameters, such as PAHs, BTEX, furans and methyl furans, acrylamide, 3-MCPD and its esters, glycidylesters, nicotine, plasticisers, bisphenol A, sudan and other illegal dyes, residual solvents, nitrosamines, low volatile chlorinated hydrocarbons and mineral oil hydrocarbons (MOSH/POSH/MOAH)

4) Inorganic Contaminants Production Centre:

Analysis of a vast number of (heavy) metals and trace elements with lead, cadmium, mercury and (inorganic) arsenic amongst them, metal speciation and analysis of radionuclides (caesium 134 and 137 and iodine 131).

State-of-the-art laboratory equipment:

Gas chromatography with mass spectrometry (GC-MS, GC-MS/MS), flame ionisation detection (GC-FID) high performance liquid chromatography with fluorescence detection (HPLC-FLD) or mass spectrometric detection (HPLC-MS/MS), high-

resolution LC-MS, online-LC-GC-FID, online-LC-GC-MS, atomic absorption spectrometry (AAS), inductive coupled plasma with mass spectrometric detection or optical emission spectroscopy ICP-MS, ICP-MS/MS, ICP-OES), LC-ICP-MS, gamma-spectrometry , sample preparation robot capable of preparing up to 400 samples per day.

Accreditations:

• DIN EN ISO/IEC 17025:2018
• Authorised experts for double and cross checks according to § 43 LFGB (German Food and Feed Code)
• Q+S, GMP+ and BNN certified

Eurofins Global Control

Eurofins Global Control is an international inspection company offering supply chain control solutions to achieve product quality and safety from the origin to the consumer. This applies to food, pet food, chemicals and non-food products.

Major control systems have been established in actual more than 100 countries worldwide. Inter alia Argentina, Australia, Bolivia, Brazil, Bulgaria, Cambodia, Chile, China, Costa Rica, Germany, Dominican Republic, Ecuador, Egypt, , Greece, Guatemala, India, Indonesia, Israel, Italy, Japan, Kenya, Colombia, Mexico, Myanmar, Netherlands, Pakistan, Paraguay, Peru, Philippines, Poland, Romania, Sweden, Switzerland, Spain, Sri Lanka, South Africa, South Korea, Thailand, Taiwan, Turkey, UAE, Uganda, Ukraine, Uruguay, United States and Vietnam.

On request, tailor-made solutions can be provided in most countries worldwide. For identity control of the goods, innovative DNA-based methods are applied from start to finish.

Services:
Pre-shipment inspections (PSI) and sampling, loading supervision, audits at outlet, factory and farm level and arrangement of analytical services in Eurofins laboratories worldwide.

Eurofins Global Control is listed by SFDA (Saudi Food and Drug Administration) for PSI for Exports to KSA.

Auditing services are offered in Central Europe, China, Pakistan, India, Sri Lanka, Philippines and Ecuador. More countries on request. These cover internal and second party audits within the criteria of international standards for quality and food safety management, Good Agricultural Practice and Organic Agriculture (ISO/FSSC 22000, IFS, BRC, SQF, GlobalGAP). Additional there are components regarding social standard (like SEDEX) or food defense available.

Audits are performed by trained personnel, e.g. IRCA certified lead auditors for ISO/FSSC 22000.

Accreditations:
Eurofins Global Control is certified according to ISO 9001/2015.

Eurofins SOFIA

SOFIA is a well-equipped laboratory using state-of-the-art technology.

The laboratory focuses on residue analysis, and the chemical analysis of organic contaminants, especially pesticides, mycotoxins, industrial chemicals, food born contaminants etc. SOFIA mainly analyses food, feed, water and soil but also many other matrices.

Our highly educated staff has a lot of experience in dealing with special analytical questions. SOFIA is able to develop the analysis of new substances very quickly.

Accreditations:
DIN EN ISO/IEC 17025:2005

Eurofins CLF Specialised Nutrition Testing Services

Eurofins CLF is a globally active laboratory located in the heart of Germany.

The analysis of macro and micronutrients such as vitamins, amino acids, probiotics and trace elements is just as much part of the portfolio as the specific analysis for permissible limits in the

inorganic and organic trace analyses of residues and contaminants. Microbiological methods for the complete range of food-related bacteria, including special baby relevant microbes, complete the package.

Eurofins CLF analyses parameters in raw materials, intermediates and final products. Eurofins CLF is a specialist for complex matrices like baby foods, pet foods, dietary supplements as well as special medical nutrition, all of which require special care and expertise as well as experience in analysis.

Services:

• All-in-one analytical partner for nutrients, residues & contaminants and microbiology
• Special nutritional testing in complex food and pet food matrices
• Sensoric Panel
• Special lab environment where material with low level contamination is handled separately
• Compliance with baby food regulations regarding low limits for residues and contaminants (low LOQ-level)
• Tailor made consultancy services to improve food quality, safety and analytical performance

Accreditations:

• DIN EN ISO/IEC 17025:2005

Eurofins Inlab

Eurofins INLAB GmbH was founded in 1992 as a food microbiology laboratory and is specialized in microbiological and molecular biological analyses.

The laboratory and the team around scientific director Dr. H.G. Leusch and lab manger Dr. Jens Kroll, are recognised for their proactive role in the development and implementation of new methods and techniques, as well as for their collaboration on national boards for microbiology.

Services:
Microbiological and molecularbiological testing, expert advice, sample taking and further services in the following areas and segments:
• Food (final, intermediate products and raw materials), feedstuff, products of daily use including release analyses by rapid testing
• Specialist in microbiology testing (cultural, Petrifilm ®, Tempo ®, PCR, species identification) and extremely rush routine release analyses for food (or feed) (e.g. routine Salmonella PCR within 20 h) limited just to the minimum technically required time
• Drinks and dispensing equipment
• Sanitary products, cosmetics and commercially available drugs
• Drinking and mineral water, bath water etc.
• Hygiene of companies
• Challenge tests
• Food relevant viruses (HAV, HEV, Norovirus etc.)
• Training courses, inspections, hygiene advice

The laboratory is located in the western region of Germany and can provide collection services in a radius of 100 km (65 miles).

Accreditations:

• DIN/EN ISO/IEC 17025:2018 (DAkkS for second governmental samples)
• § 43 IfSG (permission for working with pathogens according to NRW-governmental permission)
• Drinking water laboratory
• Admitted laboratory of the “compost quality control association” for analysis of salmonella

Eurofins Institut Dr. Rothe

For more than 60 years, food and non-food products have been analyzed accompanied with excellent customer service. The laboratory offers a broad spectrum of analyses and the corresponding judgement of food, cosmetics and consumer goods (e.g. hygiene papers, detergents) for the retail business as well as for trading companies and for producers.

Services:
Food:
• General food analysis
• Analysis of nutritional values
• Specializing in the chemical analysis of seafood and fish products (e.g. TVB-N, histamine, indole, nematodes, water/protein quotient etc.)

Cosmetics:
• Analysis of ingredients such as active agents (e.g. organic and inorganic UV-filters, anti-dandruff agents, vitamins, deodorant agents)

Consumer goods:
• Hygiene Paper: Analysis of parameters which reflect the price-performance ratio (e.g. mass, thickness, water absorption, tensile strength)
• Analysis of organic residues and contaminants (e.g. formaldehyde, MCPD and DCP)
• Detergents: Analysis of ingredients such as active agents

Accreditations:
Institut Dr. Rothe is accredited according to DIN EN ISO/EC 17025

Eurofins Genomics

Eurofins Genomics' expertise in DNA analysis of food and food products is regularly requested from clients all over the world.

Eurofins Genomics is internationally renowned for the quality and reliability of its services. Nearly all test methods are ISO 17025:2005 accredited.

Eurofins Genomics uniquely combines long-term expertise in food testing, veterinary testing and forensic/ genetics making Eurofins Genomics an internationally leading European laboratory in "Food Forensics".

The site comprises one of Europe's largest providers for industrial scale production of oligonucleotides, gene synthesis, DNA sequencing, Applied Genetics, genotyping, Pharmacogenomics and DNA Forensics. We are further closely connected with other Eurofins Genomics sites in Europe, USA, India and Asia.

For food authenticity testing and other food testing applications, we work tightly with experts from other Eurofins Food testing laboratories to deliver optimal service packages and cost-efficient solutions. Our approach to our clients is highly service oriented.

Services:
Food authenticity testing
• Species and breed/variety identification
• Compositional analysis including quantification
• Residual DNA Testing
• All sample materials from raw material to all processing stages up to instant meals or health products
• All species (animals, plants, microorganisms, human)
• (Semi-quantitative) Meat testing for products such as sausages, minced meat including quantification
• Fish and seafood testing
• Authenticity testing of Basmati and Thai rice with high quantitative accuracy
• Authenticity testing of pine nuts
• Assay setup and validation in all stages, from marker discovery up to ISO 17025
• Establishment of new methods as a contracted and collaborative laboratory
• Consultancy
• Court expert witness service from highly experienced scientists

Accreditations:

• ISO 17025
• ISO 9001
• The laboratory is regularly audited by clients, including the biopharmaceutical industry and the food & feed industry
• Regular and long-term participation in numerous ring trials

Eurofins GfA Lab Service

With over 30 years of experience, Eurofins GfA Lab Service is the world's leading dioxin laboratory.

The main focus of the analytical portfolio is the analysis of persistent organic contaminants (e.g., dioxins, PCB, flame retardants, PFCs, Stockholm POPs) on ultra-trace levels. Representative for a number of parameters, polychlorinated dibenzodioxins and furans (PCDD/Fs), polychlorinated biphenyls (PCBs), brominated flame retardants, per- and polyfluorinated alkyl substances (PFAS) as well as organotin compounds are examined in almost every matrix as e.g. food/feed, biota, environmental samples (water, waste, soil etc.), emission and ambient air samples and even human matrices (blood, serum, tissue etc.)

Eurofins GfA Lab Service GmbH is one of the few worldwide laboratories that is able to analyse all 27 POP substances banned or regulated in the Stockholm Convention in its own laboratory. Eurofins GfA Lab Service GmbH is also able to analyse all 209 PCBs incl. dioxin-like PCBs (DL-PCBs) and non dioxin-like PCBs (NDL-PCBs, also called ICES6-PCBs), as required by the California Proposition 65. The scientists of this laboratory are sought-after experts in national and international standardisation bodies or other working groups. Numerous publications in the field of POP-analyses have been written or co-authored by employees of Eurofins GfA Lab Service GmbH. This is one reason why Eurofins GfA Lab Service GmbH is the POPs Competence Centre of the international Eurofins Group.

Eurofins GfA Lab Service GmbH is accredited according to the international ISO/IEC 17025:2005 standard. The overall capacity of dioxin and POP measurements of the Eurofins GfA Lab Service GmbH has been raised to > 45,000 samples per year using

high-end technical equipment (8 HRGC/HRMS systems (high resolution gas chromatography / high resolution mass spectrometers), 14 GC-MS/MS systems (gas chromatography / tandem mass spectrometers), 3 LC-MS/MS systems (liquid chromatography / tandem mass spectrometers), several GC-MS systems as well as the novel API-GC-MS/MS-technique. The highly experienced laboratory staff analyses all kinds of matrices both according to European guidelines and other regulations (US EPA etc.).

This state-of-the-art-laboratory delivers rapid turn-around-times with the highest level of service and most advanced technologies (e.g. automated clean-up-systems) in line with the EU-Regulations No. 2017/644 and 152/2009 for analysis of dioxins and PCBs in food and feed samples. 48h-analytical services for dioxins and PCBs are possible for selected food and feed matrices.

In addition to the standardised services offered in our high performance laboratory, Eurofins GfA Lab Service has many years of experience and the scientific and technical know-how for providing special services beyond the established procedures. Custom-tailored analysis, special project support, method development, method validation as well as data interpretation and publication on scientific platforms and in journals will be of special value for processing of scientific projects of governmental authorities and non-governmental organisations.

Services:
Food & Feed Testing **Services:**

• Dioxins and dioxinlike compounds
  o Fast processing times
  o In line with Regulation (EU) No. 2017/644 (food) and No. 2017/771 (feed)
• POPs such as brominated flame retardants (BFR), organochlorine pesticides, PFAS, organotin compounds, PAHs
  o Sensitive analysis, low limits of quantification
  o Competitive processing times

Environmental Testing
Services:

• Water, soil, sediment, plants, waste and sewage sludge
• Air samples (emissions/ immissions, indoor air)
• Sensitive analysis, low limits of quantification
• Competitive processing times

Human Biomonitoring Service:
• Blood / serum, breast milk, adipose tissue
• Investigation on regional background concentrations
• Assessing the impact of harmful substances on humans
  o Assessing the effects of eating habits i.e. the impact of eating harmful substances on the human body
  o Special studies on humans who are extremely exposed to hazardous substances.

Special Project-based
Services:

• In addition to the standardised services offered in our high-performance laboratory, Eurofins GfA Lab Service has many years of experience and the scientific and technical know-how for providing special services beyond the established procedures.

Custom-tailored analysis, special project support, method development, method validation as well as data interpretation and publication on scientific platforms and in journals will be of special value for processing of scientific projects of governmental authorities and non-governmental organisations.

Provision of sampling kits:
• On top of carrying out different analyses, Eurofins GfA Lab Service GmbH also provides sampling material, especially for air-monitoring purposes such as cartridges filled XAD resin, pre-spiked or non-spiked, following the requirements of EN 1948 (part 1 to 3 (dioxins) or part 4 (PCBs)) or CEN/TS 1948-5.

Data Access Options beyond Electronic Analytical Reports:
• On-line Data Access: 24 hours a day, seven days a week through Eurofins' secure internet access, EOL, which offers clients immediate access to final verified analytical results as analyses are completed and verified in the lab.
• Electronic Data Deliverables: Standard and custom formats available.

Accreditations:

• DIN EN ISO/IEC 17025:2018, D-PL-14629-01-00
• Officially acknowledged measuring site according to §29b Federal Emission Control Act (BImSchG), group I-Nr.1 and group IV for specific analysis of substances requiring special complexity for sampling or analysis.
• Examination laboratory for soil and sewage sludge according to § 3 Sewage Sludge Ordinance (AbfKlärV)
• Officially acknowledged by the French environmental ministry for the measurement of PCDD/F in emission samples
• Analysis in compliance with EU-guidelines, international recognised standards, e.g. EN 1948, EPA and other accredited methods • GOED member (Global Organization for EPA and DHA Omega-3)
• IFFO member (International Fishmeal and Fish Oil Organisation)
• Expert for official counter samples according to §43 LFGB, chemical-physical and microbiological examination of food
• QS approval as laboratory in the field of feed monitoring for

the parameters, dioxins, PCBs, heavy metals, aflatoxins, DON, ZEA, PAH, animal ingredients, pesticides, salmonellae, ochratoxins and methanol.
• GMP+ certification

Eurofins Institute Dr. Appelt Hilter

Eurofins Institut Dr. Appelt Hilter GmbH carries out chemical, physical, sensorial and microbiological analyses.

Furthermore Eurofins Institut Dr. Appelt Hilter provides consultancy, label and declaration checks, marketability checks and certification on foodstuffs.

Services:
Eurofins Institut Dr. Appelt Hilter assists producers, merchants, importers and exporters in questions regarding foodstuffs and animal fodder:
• General food analyses
• Hygiene testing
• Consultancy for marketability and storage durability
• Specialist analyses & consultancy for meat and meat products
• Specialist analyses & consultancy for convenience products
• Specialist analyses & consultancy for sweets and chocolates
• Specialist analyses & consultancy for ice-cream and frozen products
• Specialist analyses & consultancy for oils and fats and products derived from oils and fats (margarine) including the analysis of all relevant fat attending compounds and profiles; determination of adulteration, ageing, oxidization and microbial contamination
• Specialist in microbiology testing (cultural, Petrifilm, PCR, species identification) and extremely rush routine release analyses for food (or feed) (e.g. routine Salmonella PCR within 20 h) limited just to the minimum technically required time
• Specialist in the field of food law, labelling and questions concerning lab's duty of informing authorities.

Eurofins Institut Dr. Appelt Hilter also provides assistance to companies in the food business with respect to selecting and coordinating analyses for their special needs. This includes designing sampling and inspection plans as well as setting up testing schemes as a basis for marketability certification or retailer's needs.

The company offers services from its authorised experts for double and cross checks and offers the special competence to provide certificates and judgements from its appointed and sworn chemist.

The laboratory is located in the north-west region of Germany and can provide collection services in a radius of 100 km (65 miles).

Accreditations:

• DIN EN ISO/IEC 17025:2005
• Permission to work with pathogens according to § 44 IfSG
• Authorised experts for double and cross checks according to § 43 LFGB (German Food and Feed Code)
• Appointed and sworn chemist

Eurofins Food & Feed Testing Leipzig

Eurofins Food & Feed Testing Leipzig provides analytical services through the whole supply chain. It is a testing laboratory for food, finished products, intermediates and raw products, drinking water and including release and rush analyses.

Services:
The laboratory offers a broad range of services to the manufacturing industry and food retailers including testing, expertise and sampling in the following fields:
• Chemical and microbiological testing of food
• Residue and contaminant analyses
• Chemical-physical analyses
• Molecular biological testing (Allergens, ELISA, PCR)
• Sensory testing
• Check on industrial hygiene

Our focus is offering integrated concepts for sampling, auditing, analytics and evaluation, consultation and training.

Eurofins Food & Feed Testing Leipzig has experience in labelling checks, site specific organization of seminars, audits and in-house trainings.

Accreditations:

• DIN EN ISO 17025
• Official expert for control tests according to §43 LFGB (German Food and Feed Code),
• QS acknowledge laboratories for food monitoring, investigation body for the BNN-Monitoring for the food groups

B 1 to B2
• Investigation body for drinking water according to §15 chapter 4 TrinkwV 2001 for microbiological, chemical (on-site-parameters)
• Sensory testing including sampling, investigation body according to §19 chapter 2 TrinkwV 2001
• Permission to work with pathogens according to § 44 InfektionsschutzG.

Eurofins Laborservices

Eurofins Laborservices conducts a broad range of bacteriological analyses of food for retailers and food producers in Germany. In addition, Eurofins Laborservices provides all relevant analytical services through the whole supply chain of food, finished products, intermediates and raw materials.

Services:

• Competence Centre for meat and meat-based products
• Competence Centre for fruit juices, non-alcoholic beverages and jam
• Competence Centre for dairy products
• Microbiology

Eurofins BioPharma Product Testing Munich

Eurofins BioPharma Product Testing Munich GmbH is an internationally operating testing laboratory offering comprehensive capabilities in safety and activity testing. With more than 30 years of experience, our team of scientists offers a broad scope of biological studies, which meet the international regulatory requirements of safety testing for feed, novel food, food additives, food enzymes and flavourings.

The identification of hazardous ingredients is mandatory for consumer protection. Toxicological testing is used to determine, whether food or feed products would pose any kind of risk to the health of consumers.

Eurofins BioPharma Product Testing Munich provides the full service to assess the biological and toxicological data under GLP-compliance according to the current European regulations (EFSA) and further international relevant guidelines (Redbook 2000).

Safety data for food/feed need to be generated by a basic set of toxicological studies. In addition further studies might be required on a case by case basis.

Services:

• Genetic toxicity e.g. AMES Test (OECD 471) and Micronucleus Study (OECD 487)
• Sub chronic toxicity e.g. 90-Day Oral Toxicity Study (OECD 408) [under consideration of specific adaptations laid down in more recent update of Guideline 407 (as required in EFSA Journal 2012; 10(7):2760: Guidance for submission for food additive evaluations)]
• Chronic toxicity / Carcinogenicity
• Reproductive and developmental toxicity (DART)
• Metabolism / Toxicokinetics

Besides the standard testing battery, we offer individual advice concerning your specific project with regard to scientific and regulatory requirements. These customized test designs include neurotoxicity and immunotoxicity testing to address specific safety concerns

Accreditations:

• Good Laboratory Practice (GLP)
• Good Manufacturing Practice (GMP)
• DIN EN ISO 17025
• FDA audited
• Listed by the World Health Organization (WHO)

Eurofins Food Integrity Control Services

In Summer 2017 Eurofins Food Integrity Control Services (EFICS) started to operate in Ritterhude, near Bremen.

As the competence center for honey testing within the Eurofins Group EFICS offers a complete range of state-of-the-art techniques for authenticity testing, the determination of veterinary drugs, sensory testing, microscopic determination of the botanical and geographical origin of honey as well as quality parameters necessary for the international market.

Our experienced team of recognized experts actively participates in national and international working groups as DIN and gives guidance to the industry (e.g., German and European honey associations). EFICS offers an extensive and in line with demand service portfolio for the analysis, assessment and quality assurance of honey.

Services:

• Enzymatic, photometric, chromatographic, mass-spectrometry and high-resolution mass spectrometry methods
• Stable isotope analysis (EA/LC-IRMS)
• Nuclear Magnetic Resonance Spectroscopy (NMR)
• Veterinary drugs (Multi methods by LC-HRMS)
• Botanical and geographical origin (Microscopy)
• Visual and organoleptic evaluation
• Compositional analysis according to Honey Directive 2001/110/EC
• Pyrrolizidine alkaloids
• Pesticides screening
• Heavy metals
• Genetically modified organisms (GMO)

Accreditations:
Eurofins Food Integrity Control Services is accredited according to DIN EN ISO/IEC 17025:2005

GREECE

Eurofins Athens Analysis Laboratories

Eurofins Athens Analysis Laboratories is a private independent laboratory, which offers reliable and impartial testing services of food, water, cosmetics, medicines, dietary supplements and environmental samples, contributing to the safety of the products and the protection of public health.

The Athens Analysis Laboratories was established in 1988 as a new step in the long family tradition of the founders, who served in the field of Public Health and Hygiene since 1951.

Our company has become part of the Eurofins Scientific Group as of 15.06.2022

Services:
Our company offers complete services that include accredited microbiological, chemical, and molecular analyses and studies according to international standards, the national and EU legislation.

The following list of tested materials (products) and sampling services is only indicative.

The complete list of our accredited testing is found in the Scope of Accreditation (Certificate No. 102, www.esyd.gr).
• Water for human consumption
• Pool water
• Surface water
• Drilling water
• Seawater
• Waste and wastewater
• Water, hemodialysis fluid and ultra-pure hemodialysis fluid for hemodialysis and related therapies
• Foods of plant origin
• Infant and Baby foods
• Food of animal origin
• Animal Feed Products
• Vegetable oils and fats
• Feed and environmental samples from the primary production
• Cosmetics
• Pharmaceuticals (Sterile and non-sterile pharmaceutical products of human and animal use, non-sterile solid, semisolid and liquid active substances)
• Dietary supplements
• Sampling of water, ground and waste.
• Samples from surfaces using contact plates and swabs
• Environmental sampling-waste water - sludge / sediments

Accreditations:
Eurofins Athens Analysis laboratories is accredited by the Hellenic Accreditation System according to the standard EN ISO/IEC 17025, as testing laboratory for microbiological, chemical, biological, physical and sensory testing of food and water and as a sampling laboratory for water and surfaces (Accreditation Certificate No. 102, www.esyd.gr).

Certifications

GMP

The company is licensed to conduct testing in

pharmaceuticals intended for human and animal use, in cosmetics and dietary supplements. The license and the Good Manufacturing Practice (GMP) certificate is issued by the National Organization for Medicines (www.eof.gr).

GLP

Our laboratory unit is organized and operates according to the requirements and principles of Good Laboratory Practice (GLP) and, since 28.02.2022, it is the first and sole laboratory unit in Greece that holds a GLP compliance certificate, issued by the General Chemical State Laboratory of Greece, and it is licensed to conduct analyses for determination of residuals and contaminants.

INDIA

Eurofins Analytical Services India

Amongst other activities, Eurofins in India provides services for sampling, inspection and food analysis

Services:
The initial focus areas for our lab are the following types of food analysis:
• Microbiology
• Heavy metals
• Aflatoxins
• Vitamins
• Proximate analysis
• DNA authenticity
• Inspection Service

Accreditations:

• ISO/IEC 17025: 2005
• Accredited laboratory for Chemical and Biological sections
• Accredited by NABL (National Accreditation Board for Testing and Calibration Laboratories) Department of Science and Technology, India.
• Accredited by FSSAI (Food Safety and Standards Authority of India)

IRELAND

Eurofins Food Testing Ireland

Eurofins Food Testing Ireland is a specialist microbiology laboratory offering a wide range of accredited tests in the food and environmental sectors.

The laboratory is fully accredited by INAB (299T) to ISO 17025 and also by the Irish Department of Agriculture.

From simple routine testing of samples through to extensive shelf life and new product development testing, Eurofins Food Ireland provides local and international expert analysis and advice as well as commitment to deliver the best service and turn-around-time of results.

Eurofins Food Ireland's main clients are food safety authorities, local authorities, food retailers, food processors and manufacturers, catering organisations and water treatment contractors.

Accreditations:
• ISO/IEC 17025: 2005 (Registration Number 299T)
• Tesco Laboratory Approval Scheme (TLA)
• Marks & Spencer PLC Independent Supplementary Audit.

ITALY

Eurofins Chemical Control

Eurofins Chemical Control carries out chemical, physico-chemical, microbiological and molecular biology analyses, research and consultancy on foodstuffs.

The laboratory is fully accredited by ACCREDIA in compliance with UNI CEI EN ISO/IEC 17025:2018 standard (laboratory no. 0490) and also by the Italian Ministry of Health, the Italian Ministry of University, Scientific and Technological Research and by the Japanese Ministry of Health.

Eurofins Chemical Control's main clients are food industries and retailers.

Founded in 1979, Eurofins Chemical Control has a highly qualified staff (about 70 people) and technologically innovative analytical equipment with about 4,000 m2 of well-organized laboratories.

Services:

• Nutritional aspects and micro constituents analyses (minerals, additives, characteristic molecules)
• Shelf life studies
• Chemical contaminants residue analyses (pesticides, mycotoxins, heavy metals, veterinary drugs residues, acrylamide, furan and methylfuran, glycoalkaloids, hydrocyanic acid)
• Microbiological testing and detection of extraneous materials (Filth test), merchandise quality tests
• ELISA determinations for allergens
• Molecular biology testing for allergens
• Setting up of new analytical methods (particular requirements, food alerts) and innovation of existing methods with validation of different food matrices
• Setting up of new analytical indexes for an unbiased evaluation of technological and process parameters
• Technological consulting
• Planning and management of quality control plans
• Interpretation of analytical results with reference to legislation, bibliography, technological-process parameters
• Service of rush analysis by request

Accreditations:

Eurofins Pivetti

Eurofins Pivetti S.r.l. has been operating in the Parmigiano Reggiano, Grana Padano and Trentin Grana sector since 1968.

It performs chemical and microbiological analyses of milk and its derivatives, providing technological assistance to dairies at all production phases and to the finished product, up to the sale of cheese. It offers food, zoo-technical and hygienic sanitary advice and assistance to farmers, aimed at ensuring milk quality.

Our staff consists of 13 technicians, involved at various levels in milk analysis for more than 700 companies producing milk for Parmesan cheese. They follow Parmesan cheese production in 40 diaries, for a production of about 15,000,000 kg of cheese per year.

The lab became part of the Eurofins group in December 2012, and it has improved its microbiological laboratory, which now is fully accredited by ACCREDIA in compliance with UNI CEI EN ISO/IEC 17025:2005 standard (laboratory no. 0608)

Services:
Our analytical services for milk and its derivatives include:
• Microbiology: including pathogens, indicator & spoilage organisms
• Chemical: pH testing, cell counts, antibiotics research
• VERIX: x-ray machine service for monitoring cheese and commercial selections
• Livestock advice and cheese

production as well as marketing consulting

Accreditations:

• UNI CEI EN ISO/IEC 17205:2005 (laboratory no. 0608)

KOREA

Eurofins Korea Analytic Service

Eurofins Korea Analytic Service is a laboratory that has been providing analytical services since 2000, performing chemical, microbiological, organic, inorganic and toxicological analyzes in environmental, food, cosmetics and consumer products.

Services:
Environmental Testing Services (water, soil, waste and atmospheric emissions) :
• Dioxins and dioxin-like compounds, PCBs and related persistent organic pollutants (POPs)

Food and Livestock product Testing Services:
• Pesticide analyses for organic foods
• Pesticide analyses based on QUECHERS GC-MS & LC-MS/MS
• Nutritional fact analyses
• Microbiological analyses
• Heavy metals analyses

Cosmetics Testing Services:
• Chemical Testing
• Microbiology
• Safety Testing

Human Biomonitoring Service:
• Blood / serum, breast milk, adipose tissue
• Investigation on regional background concentrations
• Assessing the impact of harmful substances on humans

Accreditations:
The laboratory is accredited by KOLAS, the Korea accreditation organization, in accordance with ISO 17025.
• Ministry of Food and Drug Safety: Food, Livestock Products, Cosmetics
• National Institute of Environmental Research: POPs Sampling & Analysis, Waste Analysis(General, PCBs), Air pollutant
• National Agricultural Products Quality Management Service: Safety Inspections

MALAYSIA

Eurofins Food Testing Penang

Our well-trained team and laboratory setup ensures proper handling, preservation (if required) and storage of your samples to avoid degradation and cross-contamination. Due to the complexity of food sample matrices, food analyses are performed by food chemist and microbiologist for they have detailed understanding of the samples nature and thus able to obtain accurate results of your samples whether they are fresh/raw, cooked, processed, canned or preserved.

Routinely we receive food and drugs samples which are inclusive of solid food, semi-solid food, beverages and drinks, food supplements, traditional herbs, cosmetics and pharmaceutical products etc. Some of the commonly tested parameters are nutrition facts, heavy metals, preservatives, colourings, vitamins, antibiotics, fat, tests for the fulfilment of halal requirements, banned substances (melamine, saccharin, cyclamate etc), GMO (Genetically Modified Organism), microbiological testing etc.

NML is an authorized commercial laboratory by Ministry of Health Malaysia (MOH) for food testing and the issuance of health certificates. Building upon years of experience in food testing, our food consultants are able to advise you on analyses needed in accordance with most updated local requirements. In the case of food for export which overseas requirements are to be fulfilled, in the presence of respective documents from the country of interest (written in languages understandable by our team), our consultants are prepared to walk the extra mile to provide assistance and technical advice to you and your organisation.

NEW ZEALAND

Eurofins Auckland

Eurofins Auckland offers its customers a state-of-the-art laboratory which includes microbiology, chemistry and soil testing in a large, facility with a total laboratory surface of over 3,700m².

Its continuous investment underpins our commitment to support the food and dairy markets of New Zealand. The increase in laboratory size and the added analytical methods have enabled us to expand the laboratory's capabilities, focusing on a range of food and dairy matrices, including analyses for infant formula label claims for local and international markets.

Services:

• Dairy / Meat and Food microbiology
• Dairy / Meat and Food chemistry
• Stability testing
• Biopharmaceutical microbiology and chemistry testing
• Shellfish seawater testing
• Soil/Plant/Fertilizer testing
• Water testing
• Food Act Verification
• Dairy RMP Evaluation and Verification
• Engineering Evaluation and Verification
• Dairy Premises and Heat Treatment Evaluation
• Engineering Annual Heat Treatment Operational Checks & Tests
• Heat Treatment Training
• Non Regulatory Audits

POLAND

Eurofins Poland

Eurofins Polska Sp. Z o.o. is an independent and competent laboratory performing analyses of environmental samples, food and non-food products, and offering quality supervision and control services. We act in accordance with the PN-EN ISO/IEC 17025:2018-02 quality management system, which has been certified by Accreditation Certificate No. AB 1334 by the Polish Centre for Accreditation.

Eurofins Polska Sp. Z o.o. is approved by the Chief Veterinary Officer for the analyses of animal feed and by the State District Inspector of the Department of Sanitation for water sample collection and analysis.

Services:
Microbiological and physicochemical analyses are performed both in raw materials, semi-finished products, finished products, and environmental samples for the producers of dairy, fish, meat, fruit and vegetables, bakery and confectionery as well as in non-food products (household chemicals and cosmetics).

Analyses are performed in accordance with applicable methodological standards, and to individual customer specifications.

Marking and verification of labelling of food products, household chemicals and cosmetics is offered as well. Our experts assess the compliance of labelling with applicable laws and with the requirements of GDA labelling.

Audits of suppliers are conducted by experienced and highly qualified auditors that confirm compliance with the rules and standards by IFS, ISO 22000, HACCP, GHP and GMP.

Training topics are adapted to the needs and expectations of our customers. They concern areas related to hazards in the production process, legal regulations, food labelling, sensory analysis and many others. Trainings are given by experienced professionals from the field, acclaimed throughout the country

Eurofins Food Testing Barcelona

After acquiring in 2014 the first laboratories of the Group (Applus agrifood testing labs), the growth of Eurofins Análisis Alimentario Holding España S.L. has been exponential, being currently the reference laboratory of the food sector in Spain:
• 2015: acquisition Laboratorios Laia (North of Spain)
• 2016: acquisition SiCa AgriQ (South of Spain)
• 2017: acquisition LDG (Feed Testing, Norteast of Spain)
• 2018: acquisition BioAccali (Certification, Center of Spain)
• 2018: acquisition Mas Control 3 Canarias (Canary Islands)
• 2018: acquisition Ecosur (East of Spain)

With the recent acquisition of Ecosur agri-food testing labs, we have become number one in the country, focusing mainly in the food and agro market In the last 25 years, the food laboratory has turned into a leading supplier of food tests, with a high penetration in the industry sectors of Meat, Baby Food, Non-Alcoholic Drinks, Cereals and Pastries. The agri-food testing laboratories are also a local reference in agro-environmental testing, with specific competence in pesticides testing.

We operate 6 laboratory sites in Spain (Madrid, Barcelona, Almería, Murcia, Pamplona and Tenerife) with 2 further satellite facilities in Spain and Portugal.

Services:
General Food Chemistry
• Chemical and nutritional testing of food products for industry and the retail sector.
• Determination of additives, preserving agents, colourings etc.
• Determination of mycotoxins, detection of melamine and acrylamide.
• Determination of heavy metals (Pb, Cd, As,Hg).
• Determination of pesticides. Pesticide analysis with short turnaround time
• Vitamins (Group B, Liposolubles, vitamins C, A, E)
• Allergens (gluten, caseins etc)
• Hormones
• Antibiotics
• AIJN in juice analysis
• Dioxins

Microbiological analyses
• Microbiological analyses of all types of food products are performed for clients in the food

industry, retailers and caterers.
• Microbiological testing of food and water as well as sampling. (Legionella spp)
• Macroscopic analyses, metrology, determination of defects.
• Microbiological analyses of food (Plate count, PCR, ELFA, from Salmonella, Listeria, enterobacteriaceae)
• Specific food testing: GMO, vegetal & animal species identification.
• Animal health testing: microbiology, PCR for BSE and animal blood testing

Agro-Environmental Testing
• Soils & Plants
• Organic waste & Compost
• Residual pesticides
• Water (irrigation, drinking water, wastewater)

Audit & Inspection
• 3rd PartyAudits
• Hygiene Checks
• Expert Sampling
• HACCP Consulting

Product Certification Body
• Spanish Ham (Jamon Serrano)
• Iberian Product Regulations

Accreditations:
The laboratories are accredited by ENAC, the Spanish accreditation organisation:
UNE-EN ISO/IEC 17025: 2017
• QS-Gemüse-Kartoffein OBST GMBH.
• SGF International E.V SURE GLOBAL FAIR

SWITZERLAND

Eurofins Food Testing Switzerland

Eurofins Switzerland, founded in 2000, offers microbiological and chemical analyses of food, feed, as well as biopharmaceutical and environmental analyses. Important services are consulting and auditing-services for the food and feed industry, environment, cosmetics and the whole gastronomy segment.

Around 50 co-workers provide services in around 1000 m² lab-space. Labs are located in Schönenwerd. The laboratory has strong expertise in microbiological analyses (classical quantitative determination, detection and taxonomic characterization) for a wide range of microorganisms.

Furthermore, Eurofins Scientific AG has implemented analyses based on the technologies PCR and Maldi-TOF

Services:

- Microbiological and chemical analyses of food, feedstuffs, water (drinking water, waste water)
- Support in food-labelling and conformity checks according to Swiss and European law. Special expertise is the management of retailers' complex demands in the Swiss market.
- Consultancy and monitoring (food safety, restaurants, retailers, industrial production, biopharmaceutical industry etc.)

Accreditations:

• ISO 17025
• ISO 17020
• GMP+ B11

Eurofins Rotterdam BV

Eurofins location in Barendrecht (near to Rotterdam) former name Eurofins LabCo, offers fast contaminant and nutrient analyses in food, feed, oils, fats, nuts, seeds, herbs and spices tailored to the needs of companies in the Port of Rotterdam and Amsterdam.

In addition, all Eurofins analyses are offered since the Rotterdam lab is your portal to the Eurofins network. The laboratory located in Barendrecht specializes in analyses with a very short TAT (generally 4-48 hours).

We use state-of-the-art laboratory equipment with methods such as: GCMS/MS, GC-FID, GC-ECD, GC-NPD, HPLC-FLD, HPLC-UV and GFAAS

Services:

• Feed testing officially acknowledged by GAFTA (one of the four reference laboratories), VERNOF, CNGD, HAFU
• Edible oils and fats officially acknowledged by FOSFA and NOFOTA

They can also offer logistics services such as sample pick up and sampling according to EU or Codex Alimentarius

regulations.
• Moisture, crude protein, crude fat, starch, raw fibre, ash, ash in HCl, fatty acid composition
• Mycotoxins: e.g. Aflatoxin, Ochratoxin, Deoxynivalenol, Zearalenon, Fumonisin
• Fat content, mineral oil, impurities, ash, FFA, peroxide number, melting point, solid fat content, 3-MCPD, PAH, BAP,

PCB's, DPTG
• Organoleptic analyses as admixtures and damaged grain and seeds.

Accreditations:

• ISO17025
• GAFTA
• FOSFA
• NOFOTA
• VERNOF
• CNGD
• HAFU

TURKEY

Eurofins Istanbul Food Control Laboratories

The laboratory was initially established as Gözlem Food Control and Research Laboratories in 2002. It was acquired by Eurofins in 2017 and continues to its work as Eurofins Istanbul Food Control laboratories. It is a private laboratory authorized by the Ministry of Agriculture.

Eurofins Food Istanbul's main clients are food industries and retailers, Ministry of Agriculture, exporters, importers and catering organisations. Physical, chemical, instrumental, microbiological and molecular biological analyzes are carried out in the raw materials, auxiliaries, intermediates and end products for the food industry.

Many of the parameters specified in the Food Legislation or in the technical specifications of the companies can be analyzed. Analyses are performed in accordance with international standart methods. Expert opinion on the results obtained are provided.

Services:

• Microbiology: including pathogens, indicator & spoilage organisms,
• Nutritional fact analyses
• Physical & chemical analyses
• Vitamin analyses
• Heavy metals and minerals analyses
• Contaminants
• Mycotoxins;
• Food additives
• GMO qualitative analyses
• Some animal species
• Allergens
• Physical and chemical analyzes specific to the product

In addition to analysis services, Training, Process Validation and Consulting Services are also provided.

Accreditations:

• The laboratory is accredited by TURKAK, the Turkish accreditation organisation, in accordance with DIN EN ISO/EC 17025, under the reference AB-0529-T.
• Ministry of Agriculture and Forestry Turkey

Eurofins Food Testing Wolverhampton

Established in 2004, Eurofins Food Testing UK has a network of 10 sites across the UK offering testing and advisory services to customers throughout the food and feed supply chains; from primary producers, processors and manufacturers, to retailers, wholesalers and caterers.

Our laboratories hold UKAS accreditations and ensure the requirements of ISO 17025 are met on a daily basis to maintain the highest standard of quality. We comply with approval schemes from major retailers Tesco and M&S for our methodologies.

We offer a comprehensive range of state-of-the-art analytical techniques to support our customers' increasingly stringent quality and food safety standards.

Services:

• Microbiology: including pathogens, indicator & spoilage organisms, shelf-life studies and audit advice
• Full range of nutritional analysis for labelling
• Contaminants
• Allergens
• Inorganics

Accreditations:

• Eurofins Wolverhampton is accredited by UKAS under registration number 0342 for microbiology and chemistry. Accreditation is to ISO 17025
• Tesco Laboratory Approval (TLA) Scheme
• Marks & Spencer PLC Independent Supplementary Audit.

Eurofins Nutrition Analysis Center

Recognised as a Centre of Excellence for Nutrition, the Des Moines laboratory specialises in analysing feed, commodities, pet food, human food and dietary supplements for nutritional content.

Services:
Areas of nutrition expertise include:
• Complete proximate testing (including total dietary fibre)
• Vitamins using LC, LC-MS/MS
• Amino Acids, Mineral and inorganic analyses using Atomic Absorption and ICP technology
• Lipid and fatty acid analyses using mainly wet chemistry and GC methodologies
• Centre of Excellence for enzyme testing for amylase, protease and phytase.

Accreditations:
ISO 17025 accredited laboratory.

This laboratory is one of only about a dozen Official Referee laboratories for soybean meal and oil certified by the AOCS and NOPA. It is an USDA inspected laboratory.

Eurofins QTA

Now part of Eurofins, the Quality Trait Analysis (QTA) System utilizes both mid, and near infrared spectroscopy, to provide analyses of the broadest range of materials, components and properties.

The Eurofins QTA business handles all the technical development, configuration, management and monitoring behind the scenes, enabling accurate quality testing by non-technical personnel, and freeing you up to manage your business.

Services:

• Complete service for infrared method development and validation
• Hassle-free Implementation of infrared technology
• Implement Robust calibrations using patented Chingometrics
• Provide service to ensure the long term NIR/IR performance
• Centralized quality data management
• Remote method development, addition and modification
• 24/7 technical support for remote troubleshooting

Eurofins SF Analytical Laboratory

ESFA is the “lab to call” when you don’t know who to call. ESFA is the center for excellence for:
• Foreign material identification
• Off-Flavor, Off Odor and Flavor Scalping Analysis by GCMS
• Chemical Verification of Ingredients, Excipients to USP, FCC, NF guidance
• Special Investigations including Product Recall, Insurance or LEGAL projects
• Specialty wastewater analysiand testing of other unique matrices

Accreditations:

• ISO-17025 +cGMP Scope
• GMP/GLP, FDA Registered
• DEA Licensed
• Wisconsin DNR Certified
• USDA for Soil, Meat, Animal Tissue Receipt

Eurofins Genomics

Eurofins Genomics offers industrial scale production of DNA/RNA oligonucleotides, gene synthesis, DNA sequencing, Next Generation Sequencing, applied genomics, genotyping and gene expression.

We offer one of the fastest turnaround times for sequencing in the country, the lowest error rate in the industry for oligonucleotides, and our approach is highly service oriented.

Services:

• DNA / RNA Oligonucleotides with a variety of options, purifications and modifications available.
• DNA Sequencing in tubes, plates and kits.
• Gene Synthesis & Synthetic Biology
• Gene Fragments
• Next Generation Sequencing
• qPCR and MGB-eclipse probes
• Library Assays
• Applied Genetics: Genotyping, Gene Expression & Microarrays
• Species and breed/variety identification
• Residual DNA Testing
• All sample materials from raw material to all processing stages up to instant meals or health products
• All species (animals, plants, microorganisms, human)
• Meat, fish and seafood testing
• Authenticity testing of Basmati, Thai rice, and pine nuts with high quantitative accuracy
• Assay setup and validation in all stages, from marker discovery up to ISO 17025
• Establishment of new methods as a contracted and collaborative laboratory
• Consultancy

Accreditations:

• CLIA accredited
• CAP accredited
• ISO 9001:2008
• ISO 13485:2003
• FDA 3009882691 for the manufacture of ASRs (Analyte Specific Reagents) for use in IVD product

Eurofins Microbiology Inc. - Des Moines

Our state-of-the-art laboratories utilize the latest microbiology testing technologies that provide the robustness and sensitivity needed to rapidly quantify and detect pathogenic, spoilage, and probiotic microorganisms.

With substantial experience across all product categories, we deploy multiple advanced molecular methods for routine microbiology testing, including product screening and in-depth strain identification.

Our experts help customers resolve regulatory compliance

and persistent contamination issues. We validate process and environmental controls, and help develop food safety management programs (HACCP, GMP, SSOP, FSMA, and EMP).

Specializing in pet food, meat and ingredient testing, EML – Des Moines offers several platforms (BACGene, BAX, VIDAS, USP) for pathogen testing. Additionally, EML-Des Moines is the hub for USDA MLG 5C STEC confirmation testing.

Services:

• Pathogen Tests
• Process Control, Quality & Spoilage
• Strain Identification
• Environmental Monitoring Programs
• Shelf Life studies
• Special Projects

Accreditations:

• ISO 17025

Gold Standard Diagnostics Freiburg

Gold Standard Diagnostics Freiburg is specialised in the production of kits and their application for the food and feed testing industry.

Two decades of expertise in the development of molecular biology kits and their application in Eurofins laboratories on all continents have led to competitive products, which set standards worldwide.

Based on in depth knowledge of the current market situation and the requirements of the food and feed industry, Gold Standard Diagnostics Freiburg adapts its kit portfolio to meet the most recent market demands. Laboratories all over the world trust in the quality of these products which help them to fulfill their customers' demands.

Services:

• GMO testing kits: screening, identification, quantification with real-time PCR multiplex technology
• Plant pathogen detection kits
• Plant species identification kits: comprehensive screening and specific detection of defined plant species
• Animal species screening and identification kits: authenticity testing for most domestic animal species as well as taxonomic groups of animals
• Pathogen testing kits: fast and reliable detection of foodborne and waterborne pathogens
• Virus detection kits: complete workflow covering all steps for the specific detection of the most important food-related viruses • DNA extraction kits: kits optimised for different food and feed matrices
• Application support on-site
• Customer trainings and webinars

Accreditations:

• ISO 9001:2015 certification
• AFNOR certified kits
• AOAC certified kits
• Gold Standard Diagnostics Freiburg methods are found in national and international standards

ITALY

Gold Standard Diagnostics Trieste

Gold Standard Diagnostics Trieste develops and produces immunoassay kits for the detection of chemical contaminants in food and feed products.

With more than 20 years' experience in the food diagnostics field and thanks to its internal R&D department, ISO 9001 accredited since 2001, Gold Standard Diagnostics Trieste can provide any user with the most specific diagnostic solution as ELISA kits, lateral flow tests and immunoaffinity columns.

Services:

• Quantitative mycotoxins analysis in food and feed
• Veterinary drug residues detection in matrices of animal origin, food and feed
• Allergen detection in finished products and raw materials
• Quantitative detection of histamine in seafood

Accreditations:
ISO 9001

SPAIN

Gold Standard Diagnostics Madrid

Gold Standard Diagnostics Madrid is a developer and manufacturer of diagnostic test kits with a broad range of applications in Veterinary Diagnostics and Food Safety. The company is based in Madrid, Spain and has 51 employees.

Over the last 30 years, Gold Standard Diagnostics Madrid has put a very strong focus on research and innovation and today provides its customers with a wide range of ELISA and PCR assays to detect viral and bacterial pathologies in both farm and companion animals.

In addition, Gold Standard Diagnostics Madrid further completes the offering of In Vitro Diagnostics in allergen detection.

Services:
- Veterinary diagnostics with the broadest catalogue in the market for diagnostic assays in veterinary medicine, with tools that help with both the health management of farms and the eradication of several diseases.

- Food safety: allergen detection with the ELISA-based Gluten detection method using the world renowned antibody R5, along with a range of Lateral Flow Devices and ELISA assays for the detection of Casein, Beta-Lactoglobulin and Ovoalbumin.

- Human diagnosis: development of a series of high interest reagents

USA

Gold Standard Diagnostics Horsham

Gold Standard Diagnostics Horsham develops and manufactures rapid environmental, food, and life sciences test systems, including immunochemistry products and methods, to meet the testing needs of industry, government and research. Through continuous collaboration with leaders in each of these areas, Gold Standard Diagnostics Horsham has built up a strong expertise in custom assay development for the food safety and environmental testing.

Many of Gold Standard Diagnostics Horsham methods are validated/verified by US federal agencies regulating food safety and environment protection, the Japanese Ministry of the Environment, and the World Health Organization (WHO). Gold Standard Diagnostics Horsham holds, or is exclusive licensee, of several key technology patents, with additional applications in process.

Furthermore, Gold Standard Diagnostics Horsham has created a wide product portfolio across different technologies, formats and applications including field and lab-based testing solutions for both fresh and marine water algal toxins, pesticides, GMO detection and the novel magnetic separation technology AbraMag.

Many methods are validated/verified by regulatory agencies such as US federal agencies including the US Environmental Protection Agency (EPA), the US Department of Agriculture (USDA), the US Geological Survey (USGS), the US Food and Drug Administration (FDA), the Japanese Ministry of the Environment, and the World Health Organization (WHO).

Gold Standard Diagnostics Horsham holds, or is exclusive licensee, of several key technology patents, with additional applications in process.

Services:
Fields of expertise are:
• Field and lab-based testing solutions for both fresh and marine water algal toxins, pesticides, GMO detection, veterinary residues, mycotoxins and the novel magnetic separation technology AbraMagTM
• ELISA assay development
• Antibody and antigen purification
• Monoclonal and polyclonal antibody production
• Bulk and custom magnetic particles

FOOD ASSURANCE

Eurofins Food Assurance is a global trusted partner supporting food and feed producers, manufacturers and retailers to identify and mitigate safety and integrity risks in their entire value chain.

High quality, safety and integrity of food and feed products can only be achieved by implementing robust and effective management systems and processes. Eurofins Food Assurance provides accredited certification and auditing services that are focused on food and feed safety management systems, process optimisation, risk and cost reduction in order to ultimately strengthen brand protection of its customers. The business line's expert auditors offer strategic evaluation designed specifically to solve industry challenges and inform unbiased business decisions.

With its global network of experts, Eurofins Food Assurance also provides vulnerability assessment to tackle food frauds. In close cooperation with its unparalleled Food Authenticity Competence Centres, Eurofins food fraud consultants provide supply chain monitoring of fraud risks and help customers to build adapted mitigation strategy.

Eurofins Food Assurance also designs and promotes its own standards subject to certification audit, such as the Non-GMO Identity Preservation standard. The IP standard is a set of physical and organizational measures that apply to all supply chain stakeholders to ensure their production is GMO free and appropriate measures are taken to avoid cross contaminations.

Customised training services support food and feed manufacturers and retailers in facing an ever evolving complex and demanding market. Consulting services are to help customers meet and anticipate current and coming regulations and international food and feed safety and integrity standards.

In addition, Eurofins Food Assurance experts offers food and feed labelling services to fulfil food labelling requirements and support its customers complying with regulations in countries of destination, ensuring global market access to import and export food both locally and globally

Services:
Audits and Certifications:

Thousands of food producers are audited every year, worldwide, on behalf of retailers, caterers, distribution centers, agents, importers and manufacturers.
• Certification audits:
  o Food Safety:
    •BRCGS
    •FSSC 22000
    •IFS
    •ISO 22000
    •SAFE FOOD SAFE FEED
    •SQF
  o Feed Safety:
    •ISFSF/FAMI-QS
    •QS
    •SAFE FOOD SAFE FEED
  o Agri
    •Global G.A.P.
  o Food Integrity:
    •Artysanal
    •ETS (Excellence Through Stewardship)
    •Gluten Free (AOECS, BRC Gluten Free, GFCP)
    •GMO Free (Identity Preservation)
    •Organic
    •Valid-IT: GMO & Illegal Dyes Desktop Audit
  o Quality Management Systems:
    •ISO 9001
• Second Party Standards:
  o Animal welfare
  o Distribution Center / Warehouse
  o Food Fraud Management Audit
  o GLP (Good Laboratory Practices)
  o GMP (Good Manufacturing Practices)
  o GMP for Dietary Supplements
  o HACCP (Hazard Analysis and Critical Control Point)
  o IBWA (International Bottled Water Association)
  o In-House Laboratory Audits: LabTRUST™
• Retailer Supplier Audits
  o Example: COSTCO

Training, Consulting and membership:

Training, consulting and membership services support the implementation of processes, which comply with relevant international standards for food safety, quality and integrity.

Consulting and membership programmes:
• Food Fraud Management Services/Approach
  o Food Fraud Database: Decernis Food Fraud Database is a critical resource for industry, regulators, and other stakeholders to inform risk-based decisions on food fraud vulnerability and mitigation. As collaborators, Decernis and Eurofins have combined their expertise to assist the food sector with specific tools for combating food fraud.
  o Food Fraud Ingredient Vulnerability Screen
  o Food Fraud Management Systems: Vulnerability assessment and Mitigation Plans
• Food labelling services
  o Allergen Labelling
  o EU Label Translation and Compliance
  o Food Labelling
  o Nutrition and Health Claims
  o Specification writing and review

o Pack Copy and Artwork Approval / Compliance review
• Food Law Advisory
o Vigial (www.vigial.com): recognised and ergonomic database which allows customers to be proactive on a daily basis in their food safety watch.
• Gap Assessment
o pre Certification BRCGS Assessment
o pre Certification IFS Assessment
o pre Certification SQF Assessment
o pre Certification FSSC Assessment
o EMP Assessment
• HACCP Control Plan
o HACCP Plan Facilitation
• Outsourcing / Outplacement
• Programme Development
o BRCGS Programme Development
o IFS Programme Development
o FSSC Programme Development
o SQF Programme Development
o EMP Programme Development

Trainings:
• Food Fraud
• Food Labelling
• Food & Feed Safety:
o EMP (Environmental Monitoring Programme)
o Food Allergen
o Food Plants, Microbiology and Hazards
o Food Safety in Manufacturing
o GLP (Good Laboratory Practice)
o GMP (Good Manufacturing Practice)
o HACCP
o Internal Food Safety Auditor Training
• Food & Feed Safety Certification Standards:
o BRCGS
o FAMI-QS
o FSSC 22000
o IFS
o SQF
• Food & Feed Testing courses
• Regulatory Courses
• Custom Training Offering

Accreditations:
Our certification bodies are accredited according to ISO 17065 by:
• UKAS in the UK
• DAkkS in Germany
• COFRAC in France
• JAS-ANZ in the USA

BRAZIL

Eurofins Ambiental Rio Claro, SP

ASL is a laboratory that has been providing analytical services since 2002, performing physic-chemical, microbiological, organic, inorganic and toxicological analyzes in environmental matrices such as water (drinking water, underground water, industrial water, etc.), effluents, soil, sediment, waste and atmospheric emissions.

Since the beginning of its activities, it has been acting with the highest analytical quality, providing state-of-the-art technology, highly qualified staff and personalized service. Currently it is among the three largest laboratories in Brazil with a structure of 2500 square meters and one of the accreditation scope meeting ISO IEC 17025. Additionally, ASL is a reference involving sampling procedures including field tests.

CANADA

Eurofins Environment Testing

Eurofins Environment Testing Canada (EETC) is a group of full service and specialty laboratories located in Ontario. EETC provides analytical analysis and stack testing services in support of environmental site assessments, remediation, drinking water quality, landfill monitoring, regulatory compliance, and more.

Since its inception in 1987, Eurofins Ontario, has participated in many projects involving monitoring and remediation, and has provided independent analytical service to all levels of government and the private sector. Our environmental services division processes hundreds of samples per week for a vast range of analytical parameters. The Ottawa Environmental lab occupies 11,000 square feet of customized space and employs roughly 50 dedicated specialists.

The Ottawa Laboratory is licensed by the Ministry of the Environment and Climate Change (MOECC) and accredited by the Canadian Association for Laboratory Accreditation (CALA), in accordance with the recognized International Standard ISO 17025:2005.

In addition, EETC has Ontario Environmental regional offices in the Greater Toronto Area, Thorold (Niagara Falls) and Kingston. Both locations are able to coordinate business development and client services for the Southern Ontario region.

EETC's laboratories on the island of Montreal and near Quebec City carry a combined laboratory setting of nearly 45,000 square feet with roughly 150 dedicated employees.

EETC's St. Bruno, stack sampling and emissions monitoring team provides world-leading technical support. These programs are tailored to meet each individual client's specific needs and are overseen by field teams backed by engineers, chemists and technicians. With our comprehensive and state of the art range of testing equipment, we ensure stack sampling programs are based on internationally recognized protocols. St. Bruno's mobile lab units provide a clean environment for the preparation and recovery of samples from sites, without interfering with the clients routine business operations. All stack sampling and emissions monitoring programs include modified methods for special applications.

Services:
EETC is recognized in the environmental industry for scientists who have a wide range of environmental expertise in testing soil, water, air and materials for organic and inorganic contaminants including:
• Routine analysis of potable water, ground water and waste water monitoring.
• Soil analysis related to oil and salt spills, petroleum storage tank sites, sulphur and contaminated materials, pipeline disturbances, soil reclamation and soil quality litigation.
• Analysis of lake and stream nutrients, effluent and groundwater monitoring, drilling sump treatment and tailing pond management.
• Toxicity bioassay services.
• Drilling waste analysis.
• Composting.
• Hazardous waste classification and landfill criteria.
• Environmental microbiology

DENMARK

Eurofins Environment Galten

Eurofins Miljø and Eurofins VBM perform sampling, laboratory analyses and consultancy services focusing on the environment and geotechnical investigation. Modern laboratories in Vejen, Rødovre, Aabybro, and Galten service a broad range of companies, authorities and organisations. The laboratories are appointed as national reference laboratories within specific areas of expertise.

Services:

• Environment sampling and analyses: chemical and microbiological testing of air, water, contaminated soil, sludge, sediment and biota for routine parameters like heavy metals, TPH, PAH, PCB and VOCs, as well as non-standard parameters like pesticides, degradation products, glycols, phthalates, amines, polyamines, flame retardants and other POPs applying a range of modern techniques, including ICP-MS, HR-ICP/MS, GC/MS, GC/MS/MS, HPLC, LC-MS, LC-MS/MS.
• Air monitoring and occupational health and safety: monitoring analyses, tests, and consultancy within stack emission, occupational health, indoor air, personal protection, noise, handling of chemicals, recycling of chemicals, compressed air, ventilation etc.
Geotechnical and Geo-environmental In-situ and Laboratory Investigations: Compaction test, particle size distribution, quality and environmental control of recycled material

ESTONIA

Eurofins Environment Testing Estonia

After more than 3 years of acting as a satellite laboratory for other Nordic laboratories in Ramboll, Eurofins Environment Testing Estonia OÜ joined the Eurofins Group in 2017.

We are mostly specialized on environmental chemical analyses, such as testing of contaminants in soil, sediment, sludge, water and different air matrices, but can also offer testing in other various sectors by using the world-wide laboratory network of laboratories, including agro, material, product, cosmetics, pharma and other testing.

Services:
Environment testing:

• Soil testing
• Sediment testing
• Sludge testing
• Drinking water testing
• Surface water testing
• Groundwater testing
• Wastewater testing
• Sewage water testing
• Waste testing
• Air testing

Other testing:

• Agro testing
• Material testing
• Product testing
• Consumer product testing
• Cosmetics testing
• Pharma testing

Accreditations:
Our laboratory acts in accordance with EN ISO/IEC 17025 quality management system and is accredited by

Estonian Accrediation Centre (EAK).

Our accreditation scope can be found at:

http://www.eak.ee/dokumendid/pdf/kasitlusala/L272.pdf

Eurofins Nab Labs Rauma

The Nab Labs Rauma site gives Eurofins strong insight to forest industry services. Rauma site is located in Western Finland, together with its remote site Pori laboratory. Nab Labs Rauma site is in UPM-Kymmene mill area close to the operations of several industrial companies. This site provides fast-cycle customer service to the forest industry and customers related to it.

Services:

• Physical properties of pulp and paper incl. pulp refining, preparing hand sheets, physical testing
• Chemical analysis of woodchips, pulp, paper, cardboard and water
• Microscopic evaluations
• Analysis of tall oil, liqueur, condensate, filtrates and biomass
• Trouble shooting analyses
• Power Plant process analyses

Eurofins Labtium Sodankylä

Eurofins Labtium Sodankylä can provide a wide range of services for mining and metallurgy. In addition to the preparation and analyses of exploration and grade control samples, we analyse process samples from different stages of the mineral processing including independent party and umpire analysis. Our diverse sample preparation equipment enables us to greatly customise our services in accordance with the customer's needs, the strategic project phase and the characteristics of the ore. Moreover, we can design and implement laboratory services for mines with the mining company serving as the operator or outsourcing all of the services from us, either on-site or through our comprehensive laboratory network.

Eurofins Labtium Sodankylä is one of the first geoanalytical laboratories worldwide to be granted accreditation as early as in 1994. Today, we are accredited according to ISO/IEC 17025 by FINAS (Finnish accreditation service. Testing laboratory T025) and most of our routine methods have accreditation status. For the evaluation of mineral resources and mineral exploration, we have a comprehensive selection of sample preparation and analytical methods in line with internationally approved best practices and reporting requirements e.g. Canadian NI 43-101 and Australian JORC codes.

Eurofins Environment Testing Finland Oy

Eurofins Energy testing Jyväskylä, is located in Central Finland.

The laboratory provides a comprehensive selection of analysis services for energy industry, since the 1980´s. We offer to our international and national customers (e.g. the energy, waste and forest industry, power and heat plants, consultants, universities and research centers) a wide range of tests for different energy business related purposes, e.g. R&D, commercial purposes, product quality control, product specification for combustion purposes, startups and trial runs and emission factor analysis and calculations.

The Environment Testing laboratory in Jyväskylä provides environmental analytical services from water samples and expert services for environmental monitoring.

FRANCE

Eurofins Analyses pour l'Environnement France

With laboratory space of 5,500 m², Eurofins in Saverne provides a large part of our environmental analytical capabilities in France.

Solid, air and ground water matrices are analysed, and the nature of analyses performed is very diverse: contaminated soil, sludge, clinkers and sediment, air monitoring (emission air, work air, internal air), underground and waste water.

This laboratory also provides microbiology analyses like legionella, hospital hygiene or air parameters. We can also provide material testing (building materials, water, polymer expertise)

This laboratory also provides material testing (building materials, water, polymer expertise)

Services:

• Chemical and microbiological testing of air (emission, work, internal, ambient air)
• Contaminated soil, sludge, sediment, clinkers
• Underground water, waste water
• Microbiological testing of clean or waste water, Hospital Hygiene
• Materials testing

Accreditations:

• COFRAC on air (emission air, working air, soil gas and internal air), soil, sludge, sediments, clinkers, hospital hygiene, underground, clean and waste waters
• EXXON approval.

Eurofins Analyses des Matériaux et Combustibles France

Services:
This laboratory located in Saverne performs analysis on various materials:
• construction materials (aggregates, concrete, soil, rocks, cement),
• solid fuel (biocombustible, industrial waste, coal)
• expertise on various matrixes (concrete, polymer, food, wood, ceramic, glass)

Accreditations:

• Various tests accredited by COFRAC, the French accreditation organization, in accordance with ISO 17025
• LABOROUTE agreement

Eurofins Hygiène Hospitalière Sud

This lab specialises in the management of the infectious risk associated with the use of complex reusable medical devices and hospital environment; Eurofins Hygiène Hospitalière Sud is the essential partner for healthcare facilities.

Services:
Education / Training

Our education/training programs in hygiene are designed for all medical and paramedical staff including:
• Physicians
• Pharmacists
• Nurses, Hygienists

Microbiological sampling

Healthcare facilities and some structures receiving public have an obligation to monitor and control infectious risk. We assist you in the process of microbiological surveillance of the environment:
• Microbiological monitoring of the environment (air, water, surface…)
• Medical devices sampling (endoscopes, endoscope drying/storage cabinets, automatic endoscope reprocessors)

Medical Device Evaluation

In collaboration with the health industry, we act as an independent testing laboratory for the analysis of the risk factors in the design and validation stages of a medical device:
• Medical Device Safety
• Type Testing
• Performance Qualification

Eurofins Eichrom Radioactivity

For 20 years, The Eurofins Eichrom Radioactivity laboratory, a member of the Eurofins | Nuclear network, has been recognised for the quality of its radioactivity measurements, chemical and asbestos analyses on potentially radioactive samples.

Since its creation, the laboratory has grown significantly and has become the nuclear analytical platform of choice to support the projects of major nuclear players in France and across the world.

Eurofins | Nuclear, the nuclear competence center for all your analysis needs for samples from potentially radioactive areas.

Services:
ENVIRONMENT

Natural water, ground water, wastewater

Plants, soils, sludge

Bio-indicators (milk, wildlife, flora)

Gas and air

POLLUTED SITES & SOILS

Sanitation

Dismantling

DRINKING WATER

Water sanitary control

Mineral and thermal waters

INDUSTRIES

Food stuffs

Radioprotection

NORM - Natural radioactivity

Accreditations:

• ISO 17025 Equivalence COFRAC
• EA European Accreditation infrastructure
• ILAC International Laboratory Accreditation Cooperation

Eurofins Eichrom Asbestos

Eurofins Eichrom Asbestos was created in 2015 within Eurofins Eichrom laboratories.

Eurofins Eichrom Asbestos are recognised for the quality of their asbestos analyses on radioactive and potentially radioactive samples.

Services:
Eurofins Eichrom Asbestos performs asbestos analyses, on various matrices such as:
• Mixes
• Materials
• Filters

Accreditations:

• ISO 17025 Equivalence COFRAC

Eurofins Umwelt Nord Hamburg

Eurofins Umwelt Nord is a laboratory with more than 25 years' experience in the environmental business, accredited according to DIN EN ISO/IEC 17025.

Services:
Sampling and analysis of a large range of organic and inorganic parameters in industrial waste; drinking, surface, ground and sewage water; soil, sludge, waste. Indoor air and workplace measurements

Accreditations:

• Accredited according to DIN EN ISO/IEC 17025
• State accreditation as an investigation body of the water and waste disposal supervision (§ 125 NWG, § 44 NAbfG)
• Listed for Microbiology of the German Drinking Water Ordinance (TrinkwV 2001)

Eurofins ht-analytik Mönchengladbach

Eurofins ht-analytik GmbH is a domestic engineering service company providing comprehensive consulting and support with regard to implementing drinking water laws. It is the prime concern of Eurofins ht-analytik to assure drinking water quality by preventing the distribution of legionella, which poses a threat to human health.

Services:
Eurofins ht-analytik offers services corresponding to individual needs: technical survey, sample taking and logistics, examination and report, documentation and communication as well as elimination of defects.

Eurofins Institut Jäger Tübingen

Institut Prof. Dr. Jäger was founded in Tübingen in 1977 by Prof. Dr. Walter Jäger and is one of the leading providers of environmental services in Southern Germany. Institut Prof. Dr. Jäger is prepared to solve almost any kind of problem in the environmental sector. The Environmental Analysis Competence Centre is your partner for all issues in this field.

Institut Prof. Dr. Jäger is accredited for more than 390 testing procedures according to the international ISO/IEC 17025 standard

Services:

• Mineral water: Support and advice for the development of wells and the concurring authorisation process; full analytical service
• Analysis of drinking water, water for industrial use, water used for swimming pools
• Calculations needed for the mixing of different types of well waters intended for human use
• Federal programmes on the analysis of subsoil waters
• Microbiology
• Analysis of communal and industrial waste waters, refuse analysis
• Elemental analysis
• PFT analysis
• Pesticides in water
• Biopharmaceutical residues in water
• Legionella
• Microbiology in water
• Indoor air measurement

Accreditations:

• ISO/IEC 1702
• Investigating body according to §15, subsection 4, sentence 2 of the German drinking water regulation of 2001
• Board of experts in water management (subject module water) for the fields of waste water, surface water and ground water
• Admission of the French ministry of Environment for investigations of water quality by sanitary inspection
• Investigating body for the analysis of perfluorated tensides (PFT) in water and sewage sludge
• Acceptance as a testing agency in waste management (waste module) for the sewage sludge section, soil and waste oil
• Acceptance of QS society of fruit-vegetables-potatoes GmbH as investigating body for the QS residue monitoring section
• GMP-confirmation of inspection activities as provided for § 14 subsection 4 No 3 Medicines Ordinance
• Permission for activities with pathogens due to § 44 German Law on the Prevention and Control of Infectious Diseases
• Acceptance as a testing agency for tests of products as part of the certification procedure DIN CERTCO

Eurofins Hygiene Institut Berg

For 50 years Eurofins Hygiene Institut Berg GmbH has been a free and independent water analysis laboratory for microbiology, environment analysis and hygiene.

Services:

• Analysis of swimming and bathing pool water
• Microbiological analysis of bathing water and industrial water
• Microbiological and selected chemical and sensory parameters according to German drinking water regulation
• Sampling of raw and drinking water
• Sampling of swimming and bathing pool water

Eurofins Umwelt Ost Jena

With more than 25 years of experience in environment analysis today Eurofins Umwelt Ost GmbH offers a wide range of chemical, physical and biological analyses.

Services:

• Industrial waste, drinking, surface, ground and sewage water
• Analyses of soil, sludge, waste, compost
• Special experience in analyses for agriculture
• Special analysis of priority substances corresponding to the EU water framework programme
• Bio and solid fuels
• Coal, bio fuels, bio ethanol, and wood pellets
• Bio-toxicity tests
• Tests of bio-gas formation (GB21): material waste, agriculture products and animal excrement
• Test of AT4 (activity of breathing in 4 days for waste and soil)
• Degradability tests
• In-Situ chemical oxidation (ISCO)
• Nmin

Accreditations:

• Drinking water regulation
• Self-control regulation for waste water
• Self-control regulation of Landfill Ordinance
• Waste sewage sludge ordinance
• Bio-waste ordinance
• Fertilizer ordinance
• Federal soil protection regulation
• § 25 Regional waste law NRW
• Federal Quality Association Compost.

Eurofins Umwelt West Wesseling

Eurofins Umwelt West, formerly known as Analytis, was founded in 1980 and has been performing environmental analysis for more than 20 years.

The laboratory performs chemical, physical, biological, microbiological and toxicological analyses of soil, water and air.

Eurofins Umwelt West also performs analyses of specialty samples according to the needs of industrial customers.

Services:
Sampling and analysis of a large range of organic and inorganic parameters:
• NSO-heterocycles,
• Soil gas analysis
• PFC

Accreditations:

•Accreditation by DIN EN ISO/IEC 17025 by DAkkS
• Evidence for confirmation of competence within the framework of the BAM-OFD agreement on the investigation of contaminated sites
• Listed as investigating body according to § 15 section 4 of the German Drinking Water Ordinance (TrinkwV 2001)
• Admission pursuant to § 25 LAbfG NRW for different subsections
• Admission as investigating body pursuant to § 18 sentence 1 BBodSchG and § 17 section 1 LbodSchG NRW
• Admission as investigating body within the sense of § 3 section 5 and 6 of the sewage sludge regulation
• Admission as investigation body according to self-inspection guidelines (EKVO) of the Saarland
• Admission as federally recognized investigative body for waste water analysis for the subfield "carrying out laboratory tests"(self-inspection guidelines laboratory - EKVO laboratory)
• Admission as federally recognized investigative body for waste water analysis for the subsection "EKVO Überwachungsstelle" according to § 10(4) No 4 EKVO in Hessen
• Approval as inspection body for aptitude and verification tests and referee purposes and external monitoring for water management characteristics of road construction materials (RAP Stra)
• Admission pursuant to the law of 21 April 1993 for the implementation of technical research and control data in the environment section in Luxembourg

Eurofins GfA Lab Service

With over 30 years of experience, Eurofins GfA Lab Service is the world's leading dioxin laboratory.

The main focus of the analytical portfolio is the analysis of persistent organic contaminants (e.g., dioxins, PCB, flame retardants, PFCs, Stockholm POPs) on ultra-trace levels. Representative for a number of parameters, polychlorinated dibenzodioxins and –furans (PCDD/Fs), polychlorinated biphenyls (PCBs), brominated flame retardants, per- and polyfluorinated alkyl substances (PFAS) as well as organotin compounds are examined in almost every matrix as e.g. food/feed, biota, environmental samples (water, waste, soil etc.), emission and ambient air samples and even human matrices (blood, serum, tissue etc.)

Eurofins GfA Lab Service GmbH is one of the few worldwide laboratories that is able to analyse all 27 POP substances banned or regulated in the Stockholm Convention in its own laboratory. Eurofins GfA Lab Service GmbH is also able to analyse all 209 PCBs incl. dioxin-like PCBs (DL-PCBs) and non-dioxin-like PCBs (NDL-PCBs, also called ICES6-PCBs), as required by the California Proposition 65. The scientists of this laboratory are sought-after experts in national and international standardisation bodies or other working groups. Numerous publications in the field of POP-analyses have been written or co-authored by employees of Eurofins GfA Lab Service GmbH. This is one reason why Eurofins GfA Lab Service GmbH is the POPs Competence Centre of the international Eurofins Group.

Eurofins GfA Lab Service GmbH is accredited according to the international ISO/IEC 17025:2005 standard. The overall capacity of dioxin and POP measurements of the Eurofins GfA Lab Service GmbH has been raised to > 45,000 samples per year using high-end technical equipment (8 HRGC/HRMS systems (high resolution gas chromatography / high resolution mass spectrometers), 14 GC-MS/MS systems (gas chromatography / tandem mass spectrometers), 3 LC-MS/MS systems (liquid chromatography / tandem mass spectrometers), several GC-MS systems as well as the novel API-GC-MS/MS-technique. The highly experienced laboratory staff analyses all kinds of matrices both according to European guidelines and other regulations (US EPA etc.).

This state-of-the-art-laboratory delivers rapid turn-around-times with the highest level of service and most advanced technologies (e.g. automated clean-up-systems) in line with the EU-Regulations No. 2017/644 and 152/2009 for analysis of dioxins and PCBs in food and feed samples. 48h-analytical services for dioxins and PCBs are possible for selected food and feed matrices.

In addition to the standardised services offered in our high-performance laboratory,

Eurofins GfA Lab Service has many years of experience and the scientific and technical know-how for providing special services beyond the established procedures. Custom-tailored analysis, special project support, method development, method validation as well as data interpretation and publication on scientific platforms and in journals will be of special value for processing of scientific projects of governmental authorities and non-governmental organisations.

Services:
Food & Feed Testing:
• Dioxins and dioxinlike compounds
  o Fast processing times
  o In line with Regulation (EU) No. 2017/644 (food) and No. 2017/771 (feed)
• POPs such as brominated flame retardants (BFR), organochlorine pesticides, PFAS, organotin compounds, PAHs
  o Sensitive analysis, low limits of quantification
  o Competitive processing times

Environmental Testing:
• Water, soil, sediment, plants, waste and sewage sludge
• Air samples (emissions/ immissions, indoor air)
• Sensitive analysis, low limits of quantification
• Competitive processing times

Human Biomonitoring:
• Blood / serum, breast milk, adipose tissue
• Investigation on regional background concentrations
• Assessing the impact of harmful substances on humans
  o Assessing the effects of eating habits i.e. the impact of eating harmful substances on the human body
  o Special studies on humans who are extremely exposed to hazardous substances.

Special Project-based:
• In addition to the standardised services offered in our high performance laboratory, Eurofins GfA Lab Service has many years of experience and the scientific and technical know-how for providing special services beyond the established procedures.

Custom-tailored analysis, special project support, method development, method validation as well as data interpretation and publication on scientific platforms and in journals will be of special value for processing of scientific projects of governmental authorities and non-governmental organisations.

Provision of sampling kits:
• On top of carrying out different analyses, Eurofins GfA Lab Service GmbH also provides sampling material, especially for air-monitoring purposes such as cartridges filled XAD resin, pre-spiked or non-spiked, following the requirements of EN 1948 (part 1 to 3 (dioxins) or part 4 (PCBs)) or CEN/TS 1948-5.

Data Access Options beyond Electronic Analytical Reports:
• On-line Data Access: 24 hours a day, seven days a week through Eurofins' secure internet access, EOL, which offers clients immediate access to final verified analytical results as analyses are completed and verified in the lab.
• Electronic Data Deliverables: Standard and custom formats available.

Accreditations:

• DIN EN ISO/IEC 17025:2018, D-PL-14629-01-00
• Officially acknowledged measuring site according to §29b Federal Emission Control Act (BImSchG), group I-Nr.1 and group IV for specific analysis of substances requiring special complexity for sampling or analysis.
• Examination laboratory for soil and sewage sludge according to § 3 Sewage Sludge Ordinance (AbfKlärV)
• Officially acknowledged by the French environmental ministry for the measurement of PCDD/F in emission samples
• Analysis in compliance with EU-guidelines, international recognised standards, e.g. EN 1948, EPA and other accredited methods • GOED member (Global Organization for EPA and DHA Omega-3)
• IFFO member (International Fishmeal and Fish Oil Organisation)
• Expert for official counter samples according to §43 LFGB, chemical-physical and microbiological examination of food
• QS approval as laboratory in the field of feed monitoring for the parameters, dioxins, PCBs, heavy metals, aflatoxins, DON, ZEA, PAH, animal ingredients, pesticides, salmonellae, ochratoxins and methanol.
• GMP+ certification

Eurofins Budapest

Eurofins Budapest offers a wide spectrum of environmental sampling and analysis. The laboratory conducts sampling and analysis in the field of environmental protection: ground water sampling, elaboration of sewage self-assessment plan, monitoring analysis, soil, compost, sewage sludge sampling, sampling and analysis of waste for waste qualification, composition analysis of household waste, measurement of emissions, measurement of odour, preparation of environmental impact assessment, supervision and state assessment.

Services:

• Sampling, chemical and microbiological analyses of environmental matrices
• Analysis of drinking water, bathing water, groundwater, surface water, wastewater for organic and inorganic contaminants, heavy metals
• Analysis of waste, soil, sludge, sediment and compost
• Analysis of immission and odor test.
• Analysis and classification of solid recovered fuels (SRF)

Accreditations:

• MSZ EN ISO/IEC 17025:2018
• MSZ EN NAH-1-1377/2019
• MSZ EN NAH-2-0323/2018
• MSZ EN ISO 9001:2015

KOREA

Eurofins Korea Analytic Service

Eurofins Korea Analytic Service is a laboratory that has been providing analytical services since 2000, performing chemical, microbiological, organic, inorganic and toxicological analyzes in environmental, food, cosmetics and consumer products.

Services:
Environmental Testing Services (water, soil, waste and atmospheric emissions) :
• Dioxins and dioxin-like compounds, PCBs and related persistent organic pollutants (POPs)

Food and Livestock products Testing Services:
• Pesticide analyses for organic foods
• Pesticide analyses based on QUECHERS GC-MS & LC-MS/MS
• Nutritional fact analyses
• Microbiological analyses
• Heavy metals analyses

Cosmetics Testing Services:
• Chemical Testing
• Microbiology
• Safety Testing

Human Biomonitoring Service:
• Blood / serum, breast milk, adipose tissue
• Investigation on regional background concentrations
• Assessing the impact of harmful substances on humans

Accreditations:
The laboratory is accredited by KOLAS, the Korea accreditation organization, in accordance with ISO 17025.
• Ministry of Food and Drug Safety: Food, Livestock Products, Cosmetics
• National Institute of Environmental Research : POPs Sampling & Analysis, Waste Analysis(General, PCBs), Air pollutant
• National Agricultural Products Quality Management Service: Safety Inspections

Eurofins Woosol

Eurofins Woosol is a laboratory that has been providing analytical services since 2010, performing chemical, microbiological, organic, inorganic and toxicological analyzes in environmental samples and food products.

Services:
Food and Livestock products Testing Services
• Nutritional fact analysis
• Microbiological analysis
• Heavy metals analysis
• Physical & Chemical analysis
• Some Vitamins analysis

Environmental Testing Services (Drinking Water, Ground water, Surface water, tap water)
• Environmental inorganic & organic analyses
• Microbiological analysis
• Heavy metals & elements analysis
• Benzene, toluene, ethylbenzene, xylenes (BTEX)
• Volatile organic hydrocarbons (VOCs)
• Pesticide analysis
• Anion & cation analysis

Accreditations:
The laboratory is Nationally Recognized Laboratory
• Ministry of Food and Drug Safety: Food, Livestock Products
• Ministry of Environment: Drinking water
• National Institute of Environmental Research: Certificate of Environmental Laboratory(Drinking water)

MALAYSIA

Eurofins Environment Testing Penang

In 1997, Eurofins NML engaged in providing an environmental monitoring and industrial hygiene service to the manufacturing industries in Penang. Today, our customers are not limited to the manufacturing companies from various industries nationwide, but they are inclusive of water treatment companies, properties development and land exploration firms, as well as new investors in Malaysia.

Eurofins NML has a team of highly experienced consultants and a highly skilled technical team to carry out field works and competent chemists to analyse environmental samples. Eurofins NML consultants inclusive of Registered Assessors, Hygiene Technicians, Noise Competent Persons etc, are not only well-verse in respective technical knowledge and regulations but they are also keeping abreast of new regulations and new enforcements in the country.

Services:

• Sampling and analysis of natural water, processed water, waste water
• Industrial effluents (Industrial Effluent Characteristic Study, IECS)
• Solid waste & contaminated soils
• Ambient air, chimney and stack gas emission
• Boundary noise & vibration test
• Chemical Health Risk Assessment (CHRA)
• Chemical Exposure Monitoring
• Local Exhaust Ventilation (LEV) Inspection & Testing
• Noise Risk Assessment
• Indoor Air Quality Assessment
• Safety Data Sheet (SDS) Authorin

Accreditations:

• ISO/IEC 17025
• SAMM 188 & 612
• Ministry of Health Malaysia

Eurofins RadonLab

Radonlab was started by Dr. scient. Aleksandar Birovljev, who previously established laboratories at the Statens strålevern and Teknologisk institutt.

Radonlab offers reliable radon measurements, investigations, products, and solutions for the protection against radon and moisture, including track-etch detectors and electronic instruments for measuring radiation from radon.

In terms of radon mitigation, we have many years of experience in remediation of buildings with elevated radonlevels. We have a selection of proven solutions and products, such as our RadonSug, Guard MiniVent and climate systems.

Secondly, we develop and test new ideas for reducing radon levels indoors. We offer courses and training in radon monitoring and mitigation. Our services and products can be used by both professionals and others, who wish to carry out cost-effective measurements and action against radon.

Our track-etch laboratory is classified as class A by the HPA (former National Radiological Protection Board) in the UK, which performs international comparison tests annually.

Eurofins OBiKS

Eurofins OBiKŚ Polska Sp. z o.o. is a fully accredited environmental laboratory (Chemistry and Microbiology). The laboratory has all the necessary qualifications to carry out quality, soil, waste, water matrices, wastewater, sewage sludge, salt, alternative fuels, solid fuels, biomass, gases, dust testing as required by law.

Services:
Environmental analysis (incl. sampling), using:
• CFA
• ICP-OES
• IC
• IR
• CVAAS

• GC-ECD, GC-FID
• GC-MS, GC-MS-MS
• HS-GC-FID
• HPLC-FLD, HPLC-DAD-ELSD
• spectrophotometry
• colorimetry
• electrochemical method
• weight method
• potentiometric method
• titration

Accreditations:
Certificate No. AB 213 confirms the technical competence and meeting of the requirements according to PN-EN ISO/IEC 17025.

Since 2005, under the sub-license agreement, it is an internationally recognized laboratory with the right to use an ILAC-MRA/PCA mark.

SLOVAKIA

Eurofins Environment Testing Slovakia

Eurofins Bel/Novamann performs sampling, chemical, microbiological and sensory laboratory analyses, certification, training and consultancy services focusing on foodstuffs, ambient and working environments, cosmetics, cleaning and washing preparations, fuels and lubricants, biopharmaceutical products and food safety management systems (HACCP, ISO 22000). The services are offered to a broad range of companies, authorities and organisations.

Own logistic system for sample collection (20 pickup cars with temperature control)

Services:

• Physical-chemical analyses, determination of heavy metals, pesticides, silicate analysis, polyaromatic hydrocarbons, polychlorinated biphenyls, extractable and non-polar extractable compounds in all kinds of water samples, solid samples: soil, earth, sludge, waste, fertilizer, compost, peat, minerals, rocks
• Life and working environment: noise in the environment and work environment, vibrations transmitted to hands and whole body, heat-moisture microclimate, artificial light intensiveness, solid aerosol, chemical and carcinogenic factor, concentrations of toxic gases (NO, NO2, CO, CO2, SO2, H2S, Cl2, O3), samples taken using a sampling bio-impactor.

Accreditations:

• STN EN ISO 17 025:2005 accredited by SNAS (SK) accreditation bodies
• Certificate GMP+B11 no. GMP051712, accredited till 21.12.2020

• Certificate of good manufacturing practice no. 120/2013 / CGMP UŠKVBL Nitra
• Certificate GMP+ B11 č. GMP051712
• Certificate GMP č. 120 /2013/CGMP UŠKVBL Nitra

Eurofins Iproma - Castellón

EUROFINS IPROMA specialises in offering, on the one hand, a complete range of analytical testing services and, on the other hand, environmental and occupational hygiene consulting services. It provides expertise in water testing, soil contamination analysis, sediment, biota, biological indicators of water quality, air quality monitoring as well as it offers in-situ measurement services.

Services:
Eurofins IPROMA is one of the leading companies in the field of laboratory, environmental and industrial hygiene consultancy. In addition to physical-chemical, microbiological and metal analyses, etc.

Eurofins IPROMA is one of the few laboratories specialising in emerging contaminant analyses (pesticides, hydrocarbons, PCBs, PAHs, organotin compounds, phthalates, chloroalkanes, drugs and hormones, etc.) and in technical advice for carrying out studies related to water quality, discharges, industrial hygiene, etc. The company also has one of the widest scopes of accreditation in the field of air quality and environmental hygiene.

Accreditations:

• Eurofins IPROMA is accredited against UNE EN

ISO/IEC 17025 and UNE EN ISO/IEC 17020 by ENAC, the Spanish accreditation organisation.
• UNE EN ISO 9001 certification
• UNE EN ISO 14001 certification
• ISO 45001 certification
• UNE 166.002 certification
• Entity that collaborates with the Hydraulic Administration in the control and monitoring of water quality and the management of discharges into the public water domain, in accordance with Order MAM/985/2006, of 23 March.

SWEDEN

Eurofins Environment Testing Sweden

Eurofins Environment in Sweden offers a wide range of accredited chemical and bacteriological tests within the environmental, solid fuel and indoor air sectors.

Services:
Eurofins Environment in Lidköping analyses organic and inorganic parameters on a wide range of matrices like soil, sediment, sludge, construction materials, drinking water, groundwater, waste water, process water, etc.

Eurofins Environment specializes in heavy metals and solid fuels. For routine parameters, like oil, PAH and heavy metals on soil, the delivery time is very important. Standard delivery time for the routine parameters is 2 working days, but results can also be delivered overnight.

Accreditations:

• ISO 17025
• ISO 9001
• ISO 14001

SWITZERLAND

Eurofins Scitec - Lausanne

Located in Lausanne and Delémont, Switzerland, our laboratory specializes in instrumental analytical chemistry and microbiology.

Services:

• Water analysis (potability, site surveillance, bacteriology, analysis for exportation to the USA)

Phytosanitary products and API : chlorothalonil, benzidine, gylphosate
• Water from processing plants (STEP)
• Analyses of micropollutants (pesticides, fongicides, drug residues) in water, soil, and food
• Analyses for assessment of compliance with federal ordinances: ADWO, OSites, OSol, WPO, OPBD
• Analysis of cannabis and derivatives: Tetrahydrocannabinol (THC), Cannabidiol (CBD), Nicotine
• Construction: PAH, PCB, Asbestos

Microbiology for food safety

Eurofins AquaSense

Eurofins AquaSense provides advice to governments, research institutes, water managers and nature managers to deal with water and ecology in a sustainable and integrated way. We look for opportunities for maintaining, restoring and strengthening water systems. Important instruments for this are area-specific planning and management plans, policy support studies and monitoring programs.

Services:
As one of the few agencies in the Netherlands, we have accredited field workers and laboratories to carry out biological analyzes of sediments, land soils, surface water and waste water.

We have expertise in the area of human health, ecotoxicology

and ecology and we provide research and advice in areas such as monitoring, water quality, water assessment, the Water Framework Directive and water storage.
• Water quality
• Water rating
• Monitoring
• Water Framework Directive
• Water storage
• Ecotoxicology
• Ecology
• Microbiology
• Aquaculture
• Human health

Eurofins Lab Zeeuws-Vlaanderen (LZV)

Laboratorium Zeeuws-Vlaanderen (LZV) was founded in 1991 and joined Eurofins in 2013. LZV has over 90 employees.

The chemical analyses offered are agricultural, environmental and food and feed testing. Because of the broad scope they can supply the entire food chain with analyses. Besides analyses, LZV also takes care of sampling and has an advisory department.

Technologies used: GC-MS (MS), LC-MSMS, GC-FID, Head-space, NIR-analyser, Flow Injection Analysers, spectrophotometer, vlam-AAS, AES, ICP-AES, ICP-MS, Coulometer, calorimeter, titrators and CHNS-analyser.

Services:
Environmental testing (sampling, analysis and advice):

• Soil, sludge
• Water
• Analyses (amongst others); dry matter, organic matter, heavy metals, PAH, mineral oil, OCB, PCB, pH, EC, (un)dissolved particles, BOD, COD, head and trace elements

Accreditations:

• ISO 17025
• Acknowledged by: QS, BNN and FAVV

Eurofins Environment Testing - Air Toxics

Eurofins Air Toxics, Inc. is an analytical laboratory, founded in 1989, specialising in the analysis of vapour-phase organic chemicals air using a wide range of EPA, ASTM and in-house developed methods. Our capabilities extend from trace level measurements required for indoor air testing to identifying and quantifying organics in high-level sources.

An on-going investment in media and instrumentation, a continuing commitment to customer service and quality, and a team of experienced chemists have made Eurofins Air Toxics the premiere test facility for the analysis of air samples.

With over 4,400 Summa canisters and 1,800 flow controllers, we maintain the largest single location canister inventory of any laboratory in the United States. In addition to our canister capabilities, Eurofins Air Toxics is the industry leader in both passive and active sorbent-based methods supporting regulatory development and industry acceptance with on-going research and performance evaluation.

Services:

• Soil gas surveys
• Vapour intrusion investigations
• Ambient air monitoring programs
• Indoor air quality assessments
• EPA Method 325/Fence line Monitoring

Our routine analyses include: EPA TO-Compendium Air Methods such as TO-15, TO-3, TO-17, TO-13A and ASTM methods, such as ASTM D1945 and ASTM D1946. Specially developed products include a modified TO-15 method using a custom GC equipped with multiple columns to chromatographically isolate trace level compounds from interference and using a TOF-MS for target compound detection. In addition, our laboratory has developed passive sorbent methods using samplers such as the Radiello and Waterloo Membrane Sampler (WMS)

Accreditations:
Eurofins Air Toxics operates under NAICS code 541380 and holds NELAP accreditation through Oregon Environmental Laboratory Accreditation Program and DoD-ELAP and ISO/IEC 17025 accreditation through ANAB. The laboratory also participates in the following state accreditation programs: Arizona DOH, Florida DOH, Louisiana DEQ, New Jersey DEP, New York DOH, Texas CEQ, Utah DOH, Virginia and Washington DEC.

Hall Environmental Analysis Laboratory, Inc.

Eurofins Albuquerque is a full service environmental testing laboratory that services the entire State of New Mexico.

The laboratory was opened in 1991 as Hall Environmental and joined the Eurofins Network of companies in 2023. The laboratory's experienced staff provides fast and accurate results with rush turn aroundtimes available.

Services:
Water, soil and air testing of environmental contaminants. We service a wide range of markets that includes drinking water, wastewater and solid waste testing.

Eurofins Environment Testing - Calscience

Eurofins Environment Testing Calscience has been providing quality analytical services to consultants, private industry and government agencies since 1986. Eurofins Calscience operates out of three facilities which incorporate 70,000 square feet of laboratory and office space.

We are an industry leader in California, employing nearly 180 professionals and technicians. As a full-service environmental testing company, we offer analysis of groundwater, storm water, soil, hazardous waste, marine chemistry, and soil vapor/ambient air/indoor air.

We pride ourselves in providing the highest level of customer service in the industry because we truly believe "the difference is service".

All of our operations are focused on meeting the demands of our customers, in terms of quality, deliverables, schedules and costs. We are organized and staffed to be able to respond to quick turnaround-time projects and we pride ourselves on our on-time delivery.

Eurofins Calscience focuses on servicing the environmental engineering community, not only to provide reliable data, but to help our customers meet their goals in terms of project profitability and timely completion.

We offer a full range of analytical methods and data deliverable products to meet the requirements of numerous environmental regulatory programs. Our staff of environmental professionals and project managers can assist clients with regulatory issues and are available to consult with clients to choose the appropriate test methods for their projects. We are committed to staying current with new technologies, adding instrumentation and expanding capabilities to meet the needs of our clients.

With our expansive instrument inventory, we have the capacity to meet the demands of the most rigorous field schedules.

Eurofins Caslcience has gained expertise in testing for constituents of concern for various regulatory programs and emergent chemicals.

Throughout our history, we have always been committed to quality, high ethical standards, and operating in a socially responsible manner.

Services:

- Air/Vapour
- Emergent Chemicals
- Hazardous Waste
- Landfill Monitoring
- Marine Chemistry

Accreditations:
Eurofins Calscience is certified under the National Environmental Laboratory Accreditation Program and in the States of California, Arizona (air/ vapor only), Hawaii, Nevada, Oregon and Washington as well as in Guam. In addition to these accreditations and certifications, we also accept and analyse samples from other U.S. States, Territories and Foreign Entities which do not have formal certification programs for air, soil and non-potable water samples. We continue to add certifications to meet the needs of our clients.

Eurofins Drinking Water Testing - South Bend

Eurofins Eaton Analytical, LLC (EEA), South Bend location, founded in 1986, is an analytical laboratory focused on the analysis of water (raw, municipal, bottled, and drinking) for a full range of chemical, microbial and radiological contaminants.

Using methods from EPA, Standard Methods, FDA, and in-house techniques, EEA provides clients with high quality, low reporting limit data to assess water quality. EEA also assists clients with quality assurance consulting and development of internal water quality standards. is certified or approved under the Safe Drinking Water Act, ISO 17025 and the National Environmental Laboratory Accreditation Program (TNI) to offer comprehensive drinking water and bottled water compliance testing throughout most of the United States and its territories. EEA stays on the leading edge of both compliance and emerging contaminant

analyses by partnering with USEPA and instrument manufacturers on method development and validation projects. EEA delivers reports 24/7 via web access and allows users to perform online data mining.

Services:
Eurofins Eaton Analytical specializes in analysis of the following matrices:
• Drinking water
• Bottled water
• Reuse or recycled water
• Groundwater
• Surface water
• Water as a component of food and beverage

Analytical services include
• Volatiles (EPA 524.2, 524.3, 624, epichlorohydrin, 1,2,3-trichloropropane)
• Semi volatiles (EPA 525.2, 525.3, 625)
• Pesticides / Herbicides (EPA 505, 515.3, 515.4, 531.2, 547, 548.1, 549.2, 536, 538, 540)
• Metals (EPA 200.8, EPA 200.7)
• Anions and other inorganics
• Nutrients (nitrogen, phosphorus, silica, total organic carbon)
• Asbestos by TEM (EPA 100.2)
• Microbiological (coliforms, plate, count, coliphage, pseudomonas, legionella, yeast and mold)
• Radionuclides (alpha/beta, radium 226/228, radon, uranium)
• Dioxin (EPA 1613)
• Disinfection Byproducts (Bromate, chlorate, chlorite, TTHMs, Haloacetic acids -HAA, Chloral hydrate, aldehydes, haloacetonitriles, total organic halogen-TOX)

Specialty analytical and consulting services include
• Algae and algal toxins (by flow cytometry, ELISA, and LC-MS-MS)
• Pharmaceuticals, hormones, artificial sweeteners, and personal care products (LC-MS-MS)
• UCMR3 compounds (dioxane, chromium-6, chlorate, hormones, PFAS, metals, volatiles)
• Taste & Odor (MIB and Geosmin)
• EDTA / NTA
• Acrylamide
• Nitrosamines, including NDMA
• Perchlorate (by IC and LC-MS-MS)
• Quality Assurance consulting
• Sampler training
• LIMS consulting
• Regulatory consulting
• Development of water quality standards

Accreditations:
Eurofins Eaton Analytical, LLC is accredited under the National Environmental Accreditation Program and ISO 17025 in multiple states and holds drinking water certification in all 50 US states and territories.

The lab is located in a state of the art 70,000 square foot facility in South Bend, Indiana with additional services center in Scottsdale, AZ, Beaverton, OR and Arvada, CO. Staff at the laboratory and service centers can offer sample pickup or sample collection services depending on client need and location.

Eurofins Environment Testing - Tacoma

An analytical laboratory specializing in mercury, trace metals and metals speciation analysis. Since 1991, our expertise in measuring metals has produced innovative and reliable analytical methods that are currently utilized around the world.

Our services cover multiple industries including: Environmental, Power Plant Emissions, Consumer Products, Dietary Supplements, Food Products, Biological Tissue (fish/animal), and Natural Gas and Petroleum, making us experts in the fireld of metals speciation including Arsenic, Selenium, Mercury, Cromium, Cobalt, Vanadium and Molybdenum

Services:

• ICPMS (inductively coupled plasma mass spectrometry) analysis
• CVAFS (cold vapour atomic fluorescence spectrometry) analysis
• Elemental metals analysis
• Metals speciation
• Metals in fish and other tissues
• Metals in emissions monitoring
• Trace level metals analysis
• Fast TAT (turnaround time)
• Metals in consumer products
• Metals in blood & clinical trials
• Metals in dietary supplement matrices

Accreditations:

• ISO 17025 – GMP and DoD
• NELAC and state accreditations including Washington, California, Louisiana, Florida, New York, Nevada, New Jersey, Arizona, Kentucky, Wisconsin, Maine and CPSC.
• Other permits include USDA, DOE, US fish and wildlife, a low-level radioactive materials license and GCLP approval for clinical trial analysis.

Eurofins Environment Testing - Lancaster Laboratories

With more than 50 years of delivering comprehensive laboratory services, Eurofins Lancaster Laboratories Environmental provides unmatched regulatory compliance, capacity and technical expertise in environmental testing services, including air, water, soil, sediment and biota.

With a proven track record for providing the highest quality NELAP-accredited scientific services, Eurofins Lancaster Laboratories Environmental offers more methods than any other laboratory in the US.

For a seamless service experience, customers team with scientists and project managers throughout the outsourcing process from testing to monthly reports to 24-hour online data access at myEOL.com.

Located on a 49-acre campus in Lancaster, PA, Eurofins Lancaster Laboratories Environmental is the largest single-site environmental laboratory in the US with state-

of-the-art technology and instrumentation housed in a 330,000 square-foot modern facility.

Services:
Environmental Testing Services
• Vapor & Air Analyses
• Petroleum-Related Analyses
• Drinking Water
• Volatiles
• Semi volatiles
• Metals
• Pesticides / PCBs / Herbicides
• Waste Characterization
• Water Quality

Environmental Specialty Services
• Sediment & Tissue Testing
• Method Development
• PFAS (Per and Poly fluorinated compounds)
• 1,4-Dioxane
• Method 25D
• Alkyl PAHs
• Dioxins and Furans
• PCB Congeners
• Explosives

Data Access Options

On-line Data Access--24 hours a day, seven days a week through Eurofins Lancaster Laboratories' secure internet access, myEOL, which offers clients immediate access to final verified analytical results as analyses are completed and verified in the lab.

Electronic Data Deliverables--Over 200 standard and custom formats available.

Electronic Analysis Reports--Data reporting system reports analytical results with information needed to meet regulatory guidelines for Superfund, RCRA, UST, or State programs.

Data Packages on CD—Eurofins Lancaster Laboratories offers a wide range of data packages to meet reporting and data validation needs with several state specific formats, including NJDEP, TRRP-13, as well as CLP Level 4 equivalent packages.

Markets Served

Holding NELAP, A2LA and DoD ELAP accreditations and more than 40 state certifications, Eurofins Lancaster Laboratories successfully completes the most demanding environmental testing projects for leading private-sector engineering and consulting firms and Fortune 100 Industrial companies. With one of the lowest employee turnover rates in the industry, Eurofins Lancaster Laboratories gives clients confidence that they receive the same consistent level of expertise and service year after year.

Service Models

Fee for Service: Eurofins Lancaster Laboratories Environmental's staff performs work on a project-by-project basis.

Eurofins Environment Testing - Philadelphia

Eurofins Philadelphia is a full-service environmental testing laboratory that has been providing analytical chemistry, microbiological and field services and aquatic toxicology testing to a diverse range of clients since 1943.

Conducting operations in Horsham, PA, Eurofins Philadelphia is focused on providing testing services that enable clients to meet their regulatory and monitoring commitments. Analytical data is produced within a quality system framework that provides clients with an accurate and representative portrayal of a sample's constituents.

Housed in an 25,000 square ft facility, Eurofins Philadelphia provides chemistry and microbiology capabilities in support of the federal water, waste water and solid and hazardous waste regulations and derivative state regulations in PA, NJ, NY, DE, MD and VA

Eurofins Testoil

Eurofins TestOil has been in the oil analysis business since 1988.

We started out providing Analytical Ferrography services to power customers and in the early 90's expanded our services. We have focused exclusively on assisting large industrial facilities

reduce their maintenance costs and avoid unexpected downtime through oil analysis program implementation.

Our customers rely on us to be their technical experts when it comes to diagnosing oil related issues in equipment such as turbines, hydraulics, gearboxes, pumps, compressors, and diesel generators.

Our state-of-the-art-laboratory has the capacity to process and analyze 2000 samples per day.

We employ lean process management to drive excellence and ensure that we maintain our guarantee of providing same day turnaround on all routine testing.

Eurofins Built Environment Testing - Reservoirs

Located in Denver, CO, Eurofins Reservoirs Environmental, Inc is a full-service environmental testing laboratory specializing in Asbestos analyses. For nearly two decades, we have provided analytical services to the Rocky Mountain and Gulf Coast Regions. Reservoirs has extensive experience in mineral identification, and we hold accreditations through NVLAP and AIHA LAP, LLC. LAB ID 101533 for bulk and airborne asbestos analysis.

Services:
Asbestos Air Sample Analysis

When Asbestos Containing Material (ACM) is disturbed, asbestos fibers are released into the air, thereby creating a potential health hazard. Air monitoring is an essential component of any asbestos abatement project, and final clearance is determined by air sampling. REI analyzes air samples by Transmission Electron Microscopy (TEM) and Phase Contrast Microscopy (PCM).

Asbestos Bulk Sample Analysis

Although asbestos has traditionally been associated with insulation, Asbestos

Containing Material (ACM) has also been used in other construction components, such as wall plaster, floor and ceiling tiles, and roofing materials. Accurate identification of ACMs through sampling of "bulk" materials is critical to building owners, actual or prospective, as well as lenders, contractors, and other concerned parties. REI analyzes bulk samples by Transmission Electron Microscopy (TEM) and Polarized Light Microscopy (PLM).

Asbestos Water Sample Analysis

Asbestos containing concrete pipe has often been employed to transport drinking water. As these pipes age, asbestos fibers can be released and find their way into drinking water. Disposal of asbestos contaminated wastewater generated in asbestos abatement projects can also be a problem. REI analyzes water samples by Transmission Electron Microscopy (TEM) to quantify the level of asbestos contamination. TEM provides detailed information on fiber morphology with elemental composition determined using an energy dispersive Energy Dispersive X-Ray Analysis (EDX) system. Concentrations are reported in the number of asbestos structures per liter of water.

Accreditations:
Eurofins Reservoirs Environmental, Inc. is a Colorado accredited asbestos laboratory. We also hold accreditation's through NVLAP Lab Code 101896-0 and AIHA LAP, LLC. LAB ID 101533 for asbestos, metals and methamphetamine, respectively.

Eurofins Built Environment Testing - Analytics

Analytics Corporation is a chemical analysis laboratory founded in 1977 by a group of physicians from Richmond-VA (USA). The laboratory was started to offer testing to the local community where workplace exposure to contaminants such as dust, silica, asbestos, lead, solder fumes, hydrocarbons and the like was a concern.

The American Industrial Hygiene Association is a nonprofit organization serving professionals dedicated to addressing stressors in, or related to, the workplace that impact worker well- being. Analytics received accreditation in 1981 from AIHA's laboratory accreditation programs, having established proficiency in all areas of testing included in AIHA's proficiency testing programs.

VIETNAM

Eurofins Sac Ky Hai Dang

Eurofins SKHD has invested in modern laboratory facilities in Ho Chi Minh City and Can Tho City, and a new laboratory newly opened in Ha Noi City, staffed with qualified technical personnel.

Services:

• Analyses for residues and contaminants: Pesticides; Antibiotics; Mycotoxins; Heavy metals
• Nutritional analyses: Vitamin testing; Carbohydrates testing; Amino acid profile analysis; Fatty acid analysis; Lipids; Inorganic components
• Microbiological
• Analysis of agro and aquatic products, processed food, animal and poultry feed...
• Environmental monitoring samples: water, air, soil, mud…
• Inspection & Audit services

Accreditations:

• Certificate of Accreditation No. VILAS 238 - ISO/IEC 17025:2017
• Ministry of Agriculture and Rural Development of the Socialist Republic of Vietnam assigned Eurofins Sac Ky Hai Dang as:

o A food testing facility in charge of state food safety under the Decision No. 509/QĐ-QLCL

o Animal feed testing's laboratory according to the Decision No. 329/QĐ-CN-TĂCN

o A laboratory for agriculture and rural development in the field of fertilizer under the Decision No. 1754/QĐ-BVTV-KH
• Ministry of Health of the Socialist Republic of Vietnam has assigned Eurofins Sac Ky Hai Dang as Food Safety Testing Laboratory under the Decision 265/QĐ-ATTP.
• The Ministry of Industry and Trade of the Socialist Republic of Vietnam has appointed Eurofins SKHD to perform food testing in charge of state management of food safety under the Decision 3070/QĐ-BCT.
• Certification of Ministry of Natural Resources and Environment of The Socialist Republic of Viet Nam about environmental monitoring (VIMCERT 020)
• Recognized as an inspection organization in accordance with ISO/IEC 17020:2012, VIAS 047.

BIOANALYTICAL SERVICES

Eurofins Pharma Bioanalytical Services is a biologics-focused, global leader in bioanalytical solutions providing over 15 years of industry-leading scientific expertise. We specialize in comprehensive PK/TK, ADA, NAb, Biomarker assays and sample analysis for the world's largest pharmaceutical and biopharmaceutical companies.

Our mission is to extend our clients capabilities of improving global health by combining scientific knowledge, capacity, regulatory expertise and flexibility to provide the trusted, relevant information required for the drug approval process.

At the forefront of employing novel approaches to overcome the most complex assay challenges and industry-leadership in developing and performing immunoassays on human and animal specimens, we offer trusted bioanalytical solutions to support studies ranging from preclinical non-GLP to IND enabling Tox studies to multi-national Phase III clinical trials. We can take your biologic drug from research through development to FDA regulatory submission.

• Over 15 years of industry-leading global Scientific Expertise supporting the widest breadth of Biologics' clinical trials with PK/TK, ADA, Nab and Biomarker assays and sample analyses.
• Versatile Performance to adapt to a client's specific needs. Clinical or preclinical, regulated or non-regulated, assay development, qualification or validation; we custom design our support to match the client's program.
• State-of-the-art laboratory facilities in St. Louis, USA providing Global Reach and Capacity to address clients' needs while simultaneously offering regionally-based solutions.

FRANCE

Eurofins ADME BIOANALYSES

Eurofins ADME BIOANALYSES is a powerful and complete laboratory for bioanalysis, pharmacokinetics and immunogenicity.

Our bio-analytical team supports discovery, preclinical and clinical studies with method development, validation, and sample analysis in biological matrices for both small and large molecules (proteins, Peptides, Antibodies) with LC-MS/MS, Immunoassays and Immunogenicity assessment studies.

The laboratory is equipped with a LIMS Watson® coupled with ReportDesigner®.

Services:

• Analytical method development using LC-MS/MS or ligand binding assays
• Validation of analytical methods for the determination of small and large molecules
• Bioanalysis to support discovery, preclinical and clinical development
• Pharmacokinetic calculation and interpretation
• Immunogenicity assessment studies (ADA)
• Cell based assay for neutralising test
• Complete platform for ADC (LC-MS/MS and immunoassays available on site)

Accreditations:

• Good Laboratory Practices (GLP)
• FDA inspected

GERMANY

Eurofins BioPharma Product Testing Munich

Eurofins BioPharma Product Testing Munich supports your project in all phases from early development to commercialization. Our services during development include ADME, IND-enabling toxicology / PK studies, microbiology and clinical sample analysis. In late-phase and after market approval, Eurofins BioPharma Product Testing Munich provides immunogenicity assessment and bioassays for batch release.

Services:

• Process and Product Related Impurities
• Bioassays
• Method Development & Validation
• Stability & Release Testing
• Sterile & Non-Sterile Product Testing
• Leachables & Extractables Testing
• Immunoanalytical studies
• Bioanalytical studies
• Toxicology studies
• Pharmacology studies

Eurofins ViraCor

With over 30 years of specialized expertise in infectious disease, immunology and allergy testing for immunocompromised and critical patients, Viracor Eurofins is committed to helping medical professionals, transplant teams, reference labs and biopharmaceutical companies get results faster, when it matters most.

Viracor is passionate about delivering value to our clients by providing timely, actionable information — never losing sight of the connection between the testing we perform and the patients you serve.

Services:
Clinical and BioPharma laboratory testing services in the areas of Infectious Disease, Immunology, Allergy, Transplant Testing.

Accreditations:

• CLIA
• CAP

Also accredited by the following state agencies for clinical lab testing: New York, Florida, California, Maryland, Pennsylvania and Rhode Island.

PHARMA DISCOVERY SERVICES

The Eurofins Pharma Discovery Services business cluster, of Eurofins Scientific, was built by bringing together the market leading expertise of Panlabs (acquired in 2012 from Ricerca), Cerep (acquired in 2013) and EMD Millipore's Discovery & Development Solutions business (acquired from Merck KGaA in 2014). The combined expertise, knowledge and skill set of these companies brings our clients the additional benefit of a comprehensive portfolio of potency/efficacy, safety, and ADME-Tox assays supplied by a single provider. For >40 years, Eurofins Pharma Discovery Services has been a trusted CRO supporting Drug Discovery from Target Id through to Candidate Selection by offering a comprehensive package of >3000 drug discovery products and services, including in vitro pharmacology products & services, cell-based phenotypic assays, in vitro ADME-Tox, in vivo drug safety & efficacy services, and custom proteins & assay development services.

FRANCE

Eurofins Calixar

CALIXAR provides both purified membrane proteins that are off the shelf ready for use as well as membrane protein extraction kits to clients to work with the highest quality membrane proteins on the market.

Eurofins Cerep

Eurofins Cerep was founded in December 1989 in Poitiers, France, as a service company to provide solutions for drug profiling and drug screening in pharmacology, allowing faster and cost-effective drug discovery by identifying at early stages the most promising drug candidates, as well as eliminating those compounds likely to fail in development. Eurofins acquired Cerep in March 2013. Since 2014, Cerep, Panlabs and Discovery Services have merged into Eurofins Pharma Discovery Services.

Services:

• Target profiling

GPCR Binding, activity and cell-based assays Center of Excellence

Other targets binding, activity & cell-based assays

Custom assay development

Bioinformatics - BioPrint™
• Screening

Medium throughput capacity
• Discovery research products

Recombinant epigenetic proteins & enzymes

INDIA

Eurofins Advinus

Eurofins Advinus is your trusted partner for specialized discovery, preclinical and early clinical services. With over 30 years of GLP experience we have a proven track record of successfully delivering many integrated and stand-alone projects to meet our partner's requirements.

Our drug discovery services include:
• Medicinal and Synthetic Chemistry
• ADMET/DMPK
• Discovery Biology across various therapeutic areas.

We offer unparalleled combination of experienced scientists and technological resources ensuring consistency and precision in our deliverables.

TAIWAN

Eurofins Panlabs Taiwan

Eurofins Panlabs Taiwan Ltd was founded in Taiwan in 1970 and is a pioneer global contract research organisation focused on providing drug discovery services using molecular/cellular and pharmacology assays.

Our scientific portfolio consists of over 1,350 biological tests ranging from molecular assays to cell-based models, through proof of concept determinations. Eurofins acquired this entity in 2012. Since 2014, Cerep, Panlabs and Discovery Services have merged into Eurofins Pharma Discovery Services.

Services:

• Target profiling

Molecular Pharmacology (Enzyme, Radioligand binding, cellular biology, functional tissue pharmacology, and Microbiology)
• Preclinical

Pharmacology (Exposure/Safety, Anti-infective, CNS/Pain, Oncology, Inflammation/Allergy, Cardiovascular, Metabolic, PK, Renal, GI, Pulmonary/Respiratory, Hepatics and Metabolic Disease Models)

Tox and DMPK

Accreditations:

AAALAC-accredited and ISO 9001 compliant, Japanese JRS, International Guiding Principles for Biomedical Research (CIOMS), Agricultural Council (Taiwan) and NIH OLAW compliant (Foreign Assurance #A5890-01)

Eurofins Beacon Discovery

Our mission is to efficiently identify and advance molecules targeting GPCRs from concept to clinic. Our internal pipeline focuses on GPCRs for which the endogenous ligand remains unknown. These so-called orphan receptors provide exciting and unexploited opportunities to develop new drugs addressing significant unmet medical need. In addition, we are working with several Pharma and Biotech companies in collaborations that couple our strengths and our experience in GPCR drug discovery with our partners' demonstrated drug development expertise.

PHARMA EARLY DEVELOPMENT

Preclinical drug development is a complex, regulatory and strategy-driven process. The most important element of the preclinical process is to select the best new molecular entities to enter into the clinical trials and to limit failure in full development. With its countless years of professional experience in drug development Eurofins is well positioned to offer a holistic approach of the compound development in order to maximize the chances of success in the clinical phases.

Our network of expertise and full service is not only a matter of convenience but also an issue of confidence and security to succeed with your project. Our clients select Eurofins for this distinctive match of expertise, flexibility and full service. This beneficial setting explains why we work for 8 out of the 10 biggest Pharma companies.

FRANCE

Eurofins ADME BIOANALYSES

Eurofins ADME BIOANALYSES has been a Eurofins expert in pharmacokinetics and metabolism since 1987.

The laboratory is equipped with a LIMS Watson® coupled with ReportDesigner®.

Our bio-analytical team supports discovery, preclinical and clinical studies with method development, validation, and sample analysis in biological matrices for both small and large molecules (proteins, Peptides, Antibodies) with LC-MS/MS, Immunoassays and Immunogenicity assessment studies.

Services:

• Bioavailability and Blood Brain Barrier permeability screening tests
• ADME studies with radiolabelled molecules (14C or 3H)
• Development and validation of analytical methods in biological fluids and tissues according to FDA and EMA guidelines
• Bioanalysis to support pre-clinical and clinical trials for both small and large molecules
• Pharmacokinetics calculation and interpretation

Immunogenicity
• Specific expertise on bioequivalence studies and drug-drug interaction studies
• Dermal distribution and absorption studies on Franz cells or Bronaugh cells

Specific expertise:
• Analysis of Nicotine, Analysis of vitamins such as Calcitriol, 25-OH D2 and 25-OH D3
• Dermal distribution and absorption studies

Accreditations:
GLP compliant -successfully inspected by FDA on a bioequivalence study and inspected every two years by EMA.

Eurofins BioPharma Product Testing Munich

Eurofins BioPharma Product Testing Munich supports your drug development project in all phases from early development to commercialization. Our services during development include ADME, IND-enabling toxicology / PK studies, microbiology and clinical sample analysis. In late-phase and after market approval, Eurofins BioPharma Product Testing Munich provides immunogenicity assessment and bioassays for batch release.

Services:

• Process and Product Related Impurities
• Bioassays
• Method Development & Validation
• Stability & Release Testing
• Sterile & Non-Sterile Product Testing
• Leachables & Extractables Testing
• Immunoanalytical studies
• Bioanalytical studies
• Toxicology studies
• Pharmacology studies

Accreditations:

• Good Laboratory Practice (GLP)
• Good Manufacturing Practice (GMP)
• DIN EN ISO 17025
• FDA audited
• Listed by the World Health Organization (WHO)

Eurofins Genomics

Eurofins Genomics offers a comprehensive services portfolio for the entire drug development process, from preclinical research to clinical phase III trials.

The drug development service portfolio for the modern biopharmaceutical industry includes an exclusive marker set for the general identification

of responders/ non-responders in the scope of clinical studies and expert consultation by an academic partner in pharmacogenetics. In the field of GMP manufacturing we also offer solutions that can be addressed with genomics technology.

Together with other Eurofins companies like Eurofins Global Central Laboratory, Eurofins Optimed Clinical Research, and Eurofins BioPharma Testing Services a complete service package for even worldwide multi-central registration studies is offered.

Services:

• DNA/ RNA-extraction, e.g. for biobanking
• GLP compliant genotyping and sequencing
• High-throughput genotyping
• SNP, mutation and biomarker analysis
• Analysis of candidate genes
• Expression analysis by Real Time PCR
• Microarrays, e. g. SNP analysis and gene expression
• Biological safety testing, e.g. residual DNA testing or analysis of production strains and cell banks
• Next Generation Sequencing (NGS), like adventitious virus testing, tumour profiling/ cancer sequencing, exome sequencing, whole genome sequencing, transcriptome analysis
• Bioinformatics
• Virus and microbiological diagnostics: Virus load determination, genotyping, sequencing and quantitative analyses of viruses and bacteria
• Metagenomic analysis
• Oligo and Gene Synthesis
• Assay development and validation
• Scientific consultancy
• Comprehensive and well-founded consultancy prior to all projects/studies
• Professional project management during the complete project/study
• Dedicated project managers and study directors as competent and reliable contact persons

Accreditations:
The QM/QA-system of Eurofins Genomics is certified according to ISO 9001, including the requirements of ISO 13485 (medical devices requirements). Furthermore, we are accredited according to ISO 17025 covering molecular testing methods like Sanger sequencing (e.g. for genotyping within clinical trials), quantitative Real-Time PCR, fragment length polymorphisms analysis and mass spectrometry-based DNA analysis. In addition, ISO 17025 accreditation covers next generation sequencing with Illumina technologies.

Eurofins Genomics is also certified for the principals of Good Laboratory Practice (GLP) and compliant with Good Clinical Practice (GCP). We are consistently audited by clients from the pharmaceutical industry according to these GxP regulations. We also regularly perform facility and process audits. We are participating in external proficiency testing (ring trials) on a regular basis.

For further information on the broad portfolio of Eurofins Genomics please have a look on the International Business Line "Genomic Services" section/ Germany in this Group Directory.

PHARMA CENTRAL LABORATORY

Reliable, high quality laboratory data is pivotal to the success of clinical trials. Since laboratory testing is our sole focus, we go above and beyond to provide an array of services to ensure that any clinical trial sample is collected, transported, managed, analysed, reported and stored to meet the objectives and purpose of your study. We are dedicated to providing the most cost effective and efficient solutions to pharmaceutical and biotech companies, and CROs alike.

Eurofins Central Laboratory supports its customers across its wholly owned CAP accredited laboratory facilities in the United States, Europe and Asia. Our harmonized laboratories operate as one. All of our laboratories are connected to one global LIMS and are using the same global standard operating procedures and global reference ranges through the deployment of uniform instruments, reagents, and analytical methods to provide one global data set for submission to health authorities worldwide.

Services:

• Global Clinical Safety and Specialized Testing

A full package of routine and non-routine laboratory testing, including:

Allergy Testing
• Biomarkers
• Chemistry
• Coagulation
• Endocrinology
• Flow Cytometry
• Genomics
• Haematology
• Immunology
• Immunohistochemistry
• LCMS/MS
• Microbiology
• Molecular Diagnostics
• Pathology
• Serology/Virology
• Spectrophotometry
• Toxicology
• Biomarker Services
• PD - target engagement biomarkers, proof-of-mechanism and proof-of-concept biomarkers
• Biomarkers in clinical trials (exploratory and clinical end-point)
• Fit-for-purpose validation and analysis of commercially available biomarker assays
• Biomarker analysis in non-conventional biological matrices
• A broad range of applied technologies: ELISA, MSD, Luminex, Flow cytometry and LC-MS/MS
• Global Infectious Disease Services
• Central laboratory microbiology to support clinical trials
• Clinical virology services
• Scientific consultancy

Clinical trial supporting services
• Logistics Support and Courier Management
• Global footprint to ensure specimen integrity and optimal turnaround time
• One logistical operating procedure for all laboratory testing applications
• Dedicated specimen kit production facility

Customized collection kits
• Electronic requisition forms
• Customized Investigator Manuals
• Specimen shipping procedure, materials and courier contact information
• Track and trace
• Import and export license coordination
• Investigator Site Support
• Study specific investigator laboratory manual
• Study and visit specific specimen collection kits
• Summary flow charts for experienced users
• Visit specific test schedules
• Multilingual helpdesk for global support
• Daily results reporting by web, email or fax
• Access to real-time global results database via secured electronic requisition forms
• Sample Management and Storage
• Dedicated sample management department
• Registration in LIMS (double entry)
• Barcode labelling for sample tracking and automated results reporting into LIMS
• Third party lab shipment management
• Sample storage at 2-8 °C, -20°C and -80°C and liquid nitrogen storage
• Short and long term storage
• Project Management
• Global study set-up
• Study specific materials including investigator laboratory manual, specimen kits, shipping materials
• Training investigator sites
• Single point of contact for Monitor
• Monitoring timelines
• Issue management, query solving
• Budget management

Ensure all key deliverables are met

Track and report on KPMs
• Data Management
• Study priming in global LIMS
• Data cleaning
• Electronic data transfer in sponsor defined format
• CDISC compliant
• Daily results reporting using EMDP, fax and or print reports
• IT Systems and EMDP
• Flexible global IT infra-structure to accommodate clinical trials of any nature, size, foot print or complexity
• Global LIMS
• Real-time global results database via secured Eurofins Medinet Data Portal (EMDP)
• Study enrolment progress reports
• Flagging alerts for out-of-range test results
• Trend analysis tools
• Study specific, customized analysis tools upon request
• Global Quality Assurance
• Annual process audits cross

inspecting all Eurofins Central Laboratory facilities worldwide
• Data integrity audits
• Study specific audits
• Global document control
• Building and maintaining global standardized operating procedures
• Issue management coordination, analysis and improvement programs
• Key performance indicators

Accreditations:
Eurofins Central Laboratory uses several well-recognised international quality standards and regulatory guidelines to control its activities. Our Global Quality System (EMQS) is founded on the following quality standards: CAP, CLIA, ISO 15189:2007, ISO/IEC 17025:2005, OECD GLP guidelines and GCP guidelines.

THE NETHERLANDS

Eurofins Central Laboratory - Netherlands

At Eurofins Central Laboratory, we are the End-to-End solution to the BioPharma industry!

With our four standardized, wholly owned global locations [US, Netherlands, Singapore, China] and a back office in India, we provide CAP/CLIA certified analytical services in both a GCP & GLP environment. This allows us to combine safety and efficacy analysis with Biomarker Services embedded within one laboratory, introducing cost efficiencies into Sponsor study budgets, and increasing specimen integrity by reducing unnecessary transport. Reliable, high quality laboratory data is pivotal to the success of clinical trials.

It's the RESULTS THAT MATTER.

Since laboratory testing is our sole focus, we go above and beyond to provide an array of services to ensure that any clinical trial sample is collected, transported, managed, analyzed, reported and stored to meet the objectives and purpose of each study. We are dedicated to providing the most cost effective and efficient solutions to pharmaceutical and biotech companies, and CROs alike.

What differentiates Eurofins from the rest?

Innovation. Whether that is our specimen visibility tool, EzRF (web-based requisition), our home based, virtual trial patient specimen collection kits or our mobile laboratory technician service for standardized CAP certified on-site analysis of rapid analytical TAT requirements (PBMC, semen analysis, virology specimen processing), Eurofins Central Laboratory is your analytical solution for Phase 1 to 4 clinical trials.

Services:

- Safety Testing
- Efficacy Testing
- Biomarkers
- Microbiology
- Flow Cytometry
- PBMCs
- Mobile Lab Techs (onsite, standardized analytical services)
- Kits & Logistics
- Sample Management
- Data Management
- Investigator Services.

Accreditations:

Eurofins Central Laboratory uses several well-recognized international quality standards and regulatory guidelines to control its activities that are overseen by our Global Head of QA and Regulatory Compliance.

Our Global Quality System is founded on (CAP, CLIA, ISO15189:2007, ISO/IEC17025:2005, OECD GLP where applicable and requested, GCP).

Specifically, to our Breda, The Netherlands facility (CAP, ISO 15189:2012, ISO 17025:2005, OECD GLP, NGSP Level 1).

BIOPHARMA PRODUCT TESTING

Eurofins BioPharma Product Testing is the largest network of harmonized bio/pharmaceutical GMP product testing laboratories worldwide providing comprehensive laboratory services for the world's largest pharmaceutical, biopharmaceutical and medical device companies.

Our service offerings are fully comprehensive and include testing of drug substance, final product, intermediates, and starting materials for both small and large molecule drug products.

Our laboratories offer a broad range of methodologies under GMP authorization, ISO 17025 accreditation and ISO 9000 certification. All analyses are performed according to European and British Pharmacopeia (EP), United States Pharmacopeia (USP) and Japanese Pharmacopeia (JP), as well as specific customer methods.

With a global capacity of more than 2,250,000 square feet/ 200,000 square meters and facilities located in Austria, Australia, Belgium, Canada, China, Czech Republic, Denmark, France, Germany, Hungary, India, Ireland, Italy, Japan, Netherlands, New Zealand, Slovakia, Spain, Sweden, Switzerland, UK and US, our network of GMP laboratories operates under the same strict quality procedures, LIMS and centralized billing system across more than 40 locations worldwide.

Services:
Biochemistry
• Method Development & Validation
• Residual Impurity Testing
• Protein Characterization

Chemistry
• Extractables & Leachables
• Container Closure Testing
• Metals Analysis
• Method Development & Validation
• Impurities Testing

Facility Validation Support
• Pharmaceutical Water Testing
• Pharmaceutical Gas Testing
• Environmental Monitoring
• Disinfectant Validation
• Cleaning & Other/GMP Process Validations

Microbiology
• Non-Sterile Products Testing
• Sterility Testing
• Endotoxins Determination
• Identification of Microorganisms
• Mycoplasma Testing
• Antibiotic Potency Testing

Molecular & Cell Biology
• Potency Assays/ Bioassays
• qPCR Assays
• Host Cell Protein & ELISA Assays

Stability Storage & Testing
• Full ICH Stability Studies
• GMP Storage

Toxicology Services
• Alternative Toxicology
• Genetic Toxicology

Other Specialty Services
• Viral Safety Testing
• Viral Clearance
• Release Testing
• Raw Materials Testing
• Cell Bank Manufacturing
• Cell Bank Characterization
• Container Testing
• GMP NMR
• Radiolabeling
• Advanced Expert Analysis

GMP Manufacturing & Support
• GMP Aseptic Manufacturing (Fill/Finish)
• GMP Non-Sterile Manufacturing
• Formulation
• Clinical Trial Material, Packaging & Logistics

Antimicrobial/ Biocides/ Virucides
• Efficacy Testing
• Physico-Chemical & Analytical Studies

Cosmetics
• Chemical & Physico-Chemical Testing
• Microbiology
• Safety & Efficacy Studies

Human Factors Testing

CLINICAL DIAGNOSTIC SERVICES

A shared ambition: to offer all our patients the best possible care

Clinical diagnostics at the heart of the healthcare system

Clinical diagnostic tests are a key factor in 70% of medical decisions.

A central element in healthcare, clinical diagnostic testing today contributes to every stage of patient care: predisposition testing, prevention, diagnostics, theranostics and of course monitoring of treatments.

Innovating today for the health of all tomorrow

Eurofins stands for a conception of clinical diagnostics entirely focused on excellence, innovation and technological investment.

Genetics and genomics are gradually marking out the new outlines of tomorrow's clinical diagnostics and our labs are investing heavily in these advanced technologies (NGS, i.e. Next Generation Sequencing), which already have a large number of applications for many people from NIPT (Non Invasive Prenatal Testing) to predictive genetics of cancers or in personalized medicine that can offer patients individualized treatment based on their genetic and metabolic profiles.

The commitment of our laboratories: to work for public health

A healthcare service available to all

With tens of thousands of clinical diagnostic tests every day, the laboratories of the Clinical Diagnostics division strive to ensure that every patient, wherever he or she lives, is assured of access to the most specialized and most innovative techniques for diagnosis, monitoring and therapeutic adjustment.

With our logistics expertise and our daily sample collection and delivery network, we can guarantee perfect continuity in the provision of care, the same quality and the same access to innovation across all the regions that we serve to the benefit of patients and the medical profession.

Our local laboratories, our technical platforms and our high specialized clinical testing platforms are thus working in the service of public health, focusing on improving the quality and effectiveness of clinical diagnostics and giving all our partners access to state-of-the-art clinical biology, the biology of today and tomorrow in the service of a more personalized medicine.

Enabling equal access to the most innovative tests

Offering the most innovative tests to the wider population at a cost that is affordable for society, this is our mission.

While promoting prevention and screening, earlier and more accurate diagnoses, more efficient, faster and safer therapeutic management, and at the same time reducing diagnostic and therapeutic error and side effects of treatments, our laboratories also respond to the need to control health spending.

We therefore work closely with the health authorities, clinical pathology professionals and clinicians as well as with public and private hospitals to monitor developments in medicine and to reflect on the positioning, financing and innovation in clinical biology in the service of public health.

BAHRAIN

Eurofins Manara

Manara Medical Laboratories, established in Bahrain and covers other GCC countries. We offer broad laboratory services, including standard blood profiles, such as complete blood counts, coagulation profile, urinalysis, microbiology, clinical biochemistry, biomarkers analyses, drugs profile, metabolites and molecular diagnostic genetic tests. We're easily approachable with a quick turnaround time.

Eurofins Centro De Genomas

In more than a decade of commitment to scientific advancement, solid partnerships, and a lot of professionalism, Eurofins Centro De Genomas has become the reference laboratory in Molecular Medicine and Advanced Genetics for the Diagnosis and Monitoring of Infectious Diseases, Human Genetics, Molecular Oncology, the innovative Precision Medicine and the only laboratory in Brazil to have 4P Genomic Medicine!

Our goal is not only to provide diagnostic results, but also to promote balance of health in patients through preventive genetics.

Fundamentally, work for scientific improvement, and offer what is most valuable: The knowledge that generates more quality of life!

With a clinical staff specialized in the most diverse areas of molecular medicine and genetics, we have the collaboration of renowned professionals.

Eurofins Labatorio Itapema - Unidade Guarujá

Since its foundation, Itapema - Eurofins | Clinical prioritizes the quality of its services, always participating in the main quality control programs in the country, being the first company in the city to receive the Certificate of Excellence from the Brazilian Society of Clinical Pathology and Laboratory Medicine and Quality Certificate with international standards - ISO 9001:2000, through investments in specialized advisory teams, personnel training, various renovations, acquisition of new and modern equipment, in addition to a lot of dedication,

It currently holds the ISO 9001-2015 certification. In order for this certification to be renewed, Itapema undergoes a strict annual audit carried out by a specialized technical team from Fundação Vanzolini. Thanks to the efforts of its entire team, the laboratory has renewed its certification year after year.

Eurofins Biomnis Empreintes Génétiques

Biomnis Empreintes Génétiques is a specialised genetic fingerprinting laboratory with all the equipment and accreditations necessary to perform such tests (which are subject to very particular legal constraints).

Legal experts from the genetic fingerprinting laboratory are consulted in a variety of different fields, including evidence samples analyses (exhibits), profiles for the Criminal Registry, mitochondrial DNA sequencing and paternity tests

Services:
Biomnis Empreintes Génétiques has special skills in a number of areas:
• Trace analysis: this activity consists of simple isolated trace amounts (officially sealed exhibit samples) specimens follow orientated testing to define the human biological nature of the trace (with BlueStar® staining and specific CrimeScope® illumination); Genotyping of the trace on at least 15 sequences; Contact traces (material which cannot be seen by the naked eye) are harvested and their genetic material is concentrated to determine its nuclear DNA and genotype.
• Profiling for the Criminal Registry (the national genetic fingerprint data base) and of other individuals: double amplification and genotyping in distinct reactions for all identifications, even of homozygotes and those with a mutation in a priming sequence.
• Mitochondrial DNA: MtDNA sequencing from an isolated trace or from a sample of saliva or blood.
• Paternity tests: civil and criminal cases with direct genotyping to confirm or rule out direct parentage, brother- or sisterhood and even more distant relationships.
• Material from a prematurely terminated pregnancy to confirm or rule out direct relationships.
• Complex evaluations, specific procedures, emergency treatment, etc.

Accreditations:

• NF EN ISO 15189: 2012

Eurofins LifeCodexx

Headquartered in Konstanz (Germany), Eurofins LifeCodexx has been developing innovative and clinically validated non-invasive diagnostic tests based on the newest molecular analytical methods since 2010.

With the PrenaTest®, Europe's first non-invasive prenatal test (NIPT) for the determination of the most common chromosomal disorders in unborn children, launched in 2012, Eurofins LifeCodexx has been changing prenatal diagnostics considerably.

The test is performed within Germany in strict conformity with the highest quality standards as per the European Directive on In-vitro Diagnostic Medical Devices.

IRELAND

Eurofins Biomnis Ireland

Accredited to the ISO 15189 medical testing standard, Biomnis Ireland Medical testing (formerly Claymon Laboratories) is the leading independent provider of medical laboratory testing services in Ireland.

We are proud to offer our clients an accredited pathology service which uses the most sophisticated diagnostic equipment and techniques in all fields of pathology, including a dedicated pathology transport service, expert medical pathologist support and novel IT connectivity solutions to meet all of your pathology needs.

Biomnis processes over 250,000 patient tests per week, providing rapid turnaround times for over 2,500 clinical tests across all biomedical disciplines.

Services:

• Autoimmunity
• Allergy
• Microbiology
• Infectious serology
• Haematology
• Specialised biochemistry, physical chemistry and toxicology
• Immunochemistry
• Endocrinology
• Antenatal diagnostics
• Cytogenetics
• Histopathology & Cytopathology
• Fertility Testing

ITALY

Eurofins Genoma

Founded in 1997 Eurofins GENOMA Group operates mainly as a diagnostic partner for genetic, cytogenetic and molecular analyzes, with the aim of providing a complete genetic service able of meeting the most diverse needs in the diagnostic field. Eurofins GENOMA is considered one of the most advanced European molecular diagnostics laboratories, with three main offices, two in Rome and one in Milan.

Covering over 25 specialized areas, the company is a pioneer in non-invasive pre-natal testing (NIPT) in Italy and

leads the industry in innovative diagnostic tests in oncology.

The Eurofins GENOMA team is made up of over 200 professionals, including geneticists, molecular biologists, gynecologists, researchers and laboratory technicians, and performs over 200.000 analyzes per year.

Accreditations:

• ISO 9001:2015 Eurofins Genoma Rome and Milan
• ISO/IEC 17025:2017 Forensic Service in Eurofins Genoma Milan
• ISO 15189:2013 NIPT Service in Eurofins Genoma Rome (in progress)

Eurofins Genoma Milan

The Forensic Genetics Section of the Milan office of the Eurofins Genoma Group Laboratory is accredited 17025 since 2017 for the analysis of Forensic Genetics.

It performs service activities on behalf of the Italian Judicial Authority, Universities and Research Centers.

It performs also Service Activities for Private Investigators, Lawyers and Citizens.

It increases, with its work, the National DNA Database according to Law No. 85 of 30 June 2009 and subsequent Decrees.

It collaborates with professionals in the sector and the staff receives continuous updates by participating in courses and conferences.

The laboratory annually participates in various Proficiency tests organized by International Scientific Societies and receives periodic audits from Accredia and from Government Agencies (National Committee for Biosafety, Biotechnologies and Life Sciences - CNBBSV).

Accreditations:

• ISO 9001:2015 Eurofins Genoma Rome and Milan
• ISO/IEC 17025:2017 Forensic Service in Eurofins Genoma Milan

SPAIN

Eurofins Megalab (Laboratorio Central)

After 25 years of experience and a proven track record, Megalab is currently one of the largest laboratories in Spain.

We are a national leader in services, information, management and diagnostic tests clinical analysis and pathology. We also lead the management of intra-hospital laboratories in the country, with presence in 54 private hospitals that serve more than 4,500 beds.

We have a network of 60 laboratories covering the entire national territory and offer our services to all medical societies, health centers and hospital management companies. More than 500 centers send samples to our headquarters in Madrid, where we carry out about 10,000 tests per day.

We provide our customers with the latest technological advances in order to provide an effective response and quality service to our patients.

Eurofins Viracor

With over 30 years of specialized expertise in infectious disease, immunology and allergy testing for immunocompromised and critical patients, Eurofins Viracor is committed to helping medical professionals, transplant teams, reference labs and biopharmaceutical companies get results faster, when it matters most.

Eurofins Viracor is passionate about delivering value to our clients by providing timely, actionable information — never losing sight of the connection between the testing we perform and the patients you serve.

Services:
Clinical and BioPharma laboratory testing services in the areas of Infectious Disease, Immunology, Allergy, Transplant Testing.

Accreditations:

• CLIA
• CAP

Also accredited by the following state agencies for clinical lab testing: New York, Florida, California, Maryland, Pennsylvania and Rhode Island.

Eurofins Diatherix

Based in Huntsville, Alabama, Eurofins Diatherix is a highly-specialised laboratory providing cutting-edge molecular diagnostic testing services to hospitals and physicians using proprietary TEM-PCR™ (Target Enriched Multiplex Polymerase Chain Reaction) technology for precise detection of infectious diseases at high levels of sensitivity and specificity, and at very short turnaround times.

TEM-PCR™ is a breakthrough molecular multiplex technology that allows not only rapid DNA/RNA identification of multiple pathogens in a single sample, but also specific genetic drug resistance diagnostic, in as little as 6 hours. Diatherix has developed several diagnostic panels to identify multiple organisms in samples quickly and accurately, helping physicians and healthcare providers choose more effective antimicrobial therapy and improve patient outcomes. The company's service offering and expertise therefore fits perfectly with Eurofins' recent acquisition of ViraCor and its core competence in infectious diseases, immunology and transplant cases

CLINICAL TESTING SERVICES

FRANCE

Eurofins OPTIMED

Eurofins OPTIMED is located in the South East of France (Grenoble & Lyon). Since 1990, the company has offered services in Early Clinical Development (phase I/II) including Site Management Organisation & Biometrics.

Eurofins OPTIMED follows all international requirements to carry out clinical studies – ICH recommendation, Good Clinical Practices - and is certified ISO 9001:2000

Services:
Clinical studies with Healthy Volunteers in our own facilities:
• First into Human studies
• Pharmacokinetic studies
• Bioequivalence studies
• TQT/QTc studies
• Interaction studies
• Vaccine studies

Management of European Clinical studies with Patients:
• Project Management
• Monitoring and Site Management Organisation.

Biometrics:
• Data Management
• e-CRF
• Statistics
• Clinical Report

Accreditations:
Eurofins OPTIMED follows all international requirements to carry out clinical studies – ICH recommendation, Good Clinical Practices - and is certified ISO 9001:2000.

GERMANY

Eurofins Genomics

Eurofins Genomics offers a comprehensive services portfolio for the entire drug development process, from preclinical research to clinical phase III trials.

The drug development service portfolio for the modern biopharmaceutical industry includes an exclusive marker set for the general identification of responders/ non-responders in the scope of clinical studies and expert consultation by an academic partner in pharmacogenetics. In the field of GMP manufacturing we also offer solutions that can be addressed with genomics technology.

Together with other Eurofins companies like Eurofins Global Central Laboratory, Eurofins Optimed Clinical Research, and Eurofins BioPharma Testing Services a complete service package for even worldwide multi-central registration studies is offered.

Services:

• DNA/ RNA-extraction, e.g. for biobanking
• GLP compliant genotyping and sequencing
• High-throughput genotyping
• SNP, mutation and biomarker analysis
• Analysis of candidate genes
• Expression analysis by Real Time PCR
• Microarrays, e. g. SNP analysis and gene expression
• Biological safety testing, e.g. residual DNA testing or analysis of production strains and cell banks
• Next Generation Sequencing (NGS), like adventitious virus testing, tumour profiling/ cancer sequencing, exome sequencing, whole genome sequencing, transcriptome analysis
• Bioinformatics
• Virus and microbiological diagnostics: Virus load determination, genotyping, sequencing and quantitative analyses of viruses and bacteria
• Metagenomic analysis
• Oligo and Gene Synthesis
• Assay development and validation
• Scientific consultancy
• Comprehensive and well-founded consultancy prior to all projects/studies
• Professional project management during the complete project/study
• Dedicated project managers and study directors as competent and reliable contact persons
• Expert advice on the evaluation and interpretation of results

Accreditations:
The QM/QA-system of Eurofins Genomics is certified according to ISO 9001, including the requirements of ISO 13485 (medical devices requirements). Furthermore, we are accredited according to ISO 17025 covering molecular testing methods like Sanger sequencing (e.g. for genotyping within clinical trials), quantitative Real-Time PCR, fragment length polymorphisms analysis and mass spectrometry-based DNA analysis. In addition, ISO 17025 accreditation covers next generation sequencing with Illumina technologies.

Eurofins Genomics is also certified for the principals of Good Laboratory Practice (GLP) and compliant with Good Clinical Practice (GCP). We are consistently audited by clients from the pharmaceutical industry according to these GxP regulations. We also

regularly perform facility and process audits. We are participating in external proficiency testing (ring trials) on a regular basis.

For further information on the broad portfolio of Eurofins Genomics please have a look on the International Business Line "Genomic Services" section/ Germany in this Group Directory.

INDIA

Eurofins Clinical Genetics India

Eurofins Clinical Genetics India (ECGI) is working with Next Generation Technologies for molecular genetic testing and carrier screening for patients care.

Over the past decade, next-generation sequencing (NGS) has led to an exponential increase in our understanding of the genetic basis of disease, which has provided insights into molecular based prognosis & diagnosis.

ECGI's integrated approach is to create comprehensive map of genetic disease using automations and high through-put sequencing, genotyping & microarray tools to revolutionize the patient care. ECGI strive to make the genetic testing process affordable, efficient with actionable information to our researchers, clinicians and patients.

The ECGI team and its collaborators across the globe have rich expertise and experience in implementation of Omics technologies to create innovative solutions for Clinical Genomics and Genetics.

Services:

• Non-Invasive Prenatal Testing (NIPT)
• Medical Exome Sequencing
• Multigene NGS panel for Molecular Genetics Testing
• Genetic Carrier Screening

Accreditations:
(In Process)
• ISO 9001: 2015
• ISO/IEC 17025 (NABL Accredited Medical Testing)

JAPAN

Eurofins Clinical Genetics Japan

Eurofins Clinical Genetics K.K. is a clinical laboratory working with cutting-edge technology and providing new testing services in Japan.

The company was established in 2015 and started a non-invasive prenatal genetic testing (NIPT) service in 2016 by next generation sequencing (NGS).

Eurofins Clinical Genetics K.K. always offers the best quality service to support our customers.

Services:
Eurofins Clinical Genetics K.K. is providing NIPT services. We can handle samples from all over the world in our laboratory.

Accreditations:
Our laboratory is accredited by the College of American Pathologists (CAP). We also obtain the PrivacyMark system of Japan Information Processing Development Corporation (JIPDEC).

USA

Eurofin EGL Genetics

EGL Genetics specializes in diagnostic testing for the more common genetic disorders to the ultrarare. Industry differentiators include a comprehensive test menu spanning preconception testing to adult-onset genetic

disorders; 3 labs in 1; molecular genetics, biochemical genetics, and cytogenetic testing performed under one roof; board-certified laboratory directors and genetic counselors reporting out each case; and 47 years of clinical experience, making EGL the oldest clinical genetics laboratory in the United States.

With more than 500 US-based and international clients, EGL Genetics has a global reputation for quality.

Eurofins Viracor

With over 30 years of specialized expertise in infectious disease, immunology and allergy testing for immunocompromised and critical patients, Eurofins Viracor is committed to helping medical professionals, transplant teams, reference labs and biopharmaceutical companies get results faster, when it matters most.

Viracor is passionate about delivering value to our clients by providing timely, actionable information — never losing sight of the connection between the testing we perform and the patients you serve.

Services:
Clinical and BioPharma laboratory testing services in the areas of Infectious Disease, Immunology, Allergy, Transplant Testing.

Accreditations:

• CLIA
• CAP

Also accredited by the following state agencies for clinical lab testing: New York, Florida, California, Maryland, Pennsylvania and Rhode Island.

MEDICAL DEVICE TESTING

From implants and instruments to single-use and combination products, Eurofins Medical Device Testing provides the optimal strategy for all types of medical devices and delivers rapid turnaround times with the highest level of service and most advanced technologies.

With extensive knowledge of the commercialization process, regulatory requirements and scientific trends in the Medical Device Industry, our scientists and engineers have been assisting companies, large and small, with developmental testing and regulatory submissions for more than 25 years.

Our 16 state-of-the-art facilities throughout North America, Europe and Asia Pacific offer extensive capacity and the highest level of instrument technology, enabling us to provide the full scope of testing services required by the Medical Device Industry.

Eurofins Medical Device Testing can help develop and execute your test plans and navigate the regulatory pathway to market anywhere in the world. Our laboratories maintain quality systems compliant with cGMP, GLP, and ISO 17025, and conducts testing in accordance with ISO, ASTM, ANSI, AAMI standards, as well as custom test methodologies to meet the unique needs of our customers.

For a complete list of testing services for each country, please visit our website www.eurofins.com/medical-device/services/

EUROFINS CDMO

Eurofins CDMO is a leading global Contract Development and Manufacturing Organization (CDMO) that provides clients with Active Pharmaceutical Ingredients (APIs)/Drug Substance and Drug Product development for biologicals and small molecules. Science is our foundation and allows us to support small and major biopharmaceutical companies. Our sustainable and flexible methods help them achieve their pre-clinical and clinical milestones on time.

We are experts in breakthrough technologies for API development, highly potent compounds, poorly soluble drugs, lyophilisation processes and specific therapeutic areas (immunotherapies, orphan drugs, paediatric dosage forms, etc.)

Involved in the earliest steps, our highly-qualified project management team will propose a complete drug development strategy in compliance with regulations. Frequent communication through one single point of contact, our team's flexibility, troubleshooting mindset, customized solutions will help speed up the drug development process. Operating under strict quality procedures, Eurofins CDMO is accredited through the FDA, EMA, ANSM, ANSES, FAMHP, PMDA, and Health Canada.

Our goal is to build a sustainable partnership with our customers to support their drug development pathway.

Our service offerings include:
• Drug Substance/API development
• Solid State Research & Development
• Pre-Formulation, Formulation Development
• Analytical Development
• Non-GMP and GMP Manufacturing
• Clinical packaging and logistics
• Project management
• CMC RA

Choose Eurofins CDMO to help you:
• Move rapidly through the drug development value chain (API/DS and DP)
• Perform complex formulation screening and development
• Accelerate process development and scale-up under GMP compliance
• Achieve clinical & small commercial manufacturing batches (Sterile and Non Sterile)
• Provide clinical trial material including packaging and logistics
• Support regulatory compliance throughout each stage of the development cycle with full CMC-RA services

Eurofins Bioskin

Since its inception in 1992, bioskin has been recognized as a valuable partner for clinical trials in dermatological indications. Starting as a small Contract Research Organization (CRO) specialized in conducting early phase safety and efficacy trials, bioskin has grown into a full-service CRO offering global dermatologic consulting and regulatory services and all services for management of Phase I-IV drug trials and medical device studies.

We are unique in our understanding and capabilities for both early and late phase development of dermatological and related products. A core expertise is the development of innovative test designs, interpretation of study results, integrating biophysical measurement methods to deliver objective data about skin function and structure to support traditional clinical endpoints. For global early and late phase studies bioskin partners with selected, reliable partners throughout Europe, US, Latin America, Central & Eastern Europe and South Africa.

ROMANIA

Eurofins EVIC

Eurofins EVIC Romania was founded in 2004 in Bucharest, and it is ever since a reference center in the area for testing topical products.

Currently, the lab is a pharma-oriented experimentation center having 15 years of experience and characterized by continuous education and pursuing new developments. The center is specialized in testing borderline products and applied research, known and appreciated for the capacity of developing and performing customizable and high complexity projects.

The center is capable of working 100% GCP compliant, with the closest standards to pharma industry. Among the portfolio of Eurofins Evic Romania, there are edge-projects which include professional techniques (biopsy, tattooing etc.).

The team of professionals which include physicians and nurses, the benefit of a large and diverse subjects database, with access to specific criteria, as well as the setup of the laboratories, define the center as a state-of-the-art research facility.

Services:

• Documentation
• Clinical Safety Studies
• Clinical Efficacy Studies
• Consumer Tests
• Sensory Evaluation
• Clinical Microbiology

Accreditations:

• OHSAS 18001

THE NETHERLANDS

Eurofins Bactimm

Eurofins Bactimm is a microbiological contract laboratory with a focus on the pharmaceutical and medical device industry. Eurofins Bactimm also provides microbiological testing services to the health care and cosmetics industry.

Eurofins Bactimm was founded in the 1980s, originally as a manufacturer of microbiological culture media, specifically for clinical purposes.

Over the years, Eurofins Bactimm introduced testing services for the medical devices, food and veterinary industries as well as for hospitals. In 2000, EU-GMP certification was acquired in Nijmegen and a broad range of microbiological tests were introduced to the market, including testing of pharmaceuticals, suitability testing, qualification of irradiation processes, disinfectant testing and container closure testing.

In 2010, Eurofins Bactimm moved to newly built cleanroom facilities.

Services:

• Microbiological Quality Control Testing - AI's, raw materials, finished products and medical devices in compliance with cGMP
• Analytical Method Development and Validation
• Disinfectant Efficacy Studies
• Microbiological Contamination Control in Cleanrooms

Accreditations:

• GMP compliant
• ISO 9001: 2008
• ISO 13485: 2003

HEALTHCARE ASSURANCE

Established in 2019, Eurofins Healthcare Assurance is part of the Eurofins Group which combines more than 25 years of experience in the testing, inspection and certification (TIC) industry.

In February 2022, Eurofins Healthcare Assurance has completed the acquisition of Sisthema, a reputable Quality Assurance and GxP audit player which was established in 1999.

Since 2011, Sisthema has performed audits for the qualification of suppliers of APIs, raw materials, excipients, packaging materials, medicinal products, cosmetics and food supplements, and also for providers of pharmacovigilance, analyses, and distribution/storage services.

Both companies have joined forces and will operate under the Eurofins Healthcare Assurance brand with the same high level and quality of service they are used to.

Eurofins Healthcare Assurance is a global trusted partner providing business assurance services to identify and mitigate risks in the entire supply chain of customers in the cosmetic/personal care, pharmaceutical, and food supplements.

High quality, safety and integrity of healthcare products can only be achieved by implementing robust and effective management systems and processes. Eurofins Healthcare Assurance provides audit and certification, and training focused on safety management systems, process optimisation, risk and cost reduction and brand protection.

A large team of Eurofins experts can assist customers in the cosmetic/personal care, pharmaceutical, and food supplements industries to face the increasingly demanding and complex regulatory environment in which they are operating, solving industry challenges and informing unbiased business decisions.

Healthcare Assurance services are provided by a team of specialists from the Eurofins network and external qualified partners. Auditors are based in more than 25 countries, in

North America, Europe and Asia, where healthcare manufacturers and their supply chains are located.

Services:
AUDITS

Eurofins Healthcare Assurance's experts provide supply chain and distribution audits in a cost-effective and time saving manner for customers and audited sites with:
• Individual audits: carried out on behalf of one customer only, with our network of local auditors
• Shared audits: reduced price when number of customers increases, less audit sessions per audit sites
• Possibility to purchase existing reports which allow more customers to obtain assurance on their supplier sites without rescheduling or redoing an audit (following agreement with the audited site and owner of the report)
• Supply chain audits (suppliers and CDMO) and distribution flows, based on regulatory, international or customer standards:

o GLP: Laboratories used to perform all non-clinical safety studies which are intended to support research permits or marketing authorisation

o GCP: Clinical Research Organisation, Investigation Center, Data Center

o GMP: Finished Products, APIs and Excipients, Cosmetic Ingredients, Medical Device Components, Dietary Supplement Ingredients, Packaging Materials, Service Providers for Analytical Testing, Sterilisation, Maintenance, Validation…
• Distribution and post-market surveillance:

o GDP: Distribution centers, transportation

o GVP: Service providers for Pharmacovigilance activities

In addition, our team provides:
• Internal audits programmes
• Health Canada Audits for OTC
• Due Diligence Audits
• RGPD audits.

CONSULTING:
• Gap-analysis, definition of CAPAs and support in implementation
• Support in the implementation of new standards or regulations, and in preparation for an inspection by health authorities or customer audits
• Improvement of Quality Systems (CAPA, Deviation, Change control, Batch records, OOS, Risk Analysis…)
• Support on Quality Investigation, when industrial issues occurs
• Support in validation and regulatory filing requirements

TRAINING:
• Training in technical and quality standards
• In-house, classroom, webinar and e-learning options
• Customised or standardised, in English or local languages where applicable

Accreditations:
Auditing activities are compliant with EU, US, Canadian, Australian and Japanese regulations.

GENOMIC SERVICES

With facilities in Europe, the United States and Asia, Eurofins' genomic services deliver frequently used services such as DNA & RNA oligos and synthetic genes right through to genotyping, next generation sequencing and transcriptomics. The Eurofins' genomic services stand out for innovative technologies in the life science arena especially for pharma, diagnostics, food, agriculture, biotechnological and research markets.

Eurofins GenoSkan A/S

GenoSkan A/S uses a variety of advanced biotechnologies for genotyping and sequencing.

The Infinium HD assay technology from Illumina is a flexible platform which makes it possible to genotype a large amount of SNP markers for one individual at a time.

With this technology it is possible to use both customized SNP assays and to design own SNP assays. GenoSkan A/S offers customized SNP-assays for most species (human, cattle, pig, sheep, dog etc.)

GERMANY

Eurofins Genomics Germany

Eurofins Genomics is globally known for its innovative technologies in the life science arena including academic institutions, biotech and the pharmaceutical industry. The company has established an outstanding team of more than 600 talented genomics experts and a broad range of technologies in the field of genomic services, forensics, agroscience, pharmaceutical, environmental, food and feed testing at our fully automated production facilities in Europe, USA, Japan and India.

This unique team supports Eurofins Genomics' approach to offer best practices and flexibility for all clients – from academic institutions to large companies around the world.

Services:
Eurofins Genomic Markets

Pharma & Diagnostics

Eurofins Genomics has extensive experience in applying the different genetic analysis methods and techniques which are crucial for the entire drug development and production process:
• Preclinical phase through all phases of clinical trials (phases I, II and III)
• Quality control for production of biologicals

Comprehensive services are available for all your study or project needs in the field of analysis, research and development. Amongst others the Eurofins Genomics services portfolio covers DNA/RNA extraction for bio-banking, GLP-compliant genotyping and sequencing, biomarker analysis, residual DNA testing, adventitious agent testing via NGS or analysis of production strains and cell banks. These services are available from single sample analysis all the way through to the high throughput levels involving several thousand samples.

Agriculture & Food

Important traits in agricultural plants and livestock such as yield, drought resistance, pathogen resistance, feed efficiency and quality linked parameters are genetically encoded. Eurofins Genomics agrigenomics services support:
• Plant breeding
• Farm animal & pet breeding
• Food production & authenticity testing

Eurofins Genomics provides a flexible, competent service with global reach, high industry standards and scalable capacity. One of the in-house experts will be assigned as your project manager ensuring excellent support and communication. Together you will find the perfect solution for your genomic characterisation and marker identification projects by integrating the latest technologies for sequencing and genotyping.

Industrial Biotechnology

Eurofins Genomics can offer you individual genomics solutions from the companys' industry leading service portfolio. These include:
• DNA & RNA extraction services
• Genomic, metagenomic & genetic characterisation
• Characterisation of genetic variability
• Residual host cell and pathogen DNA & RNA analysis
• Design and production of synthetic genes, gene fragments and gene evolution libraries
• GMO & genetic insert characterisation
• Assay design & validation

Research

From frequently used services such as DNA & RNA oligos and synthetic genes right through to genotyping, next generation sequencing and transcriptomics, Eurofins Genomics can offer you a broad portfolio of solutions and services for your research:
• DNA & RNA Oligonucleotides
• Custom DNA Sequencing
• Next Generation Sequencing (NGS)
• Gene Synthesis & Molecular Biology
• Genotyping & Gene Expression Services

With a great deal of expertise and experience in handling all types of research projects, the Eurofins Genomics expert team employs more than 80 PhD's in all disciplines related to genomics to make your project a success.

Accreditations:
Focusing on providing excellent customer support, together with highest quality services, Eurofins Genomics ensures to remain as one of the world's leading genomic service providers. The company's QM/QA System is ISO 13485 certified. As an ISO 17025 accredited DNA-testing laboratory approved by DAkkS, Eurofins Genomics also offers testing services that are compliant to the principles of Good Laboratory Practice (GLP) and Good Clinical Practice (GCP).

INDIA

Eurofins Genomics India

Eurofins Genomics India is a leading provider of genomic services in India. Many of the top life science companies and academic research institutions in private and public sector are clients of Eurofins India.

Our focus is on customer convenience and providing high quality service. With a team of experienced and skilled manpower, Eurofins Genomics India has gained an excellent reputation as a reliable source of genomic products and services.

Services:

• Custom Oligonucleotide Synthesis
• DNA Sequencing
• Next Generation Sequencing
• siRNA
• Gene Synthesis
• Microbial Identification
• Fragment Analysis
• SNP Genotyping

• Microsatellite Analysis
• RAPD
• RFLP
• BAC DN

Eurofins Genoma Milan

The Forensic Genetics Section of the Milan office of the Eurofins Genoma Group Laboratory is accredited 17025 since 2017 for the analysis of Forensic Genetics.

It performs service activities on behalf of the Italian Judicial Authority, Universities and Research Centers.

It also performs Service Activities for Private Investigators, Lawyers and Citizens.

It increases, with its work, the National DNA Database according to Law No. 85 of 30 June 2009 and subsequent Decrees.

It collaborates with professionals in the sector and the staff receives continuous updates by participating in courses and conferences.

The laboratory annually participates in various Proficiency tests organized by International Scientific Societies and receives periodic audits from Accredia and from Government Agencies (National Committee for Biosafety, Biotechnologies and Life Sciences - CNBBSV).

Accreditations:

• ISO 9001:2015 Eurofins Genoma Rome and Milan

Eurofins Genomics

Eurofins Genomics offers a wide array of genomics services including DNA sequencing, DNA / RNA synthesis, Synthetic Biology, Next Generation Sequencing, Genotyping, Gene Expression, Microarrays, and bioinformatics for academic and industrial research.

We offer one of the fastest turnaround times for sequencing in the country, the lowest error rate in the industry for oligonucleotides, and our approach is highly service oriented.

Services:

• DNA / RNA Oligonucleotides with a variety of options, purifications and modifications available.
• DNA Sequencing in tubes, plates and kits.
• Gene Synthesis & Synthetic Biology
• Gene Fragments
• Next Generation Sequencing
• qPCR and MGB-eclipse probes
• Library Assays
• Applied Genetics: Genotyping, Gene Expression & Microarrays

Accreditations:

• CLIA accredited
• CAP accredited
• ISO 9001:2008
• ISO 13485:2003
• FDA 3009882691 for the manufacture of ASRs (Analyte Specific Reagents) for use in IVD product

Blue Heron Biotech

Blue Heron Biotech has been leading the gene synthesis industry since the very beginning. In 1999 we had one goal, to make gene synthesis an accessible service for the research community and beyond. Our sole focus is gene synthesis and cloning, providing you with a fully customizable experience and a dedicated team who specializes in difficult to build genes.

Our proprietary GeneMaker multi-technology platform enables us to synthesize nearly any construct, while online ordering and flat rate pricing provide a straight-forward process.

Services:
Blue Heron Biotech has been providing customers solutions for complex DNA synthesis for nearly two decades. Since 1999, Blue Heron has delivered millions of base pairs of perfectly accurate genes to customers worldwide.

Using our proprietary GeneMaker® multi-technology platform, Blue Heron will synthesize nearly any gene. Our history of delivering high quality DNA synthesis products to our customers, including top 20 pharma and biotech companies, has established Blue Heron as the gold standard in gene synthesis.

Our partnership with OriGene allows us to use their collection of expression vectors combined with Blue Heron's gene synthesis capacity. Located in Bothell, Washington, Blue Heron Biotech provides dedicated customer service, strict confidentiality, exceptional synthesis standards, and products made entirely in the U.S. Whether you need one gene or one thousand, the simplest sequence or comprehensive codon substitutions, our experts will deliver.

Utilizing multiple design techniques, we provide the right synthesis solution for challenging sequences. Blue Heron Biotech specializes in synthesis of complex DNA, including designs with hairpins, repeats, GC rich regions, and lengths over 20Kb.

We provide an unmatched level of service and attention to detail to give you the assurance that your project will be delivered as ordered and on time.

Eurofins BioDiagnostics

With extensive in-field knowledge of agriculture and the seed industry, as well as experienced analysts and state-of-the-art testing equipment and methodologies, BioDiagnostics serves the specific and changing needs of seed producers, seed retailers, plant breeders and those assessing the quality of seed, grain and oil.

Helping customers troubleshoot, ensure the high quality of their product, develop more precise, effective plant-breeding programs and more, we offer testing in a full range of need categories.

Services:

• Adventitious Presence
• Event ID and Zygosity
• Fatty Acid Profiling
• Genetic Fingerprinting
• Genetic Purity
• Germination, Vigour and Physical Purity
• Molecular Breeding
• Seed Treating
• Seed Treatment Analysis
• Trait Confirmation, Consulting

FORENSIC SERVICES

Our ISO 17025 accredited DNA laboratories offer a full range of testing services - from DNA extraction to high throughput DNA sequencing, SNP and scene of crime analysis.

From the analysis of conventional samples (blood, urine and oral fluids) through to the development and analysis of specialist samples (hair and nails), our range of detectable drugs and chemicals is unsurpassed across Europe.

BELGIUM

Eurofins Forensics Belgium

Eurofins Forensics Belgium is a multidisciplinary lab using many different analytical techniques. While the forensic team is usually involved in work for the police, the coroner and the criminal law courts, the counter analyses of biopharmaceuticals or control of agricultural products and environmental waste are also aspects of forensic toxicological work.

Our team consists of specialists who are the best in their field and always up-to-date on national and European regulations.

Services:
Services offered: analytical toxicology in body fluids and tissues (gases, solvents, medicines and drugs, pesticides, heavy metals, toxins), toxicokinetics, DNA genotyping (STR and sequencing), kinship and paternity testing, arson analysis, drugs prone to abuse, drowning analysis, risk analysis (REACH), and legal testimony.

Accreditations:

FRANCE

Eurofins Biomnis Empreintes Génétiques

Biomnis has a specialised genetic fingerprinting laboratory with all the equipment and accreditations necessary to perform such tests (which are subject to very particular legal constraints).

Legal experts from the genetic fingerprinting laboratory are consulted in a variety of different fields, including evidence samples analyses (exhibits), profiles for the Criminal Registry, mitochondrial DNA sequencing and paternity tests.

Services:
The Biomnis Genetic Fingerprinting Department has special skills in a number of areas:
• Trace analysis: this activity consists of simple isolated trace amounts (officially sealed exhibit samples) specimens follow orientated testing to define the human biological nature of the trace (with BlueStar® staining and specific CrimeScope® illumination); Genotyping of the trace on at least 15 sequences; Contact traces (material which cannot be seen by the naked eye) are harvested and their genetic material is concentrated to determine its nuclear DNA and genotype.
• Profiling for the Criminal Registry (the national genetic fingerprint data base) and of other individuals: double amplification and genotyping in distinct reactions for all identifications, even of homozygotes and those with a mutation in a priming sequence.
• Mitochondrial DNA: MtDNA sequencing from an isolated trace or from a sample of saliva or blood.
• Paternity tests: civil and criminal cases with direct genotyping to confirm or rule out direct parentage, brother- or sisterhood and even more distant relationships.
• Material from a prematurely terminated pregnancy to confirm or rule out direct relationships.
• Complex evaluations, specific procedures, emergency treatment, etc.

Laboratoire Toxlab

Toxlab is one of the leading independent analytical laboratories within France specialising in the provision of an unparalleled range of toxicology testing and support services to police & governmental institutions:
• Post-mortem toxicology
• Road Traffic Accidents
• Doping
• Investigation in Drug-Facilitated Crimes and Drug-Facilitated Sexual Assault
• Expert Witness interpretation in toxicology
• Analysis of seized street drugs. Detection of traces of narcotics on different materials (banknotes, cell phones, clothes)
• Workplace drug testing and toxicological analysis in occupational medicine (metals in blood, urine and hair, solvents)

With over 20 years' experience in toxicological analysis in a variety of matrices, especially for forensic cases, our ISO/CEI 17025:2005 accredited laboratory undertakes a comprehensive range of scientific analysis in accordance with international criminal justice standards.

State-of-the art technologies: gas chromatography coupled with flame ionization (GC-FID), with mass spectrometry (GC-MS, GC-MS/MS). Liquid chromatography coupled with diode array detector (LC-DAD), mass spectrometry (LC-MS/MS), refractometry (LC-Ref). Ultra high-pressure liquid chromatography coupled with diode array detector (UHPLC-DAD), mass spectrometry (UHPLC-MS/MS), head-space gas chromatography (HS-GC-MS)

Clients: French Justice and Police departments; British and American Coroners; French, British and American Lawyers; National Forensic Laboratories from Ireland, Norway; Private clients from France and all over the world

Services:

• Toxicological investigation to establish the cause of death: General Unknown Toxicology (GUT), Post-mortem Toxicology
• Analysis in Road Traffic Accidents (RTAs): blood alcohol determination (BAC) and urine alcohol determination
• Characterisation of the use of performance-enhancing in human and animal sports (Doping)
• Investigation in Drug-Facilitated Crimes (DFC) and Drug-Facilitated Sexual Assault (DFSA): blood, urine and hair analysis
• Expert Witness interpretation in toxicology. Testifying in Court
• Determination of heavy metals in blood, urine and hair (Occupational Medicine)
• Workplace drug testing (WDT): alcohol, narcotics, benzodiazepines, antidepressants. Toxicological analysis in occupational medicine (mainly metals and solvents)
• Analysis of seized street drugs
• Detection of traces of narcotics on different materials (banknotes, cell phones, clothes)

Accreditations:

Laboratoire Chemtox

Chemtox is a pioneer in the toxicological analysis of blood, urine, oral fluids and hair for the characterization and determination of a wide range of chemical compounds.

The ISO 17025 accredited laboratory provides services to the criminal justice and industrial clients throughout Europe, and delivers solutions and expertise with:
• Toxicological analysis for forensic investigation
• Expert Witness interpretation in toxicology
• Detection and quantification of pesticides
• Analyses of biopharmaceutical drugs, hormones and therapeutic agents
• Detection and quantification of volatiles substances (solvents, hydrocarbons) and gases
• Detection and quantification of metals and trace elements in blood, urine and hair

Services:
At the heart of the activity of the laboratory are forensic activities for French and European police and Courts of Justice in order to determine cause of death, screen for various toxins, alcohol use, drug searches or highlighting doping or food contamination.

Skills and experience in forensics allows for diversification of analyses to suit industrial sectors:
• Cosmetics: traces of heavy metals, toxicity
• Biopharmaceuticals: identification of undesirable compounds
• Food: detection of toxic contaminants, controlled substances (drugs, doping)
• Environment: environmental toxins and exposure of employees

Accreditations:

• NF EN ISO 17025

GERMANY

Eurofins Medigenomix Forensik

Eurofins Forensik was split from Eurofins Medigenomix in 2012 in response to continued growth and to better serve the highly specialised DNA forensics market. In DNA forensics and human identity testing, Eurofins Forensik is the leading private laboratory in Germany and one of the top laboratories in Europe for paternity testing.

We are part of the international Eurofins Forensics laboratory network (www.eurofins-forensics.com). Our specific strengths are high-quality, cost-efficient high-throughput analyses and our team of experienced experts. At our DNA campus in Ebersberg/ Germany, we have access to state-of-the art equipment and to a wealth of methods and new techniques which go far beyond the capabilities of other Forensics and Paternity Testing Laboratories

Services:
Our services are demanded by a wide range of national and international clients such as police forces, courts, lawyers, the legal system, industry, R&D organisations, academia and private persons.
• DNA profiling for inclusion into national DNA databases
• DNA profile interpretation and comparison for suspects - scene linkage and multiple scenes - incident linkage
• Analysis of Crime Scene Stains and evidences including court-compliant expert witness reports and court appearance
• Paternity Testing and complex relationship testing
• Ancestry Testing
• Court-compliant DNA sampling
• R&D Services
• Validation and optimisation of machinery and consumables used in DNA forensics
• Testing of consumables and devices for traces of human DNA, e.g. medical consumables, swabs, micro titre plates, pipette tips, syringes.
• Disaster Victim Identification
• Animal parentage testing
• Non-human DNA forensics, for example with food, animals, plant and unknown biological materials

Accreditations:

• Comprehensive ISO 17025 for Forensic Genetics
• Staff security vetted by the German Police
• Lab is regularly audited by Police forces for quality and security.
• Regular and long-term participation in numerous ring trials.

CONSUMER PRODUCT TESTING

The Eurofins Group provides testing, and certification, on the quality and safety of products to manufacturers, distributors and retailers. Our expertise encompasses a multitude of national and international specifications and regulations. The Group applies the highest technical standard to ensure impartial testing and independent judgement.

The Consumer Product Testing (CPT) Division covers the needs of retailers, brand owners, manufacturers and providers of raw materials, components and any other economic agent throughout the supply chain. The service scope of the Division ranges from regulatory support or assessment during the product development stage, to factory audits facilitating manufacturer consideration, all the way through testing, product validation, documentary checks, and certification during the pre-production and mass-production stages, down to inspections and pre-shipment testing before expedition or warehouse inspections, control plans and failure analysis once the products are in market.

The Consumer Product Testing Division comprises several separately managed “International Business Lines”. These International Business Lines group together laboratories that are focused on the same specific industries, for example;
• Cosmetics & Personal Care
• Digital Testing & Cyber Security
• Digital Media
• Electrical & Electronics and Industrial Services
• Softlines & Leather

For information on laboratories serving the above listed business lines, please refer to the corresponding section in this Directory.

In this section, named “Consumer Product Testing”, you will find the laboratories in the Division which are not specific to any of the above business lines, but instead serve multiple industries and therefore cover a vast array of consumer products, including most product ranges in industries including:
• Household products (furniture, decoration, bazaar, hygiene, detergency, appliances, lighting, kitchen and tableware, etc.)
• Toys and childcare
• Outdoor (camping, luggage, sports, garden products, etc.)
• DIY / Home improvement

In other words, the Eurofins CPT Division cares for the safety, quality and compliance of any product you might find in your house or garden.

Eurofins TA Group (Shanghai)

TA is a professional third-party testing and evaluating service provider. TA headquarters in Shanghai, and has a branch in Shenzhen.

TA is positioned in providing certification and testing services on communication products, electrical and electronic, wireless internet, and so on. So far, TA has established many professional labs for national and foreign testing and certification. These labs including SAR, OTA, Wi-Fi, Bluetooth, RF, EMC, Safety etc.

TA's OTA chamber has passed CTIA recognition. TA got the authorization of mobile operator--Vodafone, and TA got Wi-Fi Alliance's authorization, and can provide Wi-Fi interoperability test for members locally. TA built many RF testing systems, these systems can provide 2G3G4G5G Wi-Fi, Bluetooth RF test for communication terminal products, completing relevant CE, FCC test projects.

TA constantly improve its own technical capacity, at the same time, TA also widely carry out various types of cooperation with other laboratory, through the data comparison, technical seminars and other activities, to ensure the test data scientific and rigorous, and provide customers more perfect and rapid testing and certification services.

As a global third-party testing and certification organization, TA always takes the principle of scientific, rigorous, and fair to provide customers certifications to enter global market. We will make our contributions for customers.

DENMARK

Eurofins Product Testing Denmark

Eurofins Product Testing A/S specialises in the testing, consultancy and certification of the chemical safety of consumer products all over the world.

The laboratory offers a broad range of services to the manufacturing industry and importers including:
• Construction Products and Paints
• Packaging
• Food Contact Materials
• Drinking Water Installation Products
• Personal Protective Equipment
• E-cigarettes
• Furniture
• REACH (phthalates)

Services:
VOC Emission Testing is a core service of Eurofins Product Testing Denmark A/S. The laboratory is a global market leader both in its field and within the Eurofins Group network. We have internationally recognised experts operate the highest number of emission test chambers worldwide, documenting product performance relative to national VOC regulations and various labels, e.g. EMICODE, Blue Angel, LEED, AFSSET, AgBB and Eurofins Indoor Air Comfort (Gold).

Drinking Water Installation Products is also one of our key areas. We offer everything from chemical assessment and material evaluation, to hygienic testing and factory inspection. Our team of consultants and assessors form the basis of capabilities and expertise, which support the mission to become a preferred global supplier of testing and certification services (KTW-BWGL) for drinking water installation products.

Food Contact Material Testing and Consultancy is another of our core services where we offer a comprehensive range of services. We offer testing of materials and articles intended to be in contact with food in accordance with current national and international legislation. We can also assist you in establishing a test program that meets your needs for consultancy and testing with an independent 3rd party role.

Other services include:
• Factory Inspection, Auditing & Certification
• Overall- & Specific Migration Analysis
• Chemical Content Analysis
• Troubleshooting
• Sensory Evaluation (water and construction)

• Consultancy in relation to eco-labelling, emission testing and food contact materials

Accreditations:
ISO 17025:2017 (DANAK 522) accredited for the following methods:

VOC emission - testing
• Blue Angel Test/DE-UZ
• AgBB/DIBt
• GEV-Prüfmethode/EMICODE
• AFSSET
• ANSI/BIFMA M7.1
• CDPH SM v.1.2

GERMANY

Eurofins Consumer Product Testing Germany

Eurofins Consumer Product Testing (CPT) GmbH specialises in analysis of products for the following industries:
• Cosmetics
• Cosmetic Packaging
• Hygiene and Paper Products
• Biocides
• Detergents
• Toys
• Food Contact Materials (FCM)
• Household Products

A highly skilled and experienced team of chemists, food chemists, and engineers is specialised in analysing samples using accredited methods. The laboratory focuses on chemical testing by applying state-of-the-art techniques such as GC-MS/MS and LC-MS/MS. CPT's expert team evaluates your testing results in order to meet the current national, international, and European legislation. Further, CPT's experts provide solutions tailor-made to your specific needs.

Due to analytical test reports CPT supports the complete international supply chain: supplier of raw materials, producers, importers, as well as retailers, consumer organisations, and authorities.

Services:

• Chemical & Physical Analysis
• Migration Tests (OML, SML, NIAS)

Eurofins Rubber Testing Malaysia

To ensure the quality of dried natural rubber meets its required specifications, Malaysian Rubber Board (MRB) has regulated the testing of dried natural rubber before being certified as SMR (Standard Malaysian Rubber). This certification has to be conducted prior to import and export activities. SMR certification is to be conducted by laboratories under MRB or authorised independent laboratories nationwide and, Eurofins North Malaya Laboratory Sdn, Bhd. is one of them.

Under requirement by MRB, the parameters to be tested for SMR certification are dirt, volatile matter, ash, nitrogen, rapid plasticity and plasticity retention index, Mooney viscosity and rheometric cure test. Besides these basic tests required for SMR certification, NML is also performing other general studies for SMR (density determination, bale packing bag materials identification, vulcanisation studies and foreign substance identification etc), specification testing for TSR (Technically Specified Rubber) and

specification testing for rubber & latex.

From serving the rubber industry in rubber testing for the past 30 odd years, NML has learned the legislative and specification requirements imposed by the regulatory bodies; and we feel privileged for being able to play a part in the import-export of one of the major commodities of Malaysia. Whether you are a newcomer or an existing player in rubber industry, our expertise and experiences will be of use to you.

Accreditations:

• ISO/IEC 17025
• SAMM 090
• SMR certification (Malyasian Rubber Board)

SPAIN

Eurofins Product Testing, Cosmetics & Personal Care Spain

Eurofins Product Testing, Cosmetics & Personal Care Spain, S.L.U has over 25 years' experience in providing analytical control services to raw material manufacturers, suppliers, finished article producers (brand and private label) and retailers.

Our highly skilled and experienced team of chemists and engineers is specialised in analysing samples using accredited methods and evaluating the results according to relevant Spanish and European legislation, including respective guidelines and recommendations.

Eurofins Product Testing, Cosmetics & Personal Care Spain, S.L.U has specialised experience in Cosmetics, Detergents, Food Contact Material, Sensory Analysis and Technical Regulatory Consultancy.

Services:
1. TESTING:
• Food Contact (overall migrations)
• Performance Testing - Detergents
• Eco-label Performance Testing
• Performance Testing - Household
• Cosmetics Testing - Performance, Security & Control
• Detergent, Paper & Polymeric Materials Biodegradability
• Qualitative Studies
• Packaging Testing
• Concept Acceptance Testing
• Developing Consumer Insight
• Screening Testing

2. LEGAL AND TECHNICAL CONSULTANCY FOR PRODUCT LABELLING:
• Adaptation of the DSD/DPD classification and labelling system to the new CLP requirements; reducing adaptation process costs to the retail sector
• Labelling development based on MSDS
• Technical label translation to Spanish and Portuguese
• Label revision to detect and ensure that any national requirements shall be applied to commercialize in the Spanish and Portuguese market.
• MSDS (Material Safety Data Sheet)
• MSDS adaptation to CLP regulation
• Classification of chemical substances and mixtures
• Technical MSDS translation to Spanish and Portuguese
• Revision to detect and ensure the application of all national label requirements for the Spanish and Portuguese markets

3. INSPECTION AND AUDIT:
• Product inspection and auditing of suppliers' quality system

TURKEY

Eurofins Consumer Product Testing Turkey

Eurofins Consumer Product Testing Turkey, located in Mahmutbey, Istanbul, is a one-of-a-kind testing laboratory focused on a complete range of product categories within the

fashion and retail industry including apparel, footwear, toy safety, accessories and the safety of children's products, from raw material stage to ready-to-wear/use stage.

As is required by law, consumer products must be safe for users. Eurofins has extensive knowledge of the legislation which is required and applicable to various products across many markets.

Eurofins Consumer Product Testing Turkey has the required accreditation to provide technical competence and perform textile, leather, footwear and fashion accessories products testing.

Ministry of Trade Footwear Testing

Eurofins Consumer Product Testing Turkey facilitates Phthalates, Chromium VI and Organic Tin Compound testing on behalf of the Turkish Republic Ministry of Trade according to Communiqué on Import Supervision of Some Consumer Products (Product Safety and Inspection: 2018/18) by the Ministry of Economy General Directorate of Product Safety and Inspection, published in the Official Gazette (Issue 30286 Reps) on 31 December 2017 by the Import Inspections Department.

Services:

• Chemical
• Azo Dyes
• Formaldehyde
• Allergenic Disperse Dyes
• Lead & Cadmium Content
• Nickel Release
• Heavy Metals
• Phthalates
• Chromium VI
• Chlorinated Phenols
• Organic Tin Compounds
• Polycyclic Aromatic Hydrocarbons (PAH)
• Alkylphenols / Alkylphenol Ethoxylates (APEO)
• Chlorinated Organic Carriers (COC)
• Others
• Mechanical
• Fibre Content
• Colour Fastness Tests
• Pilling Resistance
• Abrasion Resistance
• Tear Strength
• Tensile Strength
• Flammability
• Seam Slippage
• Dimensional Stability
• Zipper Slide Fasteners
• Flammability

Accreditations:

• Nº AB-1356-T for textile and leather materials, issued by the Turkish Accreditation Body (TÜRKAK), according to the ISO/IEC 17025:2012 standard

Eurofins ED&D

ED&D is a world-leading manufacturer of industrial test equipment for product safety applications. Products are made in accordance with various IEC, CE, CSA, UL, VDE, MIL, EN, ASTM or other national and international standards. We offer the world's largest selection of product safety test equipment, many of which are in stock.

Our 22,000 square foot headquarters is located in Cary, North Carolina – in the heart of the prestigious "Research Triangle Park" region. We are located within a few miles of the Raleigh-Durham International airport, offering a major convenience to visitors.

This facility includes a cutting-edge Training Room, a "dry" lab for electrical tests, as well as a massive, state-of-the-art "wet-test" lab for Ingress Protection (NEMA and IP Code) testing… the labs are used not only for calibration but for product testing as well

CONSUMER PRODUCTS ASSURANCE

Eurofins Consumer Products Assurance (Eurofins CPA) offers comprehensive supply chain assurance to the consumer product industry through factory audit, product inspection and training. Data intelligence solutions from Eurofins Assurance OnLine, an online platform developed by Eurofins Assurance, support buyers and suppliers to achieve compliance and continuous improvement across a number of parameters, including social and labour, environmental, security, technical, product quality and people capacity.

Our solutions provide global buyers with maximised visibility of their complex supply chains, supporting them to ensure compliance with industry standards and local regulatory requirements. Our compliance and quality expertise in the manufacturing industry empowers customers to navigate the multifaceted and versatile components of the consumer product supply chain.

With a presence in over 35 key manufacturing locations across Asia, Africa, Europe and South America, Eurofins CPA's highly experienced inspectors and auditors execute compliance and audit programmes for industry organisations and customers locally.

Services:
Factory audit

We offer a full suite of factory audit services, covering social, environmental, technical and security compliance. Eurofins is approved by various audit industry standards and audit associations, including the Association of Professional Social Compliance Auditors (APSCA), amfori BSCI, Sedex, Social & Labor Convergence Program (SLCP) and the Initiative for Compliance and Sustainability (ICS)

To deliver extensive and comprehensive assurance to brands and retailers, we have developed Eurofins Market Standard Audit Services. Buyers can leverage our assurance expertise and avoid having to establish their own the programmes.

We have received accreditation and approval from major social compliance audit programmes, including amfori BSCI, the Initiative for Compliance and Sustainability (ICS) and the Social & Labor Convergence Program (SLCP). As a Full Member Firm of Association of Professional Social Compliance Auditors (APSCA), Eurofins is committed to delivering stringent professionalism, consistency and credibility in all social compliance audits it undertakes.

Product inspection

Product inspection by third-party service providers allows for an objective and accurate view on the conformity and compliance of your purchasing orders in terms of its conformance with production specification such as workmanship and measurement, packing specification, on-site testing and other requirements set out by buyers.

Our inspection team is well-trained to assess various consumer products from garments to footwear, accessories, home textiles, toys and gifts, furniture, kitchenware, electronic and electrical appliances and baby and nursery items.

We work in accordance with the Acceptance Quality Limit (AQL), the industry standard for product inspection, as defined by ISO 2895. Buyers can indicate their preferred sampling quantity by lot size, inspection type and acceptance level, or our team can provide suggestions and guidance to tailor the best inspection programme to meet customer needs.

Training

Empowering teams and colleagues along the entire supply chain, whether they are your suppliers or your employees, optimises their capabilities and productivity and allows you to remain competitive in the fast-paced consumer products industry. It is also a great way to boost trust and collaboration.

We offer regular training on the latest trends in supply chain management and optimisation to help our customers build the capabilities of their own teams and suppliers.

ITALY

Eurofins Product Testing Italy

Eurofins Product Testing Italy is a leading Italian laboratory which specialises in many sectors of product safety conformity assessment, specifically Electrical & Electronic, Mechanical & Environmental and Acoustic testing and phonometers and accelerometers calibration testing. Eurofins Product Testing Italy has been acknowledged as a Product Testing & Certification Center of Excellence according to international regulation & standard and European Directives.

Services:

• Medical Device
• Personnel Protective Equipment
• ATEX and IECEx, Machinery
• Pressure Equipment
• Transportable Pressure Equipment
• Lift Safety and Conformity Testing
• Noise Emission
• EMC

Accreditations:

• International IECEx Certification Body (ExCB) and Test Laboratory (ExTL)
• European Notified Body n. 0477 (accredited by ACCREDIA according to ISO/IEC 17065)
• Certification Body for ISO 13485 Scheme - Quality Management System for Medical Device (accredited by ACCREDIA according to ISO/IEC 17021)
• Test Laboratory and Calibration centre (accredited by ACCREDIA according to ISO/IEC 17025

Eurofins Modulo Uno Turin

Eurofins Modulo Uno is a recognised Italian Inspection Body that assesses the safety conformity of in-service products, machinery, equipment and installations.

Services:

• Safety & conformity third party inspections on Lifts, Cranes, Pressure Equipment, Transportable Pressure Equipment & Electrical Installations
• Voluntary inspections on Gates, Bank Safety Systems
• Thermographic analysis

Accreditations:

• UNI CEI EN ISO/IEC 1702
• UNI EN ISO 9001:2008

KOREA

Eurofins MET Korea

Eurofins MET Laboratories has come to be synonymous with outstanding customer service and an unwavering commitment to excellence in our over 50 years of existence.

Eurofins MET Korea continues that tradition by providing excellent customer-oriented service in the Korean market. We understand the importance of time when it comes to exporting your products to the market outside of Korea.

At Eurofins MET Korea, our goal is not to meet our customers' expectations, it's to exceed them. We view our customers as our partners, and we have succeeded in providing them a place to fill all of their compliance needs. I invite you to learn more about our company through the pages of this website. We will continue to strive to make a difference in the testing industry and to Certify the World, One Product at a Time.

Services:

• Product Safety Certification for North America
• NRLT, Canada SCC, and IECEE-CB Scheme and EU-CE
• Field Evaluation service
• SEMI S2, S8, S22 and F47 for evaluation report
• Reliability test Service
• EMC and FCC

Accreditations:

• Nationally Recognized Testing Laboratory (NRTL) – OSHA
• Inspection Body for Product Safety and Certification Body – SCC
• CB Scheme accredited Safety Test Laboratory (CBTL)

THAILAND

Eurofins Product Service (Thailand)

Eurofins Product Service Thailand Co. Ltd. is an ISO/IEC 17025 (A2LA, TIS) accredited testing laboratory for electrical and electronic products, located in Bangkok, Thailand. The laboratory offers EMC (Electro Magnetic Compatibility) and Electrical Safety Energy Efficiency tests, as partial or full product testing in line with international standards.

Services:

• Full Product Testing or Partial Testing for EMC
• Electrical Safety and Energy Efficiency test for Household appliance
• Audio & Video Equipment / Acoustic Test for Household and similar electrical appliances
• Application services for registration of electrical consumer products in Thailand

Accreditations:

• Accredited Test laboratory according to ISO/IEC 17025 by A2L, GAC and TIS 17025 by TISI
• Recognized certification body by EMSD - Reg. ARCB0103

UNITED KINGDOM

Eurofins York Ltd

Eurofins York Ltd was founded in 1995, with its origins in the University of York's Department of Electronics, is a trusted global provider of product testing, certification, consultancy, training and instrumentation services.

Eurofins York Ltd operates across four sites in the UK which include three United Kingdom Accreditation Service (UKAS) accredited test laboratories and our York office which is home to our Expert Services and Test Instrumentation businesses.

Services:
1) Testing (Bristol, Castleford and Grangemouth Laboratories)

Accredited testing services to enable CE marking and global market access
• Electromagnetic Compatibility (EMC Directive)
• Wireless (Radio Equipment Directive)
• Electrical Safety (Low Voltage Directive)
• Electromagnetic Fields (EMF Directive and Health and Safety at Work legislation)
• Shielding Effectiveness Measurements
• On-site EMC and EMF Testing at Customers' Premises
• Electromagnetic Site Surveys (UK-wide and globally)
• Railway Specific Measurements

2) Expert Services (York Office)

Consultancy and research in the fields of regulatory compliance and management, bespoke testing and RF engineering:
• EMC Management
• Railway EMC Compliance
• Bespoke Electromagnetic (EM) Measurements
• RF Research including Novel and Bespoke Solutions
• Standards Gap Analyses
• Technical Documentation
• Electromagnetic Modelling
• Product Compliance Reviews
• Test and Measurement Facility Reviews
• Notified Body services for 2014/30/EU

3) Test Instrumentation (York Office)

A range of Radio Frequency (RF) verification and measurement equipment:
• Dual Mode Comb and Continuous Broadband Noise Sources
• Continuous Broadband Noise Emitters
• Comb Generators
• Harmonics and Flicker Generators
• Compact Emissions Measurement Antenna
• Cable Coupling Clamp

4) Training Courses (York Office)

Training for a range of regulatory aspects associated with CE Marking directives and RF engineering; available as scheduled, in-house, bespoke and online courses:
• EMC Management and Control
• EMC Testing
• EMC Design
• Railway EMC Management
• Understanding Antennas and Electromagnetic Theory
• EMC Directive 2014/30/EU
• Radio Equipment Directive 2014/53/EU
• Low Voltage Directive 2014/35/EU
• EMF Directive 2013/35/EU

Accreditations:

• ISO/EN 17025 (UKAS)
• IECEE CB Scheme
• FCC
• MET Laboratories (including factory audits)
• VCCI
• Mutual acceptance with many National Certification Bodies
• ISO 9001
• RISQS, CIRAS, PTS (Transport industry)

Certification Management Limited

Certification Management Limited (CML) was established in June 2013. Offering a complete range of compliance services, we are an EU Notified Body (No 2503) for the European Union Directive 2014/34/EU (ATEX). This is supported by our UKAS accreditation (No 8175) to ISO/IEC 17025 and ISO/IEC 17065 and our full scope of accreditation allows us to issue any type of certificate.

Appointed in 2014, we are also an IECEx Certification Body (ExCB) and Test Laboratory (ExTL) with the full scope of standards.

Additionally, CML B.V. a subsidiary of CML UK, is an EU Notified Body (No 2776) for European Union Directive 2014/34/EU (ATEX). It is supported by its RvA Accreditation (No C640) to ISO/IEC 17065. CML B.V.'s full scope of ATEX notification can be found on the EU Nando website.

In line with our growth, we maintain the right technical mix and number of staff and this has grown from the initial 2 founding directors to 33, including 16 certification engineers and 7 laboratory technicians. A vital part of our growth is played by our large laboratory capacity with highly accurate and high-quality equipment.

Our first ATEX and IECEx certificates were issued in September 2013 and April 2014 respectively and we have issued over 2,500 certificates to date.

GERMANY

Eurofins WKS Labservice

Eurofins WKS Lab service GmbH is a joint venture between Eurofins and WKS Textile solutions, located in Wilsum, Germany.

Eurofins WKS Labservice provides lab testing for the textile and clothing industry, namely testing of fibres, yarns, fabrics, clothing/apparel and similar products. The laboratory is accredited according to DIN EN ISO/IEC 17025.

Eurofins WKS Labservice customers benefit from the combined knowledge of the global Eurofins textile laboratory network and the unique and deep textile knowledge of WKS Textile solution, which goes far beyond routine textile testing and includes specialised textile know-how, damage analysis and troubleshooting and repair services on fabrics and ready-made articles.

Services:

• Physical Tests
• Colour Fastness Tests
• Washing Trials
• Dimensional Stability to Washing/Ironing
• Abrasion & Pilling
• Fibre Composition Tests
• Strength Tests, Elongation, Elasticity
• Fit-for-use Tests
• Standardised Chemical Dry Cleaning
• Labelling
• Fabric Inspection (length and defect control on fabrics)
• Certification Approval

Accreditations:

• DAkkS (ISO 17025)
• Members of Industry Associations: German Fashion, DTB, DTV, BSR, DGQ, VDTF
• Member of DIN Standardization Committees

INDIA

Eurofins Product Testing India

Eurofins is a leading international third-party testing, inspection and certification body and a provider of risk control management solutions. Relying on our internationally authoritative, elite technical team, Eurofins is specialized in localized innovative services, providing expert quality management support for "Make in India" and "Made in India" products.

It is our endeavour to be a Quality Assurance and Quality Control solution provider for the business involved in retail, import and manufacturing of wide variety of consumer products.

Services:
Relevant tests in textile, shoes and fashion complements:
• Physical Tests: Evaluation of the aspect of the fabrics and garment during the life cycle
• Pilling Resistance
• Abrasion Resistance
• Water Repellence Test
• Absorption Capacity
• Tensile Strength
• Tear Strength
• Bursting Strength
• Elasticity and Remaining Deformation
• Seams Resistance and Slippage
• Mechanical Test; evaluation of the strength and durability
• Laundering; evaluation of the behaviour of articles on domestic laundry processes
• Colour Fastness; evaluation of colour against physical and chemical agents
• Accessories Testing
• Flammability; evaluation of fire behaviour on fabrics and garments
• Inspections

Accreditations:

• NABL (ISO 17025)
• CPSC

SPAIN

Eurofins Textile and Footwear Spain

Eurofins Textile and Footwear Testing Spain is one-of-a-kind testing laboratory focused on a complete range of product categories within the fashion and retail industry testing apparel, children's wear, footwear, bags, belts, accessories (jewellery, sunglasses, etc.) from raw material stage (chemical products, fabrics, leather, trimmings) to final product.

Located in Alicante, one of Spain's most dynamic and diversified industrial areas, Eurofins Textile and Footwear Testing Spain has developed strong competences in different areas of their field of expertise (Mechanical & Chemical Testing, Children Safety etc), with access to an outstanding global network of services in heavily manufacturing countries (China, India, Vietnam and Turkey) and technical support in labelling, compliance and market access.

Eurofins Textile and Footwear Testing Spain has extensive testing experience in Textiles, Footwear, Leather, Bags, Belts & Accessories, Metal & Hardware, Chemicals and Childwear Safety. As a Eurofins competence centre, Eurofins Textile and Footwear Testing Spain provides local expertise in their specific field to the international Eurofins laboratory network, contributing to the Group's global offering. As such, Eurofins Textile and Footwear Testing Spain is well-positioned to provide a compelling offering to its clients, providing a one-stop, customised and seamless service.

Services:
Testing
• Chemical Test
• RSL/REACH
• Total Heavy Metals
• Extractive Heavy Metals
• AZO Dyes
• Formaldehyde
• PH Value
• DMFu & DMFa
• Odour
• Phthalates (18)
• Chromium VI
• Nickel
• SCCP
• Mechanical Tests
• Pilling
• Abrasion
• Strength
• Washing/Shrinkage
• Fibre Analysis
• Colour Fastness
• Mechanical and performance testing for footwear
• Flammability Testing
• Children Safety
• PPE
• Label & Composition Assessment
• QC Inspections
• Audits
• Sustainability Services
• Trainings

Accreditations:

• ENAC (ISO 17025)

TURKEY

Eurofins Consumer Product Testing Turkey

Eurofins Consumer Product Testing Turkey, located in Mahmutbey, Istanbul, is a one-of-a-kind testing laboratory focused on a complete range of product categories within the fashion and retail industry including apparel, footwear, toy safety, accessories and the safety of children's products, from raw material stage to ready-to-wear/use stage.

As is required by law, consumer products must be safe for users. Eurofins has extensive knowledge of the legislation which is required and applicable to various products across many markets.

Eurofins Consumer Product Testing Turkey has the required accreditation to provide technical competence and perform textile, leather, footwear and fashion accessories products testing.

Ministry of Trade Footwear Testing

Eurofins Consumer Product Testing Turkey facilitates Phthalates, Chromium VI and Organic Tin Compound testing on behalf of the Turkish Republic Ministry of Trade according to Communiqué on Import Supervision of Some Consumer Products (Product Safety and Inspection: 2018/18) by the Ministry of Economy General Directorate of Product Safety and Inspection, published in the Official Gazette (Issue 30286 Reps) on 31 December 2017 by the Import Inspections Department.

Services:

• Chemical
• Azo Dyes
• Formaldehyde
• Allergenic Disperse Dyes
• Lead & Cadmium Content
• Nickel Release
• Heavy Metals
• Phthalates
• Chromium VI
• Chlorinated Phenols
• Organic Tin Compounds
• Polycyclic Aromatic Hydrocarbons (PAH)
• Alkylphenols / Alkylphenol Ethoxylates (APEO)
• Chlorinated Organic Carriers (COC)
• Others
• Mechanical
• Fibre Content
• Colour Fastness Tests
• Pilling Resistance
• Abrasion Resistance
• Tear Strength
• Tensile Strength
• Flammability
• Seam Slippage
• Dimensional Stability
• Zipper Slide Fasteners

Accreditations:

• Nº AB-1356-T for textile and leather materials, issued by the Turkish Accreditation Body (TÜRKAK), according to the ISO/IEC 17025:2012 standard

UNITED KINGDOM

Eurofins BLC Leather Technology Centre Ltd

Eurofins BLC Leather Technology Centre Ltd. (Eurofins | BLC) is a world leading technology centre and testing laboratory based in Northampton, United Kingdom. Established over 95 years ago, Eurofins | BLC provides a complete range of supply chain services to the leather industry, covering all areas from raw material through to finished product. Eurofins | BLC works closely with brands, retailers, product manufacturers and tanneries in many countries around the world.

As the only laboratory dedicated to leather, footwear, chemical, and leather product testing, Eurofins | BLC has the technical pedigree to ensure fast and accurate solutions to technical, environmental or management issues in the leather supply chain. As a Eurofins competence centre, Eurofins I BLC provides local expertise in their specific field to the international Eurofins laboratory network, contributing to the Group's global offering. As such, Eurofins I BLC is well-positioned to provide a compelling offering to its clients, providing a one-stop, customised and seamless service.

Services:
Testing
• Chemical
• Cadmium Testing
• Azo Dyes Testing
• Chrome VI Testing
• Formaldehyde Testing
• International Chemical Legislation & Compliance Testing
• Lead Testing
• MRSL Testing
• Nickel Testing
• PFOS Testing
• REACH Testing
• RSL Testing
• Wet Blue Testing
• Physical Testing
• Fault Diagnosis & Problem Solving
• Consulting & Auditing
• Chem-MAP – Chemical Verification Systems
• Sustainability
• Research & Innovation
• UK & International Training

Accreditations:

• United Kingdom Accreditation Service (UKAS) 0076
• ILAC Mutual Recognition Arrangement with UKAS
• CPSC Laboratory accreditation reference: 1049

USA

Eurofins Product Testing USA

Eurofins Consumer Product Testing USA provides testing, certification, and consulting services in relation to regulatory compliance as well as quality and safety of products to manufacturers, distributors and retailers.

Eurofins Consumer Product Testing US is located in North-western USA, is part of Eurofins Scientific Group. With over 650 global testing labs and is one of the world leaders in the testing, inspection and certification industry.

Eurofins Consumer Product Testing US has extensive analytical testing capabilities onsite in Bothell, WA, as well as the benefit of the Eurofins global network. Eurofins Product Testing USA specialises in material characterisation, design evaluation and accelerated aging consultancy, but also offers support in relation to food, microbiology, VOC, bio analytics and electronics tests in collaboration with sister labs.

Services:
Testing
• Chemical Testing: Lead, Heavy Metals, Phthalates, Formaldehyde Chemical Testing, etc.
• On site HDXRF & FTIR Screening Services; for heavy metals and phthalates (non-destructive)
• Mechanical
• Dimensional Stability & Shrinkage
• Colour Fastness; to various conditions including UV aging testing
• Durability & Abrasiveness Testing
• Fibre content & Labelling Review
• Tensile sStrength, Pilling, Crocking
• Wash & Care Instructions
• Flammability Testing
• Inspections (During production & pre-shipment product inspections)

Accreditations:

• PJLA (ISO 17025)
• CPSC

VIETNAM

Eurofins Consumer Product Testing Vietnam

Established in 2017, Eurofins Consumer Product Testing Vietnam specialises in consumer goods testing and inspection, as well as providing training to brands and manufacturers in relation to regulatory developments and standards.

Services:
Testing
• Fibre Labelling
• Care Labelling
• Colour Fastness Tests
• Dimensional Stability & Other Related Tests
• Strength Tests
• Flammability Tests
• Fabric Construction & Performance Tests
• Children's Safety Review
• Fabric Construction & Performance Tests
• Chemical Tests
• Inspections
• Training

AGROSCIENCE SERVICES

With over 30 years of experience in the crop protection industry, Eurofins Agroscience Services offers outstanding technical knowledge and project management skills. Our service offering is continuously developed by knowledge transfer initiatives between the Group's various centres of expertise across the globe.

By acquiring a carefully selected range of CRO's, Eurofins Agroscience Services has created a unique portfolio of expertise that provides analytical, regulatory and field support to plant breeders, agrochemical, biopesticide, biocide and fine chemical manufacturers.

ARGENTINA

Eurofins Agroscience Argentina

Eurofins Agroscience Services Argentina is part of Eurofins Agroscience Services global network and it has been present in Argentina since 2017. The headquarters is located in Las Higueras-Rio Cuarto (Cordoba province) and in addition a facility in Mendoza (Cuyo region) is present.

Services:

- GLP- residue studies
- Efficacy studies
- Demo studies
- Study management
- General Consulting
- Sample homogenisation

Services:
From the Toowoomba facility we can conduct a range of different trials including:
- Winter and summer crops - efficacy, safety and residue studies
- Plant variety evaluation for winter and summer crop types
- Agronomic field studies
- Horticulture efficacy, safety and residue studies
- Animal health efficacy studies
- Post entry quarantine studies with summer crops in a newly built glasshouse
- Work health and safety studies (mixer, loader, applicator)

A variety of equipment is available, including a range of sprayers, precision trial-plot seeders, harvesters and all the equipment necessary to conduct high quality studies that simulate most agricultural practices.

Eurofins Agroscience Bundaberg

Services:
From the Bundaberg facility we can conduct many different trials including:
- Efficacy/Bio Equivalence studies
- Palatability studies
- Knockdown/Mortality studies
- Direct spray/Residual control studies
- Attractiveness/Repellency studies
- Bioassays/Insect field resistance studies
- Barrier potential/Vertical soil infiltration rate studies
- Bait preference/weathering potential studies

A variety of equipment is available, comprising of a range of sprayers to simulate most agricultural practices, special measurement devices and all equipment necessary to conduct high quality public and environmental health and horticulture studies.

Eurofins Agroscience Shepparton

Services:
From the Shepparton facility we can conduct many different trials including:
• Horticulture efficacy, safety and residue studies (including processing studies)
• Cropping efficacy, safety and residue studies
• Plant variety evaluations for winter and summer crop types
• Work health and safety studies (mixer, loader, applicator)
• Animal health efficacy, safety and residue studies

A variety of equipment is available, comprising of a range of sprayers, seeders and harvesters to simulate most agricultural practices

Eurofins Agroscience Adelaide

Services:
Trial work conducted from our Adelaide facility includes:
• Horticulture efficacy, safety and residue studies
• Cropping efficacy, safety and residue studies
• Animal health efficacy studies

Staff within our Adelaide team have specialist training and experience in GLP residue study management, mite taxonomy, entomology, plant pathology and cropping agronomy.

A variety of equipment is available, including small plot seeding and harvesting equipment, and a range of small and large plot sprayers.

Eurofins Agroscience Sydney

Eurofins Agroscience Testing is a contract laboratory specialising in the analysis of agrochemicals, veterinary medicines and their residues in crops, animal tissues and environmental samples.

The team at Eurofins Agroscience Testing has experience with the analysis of most developmental agrochemicals and hence is in a position to offer sound advice for the analysis of the same compounds in food and environmental samples.

Services:

• Residue Field studies (GLP)
• Veterinary Drug Residue studies (GLP)
• Method Development and validation
• Pesticide analysis of fruit, vegetables
• Formulation analysis (GLP)
• Storage Stability studies (GLP)
• Physical Parameter Testing (GLP)

Accreditations:

• OECD GLP
• ISO 17025
• APVMA licensed
• AQIS facility

Eurofins Animal Health

We are a leading provider of veterinary research services and technical support to the global animal health industry. We conduct preclinical and clinical studies to GCP and GLP standards, as dictated by the regulatory authorities. Our technical activities involve the conduct of clinical field, pen and laboratory studies to determine the safety and efficacy of new products designed to improve animal health and welfare.

Our company has experience and expertise in veterinary chemicals, pharmaceuticals, therapeutic and prophylactic veterinary medicines, in planning and conducting of R&D programs, primary screening, individual field, pen and laboratory experiments, and out-of-season field and laboratory testing for northern hemisphere clients. We specialise in the design, management and execution of preclinical and clinical studies in Production and Companion animals.

Accreditations:
Eurofins Agroscience Australia is GLP recognised by NATA and conducts residue and safety studies to the OECD Principles of Good Laboratory Practice where required by the relevant regulatory bodies.

Clinical efficacy studies are conducted according to the VICH guidelines on Good Clinical Practice (GCP).

All studies are authorised and approved by the SAEC or our internal AEC (Animal Ethics Committee)

AUSTRIA

Eurofins Agroscience Services Graz

Eurofins Agroscience Services Austria GmbH was opened in January 2013 with locations in Graz and Gleisdorf. The facilities are based on the border between EPPO Zones Maritime and South East.

Services:

• GLP residue and soil dissipation trials
• Crop Efficacy and Selectivity Testing (GEP)
• Demo trials

Accreditations:

• GLP (EAS Germany)
• GEP

BRAZIL

Eurofins Agroscience Services LATAM

Eurofins Agroscience Services LATAM is part of the Eurofins Agroscience Services global network, performing field and laboratory studies to support the screening, development and registration of agrochemicals, biopesticides, professional products and new plant varieties.

The site was established in 2008 and is based in Indaiatuba/SP, near important airports and easy access to agricultural areas. Full "in house" GLP field and laboratory studies can be provided.

Experience in conducting studies in Brazil, Chile, Peru, Costa Rica, Guatemala, Ecuador and Mexico, and able to work in any LATAM country.

Services:

• Open and semi field ecotox studies
• Feeding studies
• Extended Laboratory studies
• Efficacy studies
• Soil dissipation studies
• Processing studies
• Residue studies
• Rotational Crops
• Pollinator Studies
• Analysis of Pesticide Residues
• Analytical method development and validation
• Sample homogenisation
• Study Management
• General Consulting
• Logistic

Accreditations:

• GLP

BULGARIA

Eurofins Agroscience Services Bulgaria

Eurofins Agroscience Services EOOD in Bulgaria forms part of the Eurofins Agroscience Services global network, providing field and analytical studies to support the screening, development and registration of agrochemicals in Bulgaria.

For more details on the service portfolio, please see Group description under Eurofins Agroscience Services in the UK and Germany.

We currently have three facilities in Bulgaria

Services:

• Efficacy of pesticides (GEP) crops
• Permanent crops
• Field crops
• Vegetable crops
• Greenhouse crops
• Selectivity safety cultures
• Residue of pesticides (GLP)

Accreditations:

• GEP
• GLP

Eurofins Agroscience Services Pazardjik

Eurofins Agroscience Services EOOD Bulgaria is the first private company in Bulgaria that has a Certificate for testing of pesticides of GEP.

Services:

• Efficacy of pesticides (GEP) crops- permanent crops, field crops, vegetable crops and greenhouse crops
• Selectivity safety cultures
• Residues of pesticides (GLP)

Eurofins MITOX FOPSE

Eurofins MITOX Group has provided environmental studies and regulatory services since the early 1990s and is well-established in the Agrochemical industry.

It operates sites in The Netherlands, Germany and the South West of France. The company brings extensive experience and knowledge in both Taxonomy and Environmental toxicology.

Services:

• Testing on non-target arthropods and soil organisms both lab and field
• Pollinator field studies both residue and effect
• Insect Residue studies
• Aged Residue and semi-field studies
• Resistance Testing of agricultural pests

Accreditations:

• GLP

Eurofins Agroscience Services Vergèze

Eurofins Agroscience Services Chem SAS is part of the Eurofins Agroscience Services global network and has provided services to biopharmaceutical and agro-chemical companies since 1987.

The laboratory is compliant with GLP and GEP. Highly trained staff and industry experts allow Eurofins Agroscience Services Chem SAS to offer quality, flexibility and reliability.

Services:

• Metabolism studies with radio labelled molecules (14C or 3H)
• Residue studies
• Analytical support for Ecotox and E-fate studies
• Analytical method development and validation
• Operator exposure studies
• Skin permeation studies with radio labelled (14C or 3H) or non-radio labelled preparation

Accreditations:

• GLP
• GEP

Eurofins Agroscience Services Regulatory France

In a dynamic and complex regulatory environment, our priority is to support clients through every stage of their registration requirements.

EAR is supported by a global network of field stations, laboratories and carefully selected partners. We are committed to advising on the best registration strategies and to compile registration documentation in line with current and upcoming regulatory guidelines.

EAR is constantly expanding its capacity and capabilities across the globe. With extensive experience in the various regulatory arenas, the team have worked under a range of partnership models over many years of active operation.

EAR are able to provide support in the following industries:
• Crop Protection
• Biopesticides (including microbials)
• Biostimulants

Services:

• Regulatory strategies
• Data Gap analysis
• Preliminary risk assessments / modelling
• Study conduct/monitoring
• Dossier compilation (all sections)
• Dossier defence
• Project management

Eurofins Agroscience Services EcoChem

Eurofins Agroscience Services EcoChem GmbH is part of the Eurofins Agroscience Services global network, providing analytical studies to support the screening, development and registration of test substances in Europe, the US and beyond according to international guidelines.

The company offers all analytical studies and scientific services required for the registration of agrochemicals,

chemicals, biocides and veterinary/human medicinal products globally. Every study is performed in compliance with GLP certified by the national authorities

Services:
Physico-Chemistry:
• Determination of physico-chemical properties of Active Substances and Formulations
• Storage Stability studies
• 5-batch studies, Change Control Analytics
• Inorganic Analysis by ICP-MS

Residue Analytics:
• EFate Residue Analysis for field studies in soil, water and groundwater
• Crop Residue Analysis, multi-residue and analyte specific
• Method development and validation, including ILV
• Analytical exposure analysis for all ecotoxicological studies in laboratory and field

Environmental Fate & Metabolism:
• 14C / environmental fate and metabolism studies in water, soil, air
• Metabolism studies in plants and animals
• Leaching, persistence, accumulation in soil and water
• Bioaccumulation studies

Accreditations:

• GLP

Eurofins Agroscience Services Ecotox

Eurofins Agroscience Services Ecotox GmbH is part of the Eurofins Agroscience Services global network, providing laboratory and field eco-toxicological studies to support the worldwide development, registration and stewardship of test substances.

The company offers all eco-toxicological studies and scientific services required for the registration of agrochemicals, chemicals, biocides, cosmetic and veterinary/human medicinal products globally. All studies are performed in compliance with GLP certified by the respective national authorities.

Services:

• Non-Target Arthropods, Honeybees, Bumble Bees, Solitary Bees, Non-Target Plant, Earthworms and Soil Organisms, Aquatic-Toxicology and microbiological testing
• Standard laboratory to field testing with NTA and soil organisms
• Aged residue and semi-field NTA studies
• Residue studies with several bee and bird food matrixes
• Honeybees, bumble bees and solitary bees lab, brood, tunnel and field studies
• Predatory mite field studies
• Full fauna NTA and soil organism in-field and off-crop studies
• Earthworm and soil organism lab and field studies
• Algae & aquatic macrophytes
• Aquatic Invertebrates (Daphnia and Chironomus)
• Aquatic vertebrates: fish acute (5 species) as well as early life stage, juvenile growth and bioaccumulation studies
• Biodegradation
• Endocrine Testing FSTRA, AMA and XETA
• Micro-cosm (indoor) and mesocosm (outdoor in co-operation with a partner) studies
• Lumbriculus testing
• Microbiological testing

Accreditations:

• GLP

Eurofins Agroscience Services EAG Laboratories GmbH Ulm

Our Ulm location is a full-service analytical laboratory focusing primarily on pesticide, pharmaceutical, biocide and chemical registration studies (OECD, EPA, REACH, etc.) performed under GLP. Newly relocated and expanded (2,800 sqm or 30,000 sq. ft), we are conveniently located near the A8 Autobahn, midway between Munich and Stuttgart.

Recognized as the premier provider of residue chemistry and non-radiolabeled fate and metabolism studies within the European Market, the Ulm, Germany laboratory has been delivering first-in-class service for over 25 years. More recently, the Ulm laboratory has become a key supplier for target compound and multiple residue analysis of pesticides in pollinators and testing of biocides.

Services:

• Residue chemistry
• Environmental fate
• Metabolism studies
• Product chemistry
• Pollinator testing

Eurofins Agroscience Services Stade

We serve the agrochemical, fertiliser, biocide and seed

industries. Our services include regulatory services (BAD), study management, selectivity trials, biological trials, screening trials, residue trials, soil dissipation and accumulation trials, eco-toxicological trials and different types of monitoring (groundwater, bioaccumulation).

Services:

• Crop Residue Studies (GLP)
• Crop Efficacy Testing (GEP)
• Glass House Studies
• Groundwater Monitoring
• Field Leaching Studies
• Selectivity Trials
• Rotational Crop
• Field Volatilisation
• Soil Dissipation / Accumulation
• EU and National Biological Dossier

INDIA

Eurofins Advinus Agrosciences Services India Private Limited (EAA)

EAA is one of India's leading Contract Research Organizations. We support the development and testing of all varieties of pesticides, industrial chemicals and other specialty chemicals for global registration. We have 30+ years of proven track record in generating regulatory data and offering agrochemical development services to our clients worldwide.

Services:

• Physical chemical property testing
• 5 batch analysis
• environmental fate studies
• terrestrial and aquatic ecotoxicology
• safety assessment
• field trials
• residue/ persistence studies
• plant/animal metabolism studies
• skin absorption studies
• process development/optimization and scale up of active ingredients
• REACH testing

Accreditations:

• GLP

Eurofins Agroscience Services India

The site was established in Q1 2014 and is based at Tiruppur, near Coimbatore in Tamil Nadu State. From here, a wide range of crops are available including plantation crops like tea, coffee, cardamom, etc. In addition, development officers are located at various parts of the country facilitating the conduct of trials at locations covering all the agroclimatic conditions of the country.

Services:

• Field trials for bio-efficacy, selectivity, vigour and residual activity
• Soil Dissipation
• Resistance Monitoring
• Residue studies
• Ecotoxicology studies
• Green House / Pot culture studies
• Insecticide Resistance Monitoring / Management
• Mass rearing of insects viz., Helicoverpa / Spodoptera /DBM / BPH for R-Monitoring
• Household pesticide efficacy, persistence and residue testing (lab and field)

Eurofins Agroscience Services Catania

The south of Italy is well known for its cropping capabilities. Due to Sicily's particular climatic conditions, the island is able to produce a wide range of crops such as citrus, vineyards, olives, vegetables and cereals.

The Catania base was inaugurated in 2011 with the aim of exploiting good weather almost all year round. This extended season allows increased trial periods, thus allowing more data availability and the opportunity to offer out of season trials to clients.

JAPAN

Eurofins JACC

JACC (Japan Analytical Chemistry Consultants) is one of the largest Japanese independent GLP pesticide residue laboratories for agrochemical-registration, with more than 40 years of chemical testing experience and know-how.

JACC has accreditation from the Japanese Ministry of Agriculture, Forestry and Fisheries (MAFF), and serves chemical and agrochemical clients by offering pesticide analyses for river water, air and soil samples as well as analyses for active agrochemical ingredients and formulations.

Services:

• Crop residue analysis
• Analysis of agrochemical AI
• Phys-Chem analysis of agrochemical formulation
• Agrochemical residue analysis in environment

Accreditations:

• GLP (MAFF, Japan)

PORTUGAL

Eurofins Agroscience Services Portugal

The facility at Moncao was established in 2004. Initially offering field trials, mainly GEP trials, the facility now has extensive and broad experience in field studies such as efficacy, residue, ecotoxicology, soil dissipation and ground water monitoring.

Services:

• Crop Residue studies (GLP)
• Crop Efficacy Testing (GEP)
• Ecotox Trials - earth worms
• Downy mildew and late blight trials
• Soil dissipation studies
• Ground water studies
• OPEX studies
• Post harvest studies
• Study Management

Accreditations:

• GEP
• GLP

SPAIN

Eurofins Agroscience Services Valencia

The base was opened in 1996 with three people. The site was officially recognised by the Spanish Ministry of Agriculture for efficacy trials in 1997 and in 1998 was fully accredited for GLP trials by ENAC. In April 2018, the facility moved to the new site increasing capacity and resources to our service offering. The facility is located in Beneixida which is strategy located to cover a broad range of crops including cereals, citrus, vegetable crops (indoor and outdoor), grape (table and wine) and some others.

Services:

• Efficacy trials, open field and greenhouse conditions.
• Biostimulants trials, open field and greenhouse condition.
• Dumping-off trials in control conditions.
• Residue trials, open field and greenhouse conditions.
• OPEX trials.
• Groundwater monitoring studies
• Soil dissipation studies
• Study Management
• Post harvest efficacy and residue trials
• Dust drift residue trials

Accreditations:

• GEP
• GLP

Eurofins Agroscience Services Seville

The facility was set up in 1996 with two staff who mainly carried out GLP trials. The site was officially recognised by the Spanish Ministry of Agriculture for efficacy trials in 1997 and in 1998 was fully accredited for GLP trials by ENAC. In July 2014, the facility moved to the new site which saw increased capacity and improved our service offering. The facility is located in Camas which is in the farming heartland of Seville, Spain and also has easy

access to most of the public transportation such as railway station and airport.

Services:

• Operator Exposure Studies
• GMO Studies
• Project Management
• Ecotox studies
• GEP and GLP in greenhouse or field conditions
• Ground water monitoring studies
• Soil dissipation studies
• Study management

Accreditations:

• GEP
• GLP

Eurofins Agroscience Services Regulatory Spain SL

In a dynamic and complex regulatory environment, our priority is to support clients through every stage of their registration requirements. EAR is supported by a global network of field stations, laboratories and carefully selected partners. We are committed to advising on the best registration strategies and

to compile registration documentation in line with current and upcoming regulatory guidelines.

EAR is constantly expanding its capacity and capabilities across the globe. With extensive experience in the various regulatory arenas, the team have worked under a range of partnership models over many years of active operation.

EAR are able to provide support in the following industries:
• Crop Protection
• Biopesticides (including microbials)
• Biostimulants

Services:

• Regulatory strategies
• Data Gap analysis
• Preliminary risk assessments / modelling
• Study conduct/monitoring
• Dossier compilation (all sections)
• Dossier defence
• Project management

THAILAND

Eurofins Agroscience Services Thailand

Eurofins Agroscience Services Ltd in Thailand forms part of the Eurofins Agroscience Services global network, providing field and analytical studies to support the screening, development and registration of agrochemicals in Thailand.

Services:

• Crop Residue studies (GLP)
• Crop Efficacy Testing (GEP)
• Glass House studies
• Operator Exposure studies
• Insecticide Resistance Monitoring / Management
• DBM / BPH Mass Rearing for R-Monitoring

Accreditations:

• GEP
• GLP

THE NETHERLANDS

Eurofins MITOX BV

Eurofins MITOX Group has provided environmental studies and regulatory services since the early 1990s and is well-established in the Agrochemical industry.

It operates sites in The Netherlands, Germany and the South West of France. The company brings extensive experience and knowledge in both Taxonomy and Environmental toxicology.

Services:

• Testing on non-target arthropods and soil organisms in-field
• Pollinator field studies both residue and effect
• Wildlife field studies including monitoring, effect and residues
• Ecological Impact Assessments (Biodiversity Monitoring)

Accreditations:

• GLP

Eurofins De Bredelaar

De Bredelaar was founded in 1988 and is an independent research institute specialised in crop protection in agriculture and horticulture. Areas of expertise include efficacy, phytotoxicity and residue studies in various crops along with demonstration trials. De Bredelaar is both GEP and GLP certified.

Field trials are carried out either on-site (fields and glasshouses) or at nurseries and arable farms throughout the Netherlands.

Services:

• Efficacy & Crop safety research
• Residue & Exposure studies
• Demonstration & Platform trials
• Tuber- and seed treatment trial

Accreditations:

• GEP
• GLP

UNITED KINGDOM

Eurofins Agroscience Services UK

Eurofins Agroscience Services in the UK forms part of the

Eurofins Agroscience Services global network.

There are six strategically based field locations in the UK offering full geographical coverage and a state-of-the-art molecular diagnostics laboratory in Derbyshire.

Services:

• Laboratory, growth room, glasshouse and field screening
• Crop Efficacy studies (GEP)
• Biological Assessment Dossiers
• Project and Study management
• Crop Residue studies (GLP)
• Full analytical services for analysis of residues in crops, water, soil, and air and other matrices
• Analytical method development
• Independent Laboratory Validations
• Import tolerance studies
• Baseline resistance monitoring
• Insect and pathogen cultures
• Effects of pesticides on rotational and replacement crops
• Soil dissipation/ accumulation
• OECD 208 studies
• Varietal evaluation
• ELISA [protein expression & viral quantification]
• Real time PCR
• Nematode laboratory
• Evaluation of the rainfastness and wash-off of products
• Exposure studies including operator, worker re-entry, and dislodgeable foliar residues
• Ecotoxicology field studies
• Independent Laboratory Validations

Accreditations:

• GEP
• GLP

Eurofins Easton

Formerly known as Wildlife International, Ltd., this facility is located on Maryland's Eastern Shore. Started in 1985, the Easton location offers aquatic and avian toxicology services, testing programs for terrestrial plants, insects and services to evaluate environmental fate and biodegradation. The laboratory is almost 120,000 sq. ft. in size.

We serve and provide support to a global clientele with GLP studies to meet global regulatory requirements for the testing of agrochemicals, industrial chemicals, pharmaceuticals, biocides and animal health products. Our highly experienced and talented team of scientists and technicians focuses on quality, timeliness, innovation and flexibility to meet the complex needs of diverse markets, each of which are confronted with ever more complex regulations.

Our experts are intimately involved in the development of guidance and constantly engage in scientific exchanges in OECD, EPA, EU and other regulatory programs.

Services:

• Aquatic toxicology
• Avian toxicology
• Terrestrial toxicology
• Environmental fate studies
• Product chemistry under GLP

Eurofins Columbia (ABC Lane)

Formerly known as ABC Laboratories, this facility is located in Columbia, MO, about a 2-hour drive from either St. Louis, MO or Kansas City, MO. Founded in 1968, this laboratory is recognized as a global leader in GLP residue and analytical chemistry, serving the agrochemical, pharmaceutical, industrial chemical, and consumer product industries.

Since 1968, our Columbia location has been delivering analytical expertise in support of product development. Through development know-how, cross-disciplinary technical expertise, and applied experience with multiple regulatory frameworks, we deliver a broad array of GLP compliant product development and analytical testing services. This cross-industry, cross-regulatory experience adds value to the process of product development—and will become increasingly important as public scrutiny and global regulations converge on the interrelationships between human, animal and environmental health.

Services:

• Analytical MD & MV
• Stability & QC Release
• Residue Analysis

Eurofins Agroscience Services Sanger Research Facility

The Sanger research station located in Sanger, CA has soils typical of the Central Valley in California. Only 8 miles East of Fresno, it conducts work with all major California crops.

Services:

• GLP/ Residue Studies
• Efficacy studies
• Environmental Fate Studies
• GMO studies
• Pollinator studies
• DFR Studies
• Worker Exposure Studies

Accreditations:

• GLP

Eurofins Agroscience Services Mebane Field Station

The Mebane field station maintains a group of well-trained research scientists with working knowledge of beekeeping. The team leads the honeybee ecotoxicity studies in the US. Currently, approximately 500 beehives are kept across apiaries here.

Field work is comprised of several different types of studies. The most common studies are honeybee ecotoxicity studies and residue studies. GLP studies are conducted at the request of the sponsor.

The common field crops are corn, cotton, soybeans and sunflowers. Our common vegetables include tomato, pepper, potatoes, cucurbits and broccoli.

The Mebane greenhouses are used most frequently to grow crops needed for transplant in the field, or to maintain arthropod cultures. Other studies maintained in a greenhouse setting include germination studies, pollination studies, water management studies, and caged insect studies.

Eurofins Agroscience Alachua

This laboratory offers pollinator testing capabilities, featuring honeybee hives and bumble bee colonies, with ample capacity for culturing quality larval stock.

Located in Florida, this optimal latitude allows almost year-round pollinator testing. Capabilities at this site include all five core studies required by the EPA, with developing capabilities to work with native species.

Eurofins Research For Hire

Research For Hire, Inc. has been conducting agricultural research since 1983. We conduct all residue trials following Good Laboratory Practices (GLP) within the requirements of EPA and GLP Standards.

Our company has an experienced staff of Biologists, Research Assistants and a Quality Assurance Unit. We have Standard Operating Procedures in place to handle the conduct of most agricultural research programs.

Research For Hire has a permanent staff of 25 employees with seasonal staff added at the field technician level each year.

REACH SERVICES

Eurofins is a global service provider to the chemical industry, offering a comprehensive range of testing and consulting services for REACH and its worldwide relatives.

Eurofins REACH Services covers the full testing portfolio according to Annex VII-X of the REACH directive, as required for the registration of chemicals within the EU. All studies are performed in compliance with GLP for which we have a certificate since many years.

For clients dealing with articles or finished goods, the following services can be provided from Eurofins Consumer Product Testing Division (Check section "Consumer Products Testing" in this directory):
• BOM/BOS Chemical Assessment (HENZ System): our laboratories can help to manage and monitor your supply chain by helping to collect BOM (Bill of Materials) and BOS (Bill of Substances) from your suppliers. This information is essential in the process of controlling the occurrence of any SVHC or other chemical restricted substance through your supply chain. Based on collected BOM/BOS information, our Chemical Assessment Service (HENZ System) can help to assess your product and evaluate the likelihood of containing any SVHC or any restricted chemical in any of the components of the product, hence, helping companies to optimize testing efforts and quality budgets by creating targeted testing plans focusing on those specific components that would have been evaluated as risk materials during the assessment
• SVHC and Restricted Substances Testing: Either in conjunction with the Chemical assessment service (for targeted testing programs after assessment) or independently, Eurofins offers a wide range of analytical tests to screen for candidate list substances (SVHC) and to cover specific restricted substances under REACH Annex XVII

General contact for services regarding REACH in articles: product-testing_reach@eurofins.com

Services:
Physico-chemical properties

Toxicology
• Skin and eye irritation/corrosion
• Sensitisation
• Genotoxicity
